

WAREHOUSE TERMINAL T10

» INNOVATIVE SOLUTION FOR VIRTUALISATION OF YOUR WAREHOUSE

The T10 Warehouse Terminal is a solution that has been developed for intuitive and fast warehouse management. Thanks to the device, it is possible to register articles that do not fit in the dispensing machines. It allows you to control the flow in the warehouse and virtualise the area.

The terminal is accessible from anywhere in the world via a device with Internet access. With the T10 Warehouse Terminal, you will be assured that the product flow in your company is becoming clear. By controlling expiry dates and product limits, you can prevent wastage and overstocking of required goods. It is also possible to generate the reports and printouts that your company needs.

The 10-inch display provides a convenient working environment for both product collectors and dispensing warehousemen.

The T10 Warehouse Terminal is compatible with any WMS system available in the company.

FUNCTIONS

- » **Simplified record-keeping** - document registration becomes easier and more environmentally friendly. Information is available instantly.
- » **Internal letters / boxes management** - Pickup takes place at vending machines. The L40 model is ideal for this purpose.
- » **Virtualization of warehouse space** - recording and control of product flow in the warehouse.
