

Control like in a race car: VacuMaster Comfort with optimized operating unit in ergonomic design.

- Optimal ergonomics at any working height thanks to swivel and tilt function
- ▼ Intuitive and user-friendly arrangement of controls

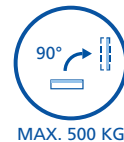

NEW

Ergonomic Update for Your Processes

VacuMaster Comfort

With its new operator handle, the VacuMaster Comfort takes ergonomics and ease of use in the manual handling of heavy loads to a new level. Sheet metal, wooden or plastic plates, barrels, windows or glass sheets can be handled effortlessly and safely.

Product Highlights

- Wide bow handle reduces the amount of force required for movement
- Swivel and tilt function allows ergonomic height adjustment of the operating unit for handling in high and low positions
- All device functions and the chain hoist controls are conveniently positioned on one control panel
- Colored buttons with matching symbols minimize the risk of operating errors
