Connect with key decision makers and procurement professionals from leading organisations including:

AIRBUS

ASTON MARTIN

### Composites Forum, curated by Composites UK

This will be a major draw on the show floor, attracting professionals eager to explore sustainability, material circularity, and new product development. You will be at the heart of the conversation, connecting with an audience ready to invest in strengthening the sector.

The UK's modern Industrial Strategy recognises composites as a "foundational industry" and a key enabler for growth.

This is a great opportunity for suppliers like you offering low-carbon, energy-efficient manufacturing to drive competitiveness and accelerate the journey to net zero.

# POWERING THE POSSIBLE

Join the

# Composites Engineering Zone

Showcase your expertise at Advanced Engineering. It's a chance to establish your presence, engage with key industry professionals, and gain visibility. This is the perfect opportunity to take advantage of our introductory SME price.
