

NetterVibration

Pneumatic Piston Vibrators NTK 8 S and NTK 18 AL EL

We understand hygiene and explosion protection

Clean, safe and stable

**Perfect for the food, chemical
and pharmaceutical industries**

Product innovations 2022

Serving industry with vibration

Suitable solutions for bulk material handling in the food, pharmaceutical and chemical industries

The requirements for **hygiene** and **explosion protection** standards are particularly high for production processes in the **food, pharmaceutical** and **chemical** industries.

With the **NTK 8 S** made of **stainless steel** and the **NTK 18 AL EL** made of **aluminium**, **NetterVibration** presents two new **pneumatic piston vibrators** from the NTK series that have been specifically developed for use in these industries.

Depending on the application, the new products are available as **ATEX-compliant** and/or **oil-free versions**. The stainless steel housing is resistant to aggressive cleaning agents.

Both NTKs can be used as drives for **conveying** and **sieve troughs**, as well as for **cleaning** and **emptying** of **hoppers** and other **containers**.
