

# Magnetic coupling: The problem solver

## Advantages :

### - Maintenance—free

Less production loss

### - Alignment is less critical

No adjustment needed

### - Soft start

### - Overload protection

Without additional work

### - Vibration damping

### - No spare needed

Because of the permanent magnets in this induction couplers, we can transmit a torque without a fixed connection.

## To use with the following issues:

### - Alignments problems

### - Leaking oil

### - Synchronization problems

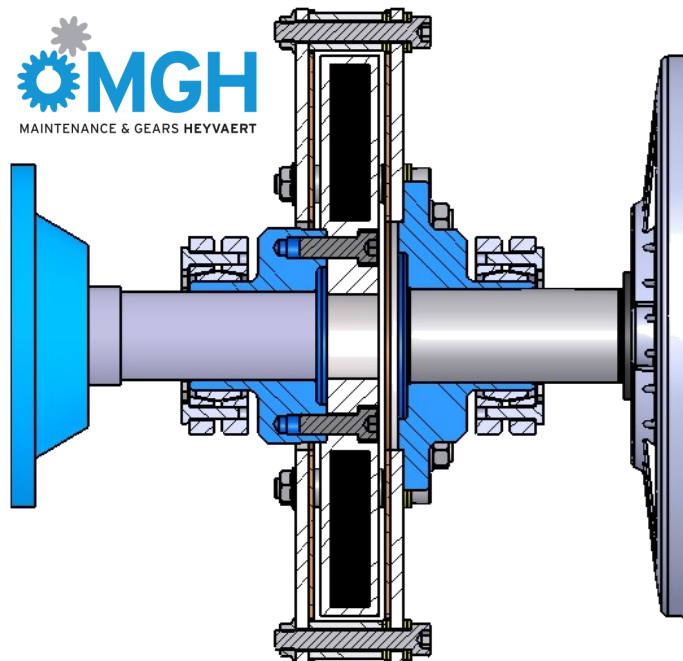

### - Maintenance shutdown

- ...

## Applications :

Belts conveyor—Elevator—Ball mill

Crusher—Synchronous transmission— Pumps—...
