Become a 3YO distributor!

**THE PLANET
IS ASKING FOR IT.**

120 hours cutting with one application of 3YOTS,
8kW, carbon & stainless steel, 3 to 25mm thickness

WHY 3YOTS WITH 3YOGUN?

**Prevention is better
and cheaper than
the cure!**

Enhance the efficiency
of your laser machines
with a safe and
practical solution
that solves problems
previously considered
unavoidable.

Laser cutting tables
no longer need to be
cleaned—simply apply
a thin layer of 3YOTS
using the 3YOGUN, and
start cutting non-stop.

**It takes less than 1
minute!**

Developed in Italy,
this non-hazardous and
biodegradable liquid is
the most cost-effective
way of preventing slag
build-up on the slats.
It works with any laser
power and type. If
you cut Carbon Steel,
Stainless Steel or
Aluminum, you can use
3YO coating without
affecting downstream

operations such as
painting or plating.

3YOGUN is specially
designed and produced
to perfectly nebulize
3YOTS.

Engineered in Germany,
the 3YOGUN features a
practical refillable
tank and is powered by
a rechargeable battery.

For a free test,
contact your local
dealer, which you can
find in the “Retailers”
section on our website
at www.3YOTECHNOLOGY.com,
or email
commerciale@EPCM.expert
