

Automatic Production Systems

About APS-Europe

APS-Europe specialises in the design and production of automated machinery for the steel construction industry. With deep roots in steel construction ourselves, we stay closely connected to the practical realities of the workshop floor. This hands-on experience gives us a clear understanding of the sector's challenges — and allows us to deliver solutions that truly match the needs of our customers.

Thanks to our extensive experience in developing and manufacturing machines, we have proven ourselves to be a reliable partner. Our robust and durable machines are designed for maximum efficiency. We are also known for our fast, personalised service, ensuring that your machines always run optimally.

Drilling and sawing lines

APS Europe offers a wide range of drilling and sawing lines suitable for various applications in the steel construction industry.

For medium-sized companies, we offer compact models that enable efficient working in limited spaces.

For larger steel construction companies, we supply machines suitable for heavy profiles, which can be fitted with sub-axes for increased speed and efficiency.

Visit our website at <https://aps-europe.nl/> for more information.

Punching and shearing lines

APS Europe offers a wide range of punching and shearing lines suitable for various steel construction applications.

These range from simple 3-tool punches with feed and discharge to extensive 6-tool punches with angle line shears, flange punches and expansion options, such as an automatic magazine and sorting system.

Our machines are distinguished by their robust construction and user-friendly design.
