

# IT1

CUSTOM-MADE  
SMART HEARING  
PROTECTION

«Connected and protected hands free.»

A smart communication device combined with custom-made hearing protection.

IT1

## SMART COMMUNICATION

With Bluetooth technology built into this hearing protection, employees can be perfectly connected while also remaining protected from noise hazards. With the IT1, employees can make and receive calls hands-free, allowing them to continue their activities.

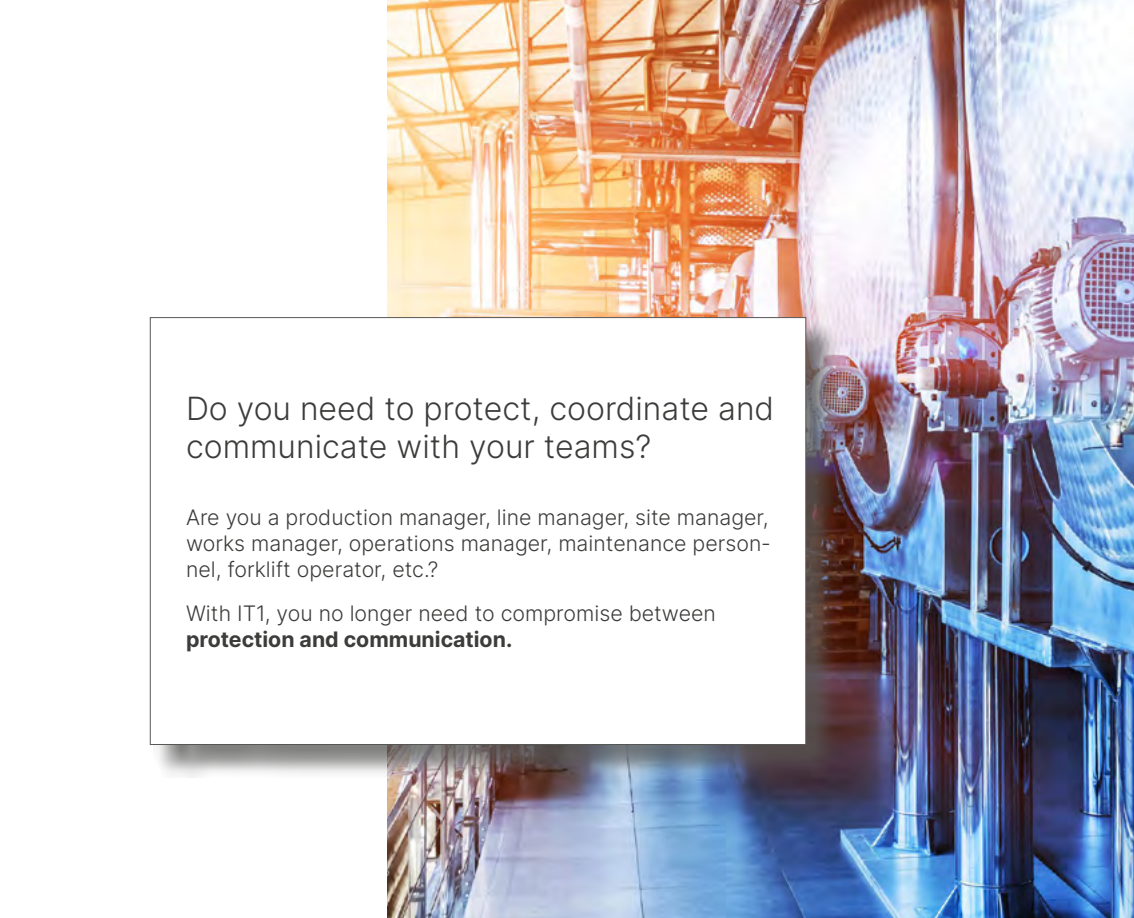

## CUSTOM-MADE PROTECTION

The protection is custom-made with 3D technology, and designed with extreme precision, to guarantee comfort and efficiency. IT1 combines these hearing protectors with features that allow the user to communicate in any type of noisy environment without having to remove their PPE.

## CONVENIENT

It is resistant to water and dust, with an 11-hour battery-life, compatibility with other PPE (helmets, goggles, etc.) and perfectly meets the environmental and professional constraints of companies. IT1 is a lightweight, easy-to-use device that offers employees an intuitive user experience.

Do you need to protect, coordinate and communicate with your teams?

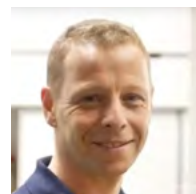

Are you a production manager, line manager, site manager, works manager, operations manager, maintenance personnel, forklift operator, etc.?

With IT1, you no longer need to compromise between **protection and communication.**

## TESTED AND APPROVED

"Very happy with the product. The user used to have hearing protectors, which he hardly used because he works with an overhead lift, which makes a lot of noise so he couldn't hear very well on the phone, but now that he has the IT1, he wears his hearing protectors all the time."

**Tony R. - Maintenance Manager - LASER 53**

"Our company has been validated as an IT1 tester in France. We have set up in many workstations where telephone communication is an essential part of the normal working hours: maintenance, shipping and production managers. Currently, it is a real revolution and they can't do without it. They are on the phone hands-free and are wearing their earplugs. This is becoming a model for the group and we are looking at equipping other stations."

**Julien B. - Safety Manager - PARMENTINE PRODUCTION**

The hands-free solution  
to communicate.

5.0 Bluetooth

32 Grams

11h battery-life

Volume  
limiter
