

S4M
MAKING MATERIALS COUNT

MATERIAL MAINTENANCE

S4M specializes in managing, maintaining and repairing your materials, ranging from safety devices to technical tools. This can be carried out either at your site (on-site) or at ours (off-site), fully tailored to your equipment needs.

S4M Maintenance increases the safety on your site, gives an insight into your maintenance budget in advance and reduces your costs. We reduce your risks to an absolute minimum.

WE DO THE MAINTENANCE OF:

FALL PROTECTION
FALL STOP DEVICES
COMPRESSED AIR BOTTLES & DEVICES
EMERGENCY SHOWERS & EYEWASH FOUNTAINS
LIFE JACKETS

FACE FIT TESTING
FULL FACE MASKS & AIR HOODS
GAS DETECTION
BLOWER UNITS
FIRST AID KITS

FOLLOW-UP FROM A TO Z

- Registration:** All products serviced on-site or in our workshop are registered in our database
- Documentation:** An overview and test report of all maintenance, inspection and replaced parts is drawn up
- Follow up:** You will be informed by S4M in time when a next maintenance or inspection is necessary
- Complete care**

S4M
MAKING MATERIALS COUNT

WHY MAINTENANCE IS IMPORTANT

- Safety for your staff:** equipment subject to maintenance or inspection protect your personnel from hazards with potentially serious or even fatal risks
- Extend the lifespan of the PPE**
- Improving quality:** by performing maintenance regularly, defective equipment or problems can be detected, resolved more quickly and the equipment lasts longer
- Hygiene:** cleaning during maintenance ensures clean equipment and greater safety during use of the device

OFF-SITE MAINTENANCE

For off-site work, you can visit one of our workshops in: Herentals, Ghent, Antwerp, Rotterdam and Amsterdam.

Our workshops are equipped with the most advanced equipment (breathing air compressor, test benches, calibration stations, professional washing and drying machines) and stockpile for all your maintenance and repairs.

ON-SITE MAINTENANCE

Based on the number, brand and type of equipment to be maintained and the work to be performed, we review what is possible together.

We use an In-Plant Material Center with collect & drop points, maintenance, rental and stock. In addition, our mobile service vehicle has the same tools as our workshop.

Also for temporary services of maintenance, safety and material management during a shutdown or turnaround, you can contact S4M.
