

ARJO HYGIENE AND WELLNESS SOLUTIONS

Therapeutic and tailored assisted bathing and showering

Assisted bathing and showering

Arjo integrated Hygiene & Wellness Solutions enable you to deliver a tailored and therapeutic experience for dependent residents and patients, helping you improve wellbeing and efficiency in your care environment.

Successfully meeting the hygiene needs of residents and patients in both acute and long-term care is not without significant challenges. Of all handling tasks, hygiene care is considered among the most high risk.

At Arjo, we believe bathing and showering should be deeply calming and sensory experiences that promote wellbeing and improve quality of life for residents and patients. Our solutions are specifically designed to help you deliver one-to-one care that is beneficial for your residents and patients, and safe and productive for caregivers.

- Carry out your daily hygiene tasks efficiently and ergonomically
- Promote a dignified experience that is calm and therapeutic
- Coverage across a wide spectrum of resident and patient needs
- Designed to be used by a single caregiver

The Mobility Gallery™

Understanding the unique needs of individual residents and patients is key to quality hygiene and wellness care.

Our Mobility Gallery™ is an assessment tool that helps you find the right hygiene solution depending on a resident or patient's specific mobility levels as well as their personal preference, as indicated in the scale below.

Albert

Who is ambulatory and independent.

Barbara

Who can support herself to some degree.

Carl

Who sits in a wheelchair and has little capacity to support himself.

Doris

Who has no capacity to support herself.

Emma

Who is almost completely bedridden and totally dependent.

All Arjo hygiene and wellness solutions are categorised according to this scale, aligned to the resident and patient for which they are most suitable.

Assisted showering

Hygiene needs differ significantly across care settings, from patients that require basic assistance to residents with impaired cognitive and physical capabilities. Our assisted showering solutions allow you to work in an ergonomically sound position while maintaining eye contact with your resident or patient, supporting a beneficial and rewarding interaction.

No resident or patient is ever the same and needs and preferences may vary from day to day. Arjo showering solutions are designed to help you optimise the delivery of daily hygiene care by tailoring the showering experience to the unique needs of your resident or patient.

Carino®

A shower chair for everyday assisted hygiene tasks such as washing and toileting, Carino is height adjustable to reduce static load and is also designed for intuitive ease of use.

Designed with Barbara and Carl in mind

Carendo®

A multipurpose hygiene chair, Carendo® helps reduce static load and contributes to a comfortable and dignified experience for your dependent residents or patients, even during the most sensitive hygiene tasks.

UNIQUE CARE RAISER FUNCTION

Designed with Carl and Doris in mind

Carevo®

An innovative solution for immobile residents and patients, the Carevo® shower trolley is designed to deliver ergonomic efficiency that helps you optimise the showering experience.

PRESSURE-RELIEVING FLEXI ZONE SURFACE

ERGO ACCESS AREA

Designed with Emma in mind

Assisted bathing and transfer solutions

Bathing promotes a sense of wellbeing for residents and patients and enhances quality of life, which is why our range of hygiene and wellness solutions are designed with flexibility in mind, ensuring all residents and patients can experience the therapeutic benefits of bathing. Our bathing solutions are fully integrated with the Arjo range of mobility and lifting aids, ensuring you can safely and comfortably transport residents and patients from bed or wheelchair into the bath – and back again – in one seamless routine.

Recumbent bathing

To ensure a comfortable and safe bathing experience, Arjo has designed bath lifts that allow a single caregiver to transfer a resident or patient without the need of manual lifting.

You can also select your bath lift or other mobility device depending on the mobility level of your resident or patient and their preferred way of bathing (recumbent, reclining or sitting).

Our family of bath lifts is fully compatible with System 2000*, and sling bathing can be performed in any of our models, including Parker and Malibu.

*System 2000 is compatible with Calypso and Bolero bath lifts. Subject to market availability.

Alenti®

Designed for semi-dependent residents and patients, the Alenti® bath lift chair provides a comfortable sitting and reclining position. The lift features a small footprint design, is easy to manoeuvre and can be docked from either sides of the bath tub enabling a tailored bathing routine. Additional essential hygiene tasks, such as toileting, can be completed while your resident or patient is seated.

Designed with Albert, Barbara and Carl in mind

Miranti®

Providing maximised powered support, the Miranti® lift and bathing trolley ensures a single caregiver can position a dependent resident or patient into a reclining position for a beneficial bathing experience.

Compatible with Rhapsody and Primo size 2300mm and 2500mm
Designed with Carl, Doris and Emma in mind

Maxi Sky® 2

The Maxi Sky 2 ceiling lift ensures transfers are fully ergonomic and free from strenuous handling. The ceiling lift with mesh sling allows water to pass through the material easily, making it an ideal choice for the showering and bathing of heavily dependent residents and patients.

