

S4M
MAKING MATERIALS COUNT

DISTRIBUTION SOLUTIONS

Our vending solutions provide you with the stock you need on the shop floor. Enjoy a worry-free automated material management system for your employees.

User-friendly, flexible, transparent and cost-saving. That is the essence of S4M's distribution platforms. We configure, deliver and install the vending machines at your site and take care of their complete management. Your employees can collect and return their materials themselves whenever they want to, 24 hours a day, 7 days a week.

WHY AN AUTOMATIC DISTRIBUTION

COST-EFFECTIVE

Cost-effectiveness is at the heart of every aspect of our services. The quality of our service and the creation of value for your company is our priority.

A better management and overview of items and off-take reduces inventory and associated costs. Orders of materials can be better estimated and superfluous products are detected faster. To measure is to know at S4M.

PROBLEM-SOLVING

Materials such as MROs, tools and personal protective equipment are often a major challenge when it comes to managing and distributing these materials.

We ensure that these materials are always available, functional and safe.

24/7 AVAILABILITY

S4M provides a 24/7 service. The automated system gives you an overview of your material management at all times.

We take care of the maintenance, replenishment, training, inventory management of your equipment on-site.

BRAND OR PRODUCT INDEPENDENT

Any article you want, regardless of brand or product, can be placed in the vending machine. You are not bound by our range of materials, but decide for yourself.

S4M

MAKING MATERIALS COUNT

ADVANTAGES

MANAGEMENT

- Is designed to be used specifically in industrial environments
- Can organize the return of materials
- Can be used for rental and/or temporary use
- Can monitor expiration dates
- Has access control at user and product level
- Offers extensive management and reporting tools
- Operates through a user-friendly web-based portal

LOAN ITEMS

- Optimal management (maintenance, inspection, certification)
- Your materials are always available, functional and safe
- Ensures more effective execution of work
- Right materials for the right application

CONSUMABLES

- At any time, an overview of consumption by product and user and stock across all sites. This insight allows you to reduce your inventory
- Registrations per user ensures the reduction of hidden stocks. If you are also responsible for the supply of subcontractors, you can easily chart their consumption.
- Saving on material return on investment

LOGISTICS

- Available 24/7
- Machines can be placed in different locations
- Ensures accelerated internal distribution
- All materials close to the workstation
- Material can be loaded into the machines
- All information of each user is stored (when was what borrowed)
- Less loss of material
