at Solution Center

Exhibitors' networking
evening

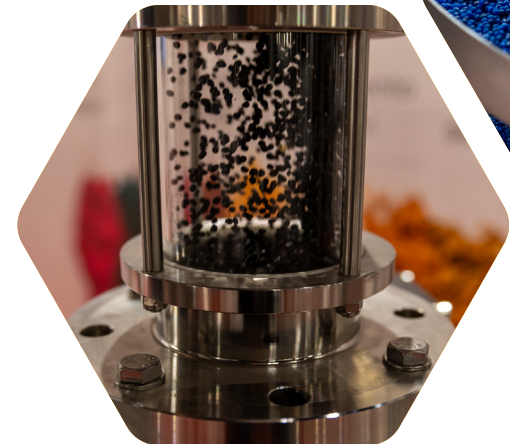

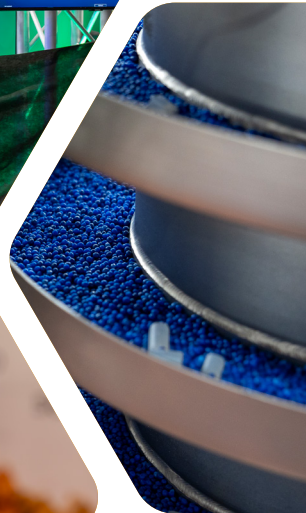

Press Lounge Area

- Central networking areas for exhibitors and trade visitors
- Free catering for all exhibitors
- Exclusive presentation opportunities and lounge areas
- Recycling Path
- Start-Up Area

Impressions

Statements from exhibitors and visitors of SOLIDS Parma 2024

„The fair went well for us, exceeding our expectations. We are a company that has been active in the process control sector for 30 years, especially in powder treatment, dosing, and mixing, and we are in the right place here.“

Stefano Guidarini,
Chairman CDA / CTO - PROTEO ENGINEERING S.r.l. - Exhibitor

„The fair, like last year, went quite well. We were very pleased with the attendance, which is very qualified for our sector. This year we presented our integrated screening solutions, including preventive maintenance software, which is a big innovation for us.“

Katia Motta,
CEO - CUCCOLINI S.r.l. Virto Group - Exhibitor

„Certainly, here at SOLIDS it is a very important opportunity for us to present innovations that we are introducing to the market, which we believe can really turn the world of powder treatment around.“

Gianni Salvioli,
General Manager - WAM Italia S.p.a. - Exhibitor

„We are here to confirm our presence, both at the PEGASO Group level and at the level of the Ergomec unit, which specialises in powders.“

Pierangelo Zampieri,
Commercial Specialist - ERGOMECH - Exhibitor

„For us, SOLIDS is an important fair precisely because it gives us the opportunity to meet customers not from a specific sector, but from several sectors, which would normally require several sectoral fairs. We offer solutions for mixing, mechanical transport, and big bag storage for the food, construction, plastics, and recycling sectors. A very cross-sector fair.“

Davide Pagliero,
Sales Manager - BECCARIA - Exhibitor

„I found this latest edition of Solids to be richer in exhibitors, with a focus not only on the engineering and supply of strategic components but also on safety and prevention devices, which are fundamental for proper design and operation of the plants. Very useful is the innovative 'touch & collect' feature, which allows for follow-up contact with the exhibitors.“

Ing. Gabriele Paini,
Project Engineer - Barilla G.&R. F.lli S.p.a. - Visitor

„A very interesting event dedicated to a wide range of industrial applications; extremely stimulating were the workshops on environmental sustainability, which will be an important vector in the coming years for the development of new materials and innovative, cutting-edge technologies thanks also to the introduction of AI. We attended the workshop 'Super-Intelligence! Artificial Intelligence and its applications in the industrial world'.“

Ing. Silvia Rosati, Manufacturing & Improvement Engineer - Angelini Pharma S.p.A. - Visitor