Designed with Carl, Doris and Emma in mind

Recumbent bathing solutions

The System 2000 recumbent bathing solution enables an ergonomic and therapeutic bathing routine across the full spectrum of dependent residents and patients and is designed to enable easy maneuvering and docking of hygiene lifts where space is limited.

The System 2000 bathing solution includes a range of unique bath shapes and is fully compatible with the range of Arjo hygiene lifters, giving you the flexibility to choose the right bathing solution for your resident or patient. All baths are fully ergonomic and height adjustable, ensuring you are always able to work in a safe and comfortable position and can enjoy a positive one-to-one interaction throughout your bathing task.

All System 2000 baths include Hydromassage, Hydrosound cleaning therapy, and Sound and Vision multi-sensory features, designed to help you optimise the therapeutic benefits of the bathing experience for your resident or patient.

System 2000 Rhapsody®

A unique keyhole shape with additional shoulder space designed to improve access to your resident or patient. The solution provides greater access to the upper body and has been designed to enhance the comfort of the resident or patient.

Suitable for all mobility levels

System 2000 Primo® & Harmony®

The familiar shape of a traditional straight bathtub, both Primo® and Harmony® feature wider shapes specifically designed with the needs of larger residents in mind.

Suitable for all mobility levels

All bathing solutions include safety features:

- Thermoscopic mixer that prevents scalding
- Unique triple electronic scalding protection with automatic shut off should water temperature exceed a safe level
- Integrated disinfectant dispensing system
- Emergency lowering
- Hot water flush feasibility

Seated and reclining bathing solutions

With additional reclining functionality, the Arjo range of seated and reclining baths are designed to provide more able-bodied residents and patients the therapeutic benefits of bathing.

Parker®

The height-adjustable Parker® reclining sit bath is designed to help you provide a safe and beneficial bathing experience that is easily accessible for your resident or patient through a specialised side-door entrance. Designed for residents in categories A to D, the door entry removes the need for an extra hygiene bath lift device, and additions such as Air Spa and Sound and Vision offer a more pleasurable bathing solution.

Designed with Albert, Barbara, Carl and Doris in mind

Malibu™ and Sovereign™

Featuring integrated transfer chairs, Malibu and Sovereign* enable you to make the therapeutic benefits of bathing available to a broad spectrum of residents while reducing bathroom transfers.

Both bathing solutions are height adjustable, ensuring you can work efficiently and confidently, without the fear of static overload, while promoting the wellbeing of your resident or patient. The baths include the AirSpa feature, providing a soothing massage sensation designed to enhance the relaxing effect of the bathing experience for your resident.

Malibu and Sovereign feature a compact design that is ideal for environments where space is limited and are also compatible with the full range of Arjo transfer aids for additional flexibility and choice.

Designed with Albert, Barbara, Carl and Doris** in mind

* Availability limited to UK and central Europe
 ** Only for Sovereign

Bathing and wellness

Bathing promotes a sense of wellbeing for residents and patients: a warm bath can help ease muscles, improve skin conditions and relax the mind. The Arjo range of bathing solutions ensures residents and patients across the full spectrum of mobility can experience the therapeutic benefits of bathing.

Arjo bathing solutions incorporate a range of features and therapy options that enhance the bathing experience and assist you in creating an enjoyable as well as beneficial one-to-one interaction.

Therapeutic benefits that go beyond daily routine

Hydromassage™* – spa therapy

The built-in Hydromassage™ unit enables you to create millions of small bubbles in the bath water, generating a gentle massaging effect that stimulates peripheral blood circulation and eases muscle tension for a pleasant and sensory experience. Intensity can be adjusted depending on the preference of your resident or patient.

Hydrosound™ – cleaning therapy

Hydrosound™ helps to protect the skin of your residents and patients by offering a pleasant and relaxing alternative to manual washing. Hydrosound creates sound pressure waves through the water and millions of bubbles that act as gentle "skin scrubbers", removing dirt particles without physical touch.

Sound and Vision™** – multi-sensory experience

Colourful underwater lighting and soft music enhance the power of bathing to help calm stressed or anxious residents and patients. Underwater lights at the foot of the bath can rotate between red, green, blue, pink and yellow, while a USB port allows you to play relaxing MusicCure® tracks or other MP3 tracks to the liking of both dependent and cognitively impaired residents and patients.

Air Spa™

Providing residents and patients with a gentle and relaxing spa sensation, Air Spa™ can be adjusted from a low level setting to a more invigorating massage sensation.

* Only for System 2000

** Only System 2000, Parker. (n/a for Malibu)
