

## Husqvarna CEORA™ RZ 43M

The tailor-made CEORA™ cutting deck, RZ 43M, features a cutting system with three blade discs. Totally 15 high-speed steel razor blades keep the turf at an excellent quality level. A Protection zone make that the risk for accidents where extremities touching the blades has been kept to a minimum. Easy maintenance and handling is possible by an ergonomic and unique service position, meaning the cutting deck can quickly be tilted for easy access to the blade discs or for hose washable cleaning (IPX5 classified).

### Waarschuwingslichten

Energiezuinige LED-waarschuwingslichten zorgen voor zichtbaarheid en vindbaarheid in duisternis en daglicht voor veilige operaties. De lichten kunnen worden ingesteld op vaste of knipperende configuraties en verschillende schema's.

### Service position

The cutting deck is easily moveable into vertical Service position, to facilitate regular cleaning and maintenance.

### Unique cutting system

The principle of the cutting system is based on the grass surface being mowed regularly. This means that each blade of grass is cut very little at a time but often, which guarantees a strong, nice-looking and healthy turf. The robust cutting discs are equipped with sharp razor-like blades made of strong carbon steel. This provides efficient operation and extremely low energy consumption.

### Cutting deck with Protection zone

The Protection zone is the area from the cutting deck's outer edge to the blade discs. The Protection zone minimizes the risk of accidents.

## FEATURES

- Equipped with sharp razor-like blades mounted on a robust cutting disc system for best cutting performance and low energy consumption.
- The cutting deck is easily moveable into vertical Service position, to facilitate regular cleaning and maintenance.
- Energiezuinige LED-waarschuwingslichten zorgen voor zichtbaarheid en vindbaarheid in duisternis en daglicht voor veilige operaties.
- The Protection zone is the area from the cutting deck's outer edge to the blade discs. The Protection zone minimizes the risk of accidents.
- Elektrisch bediende maaihoogte-instelling.
- Detecteert automatisch onbalans in het snijsysteem.
