

PREMIUM BEARING UNITS

QBS pillow blocks with solid base are suitable for higher loaded and heavy dust environments. The black cast iron housings have an insert in P6V2 quality. All bearings have standard double lip seal covered by a metal sheet shield. QBS mounted units are a good alternative for the well-known A-brands.

Standard seal

Triple lipped seal

Versions

- Solid base
- Quality level P6/V2 inserts:
 - P6: Tolerance field P6
 - V2: Vibration level V2
 - Low Noise
 - Chevron SRI 2 Grease
 - Shaft fixation by 2 sets screws
- Contact Seals with a standard metal cover:
 - **Standard seal:** NBR seals with a steel sheet which protects the seal from abrasive materials. Ideal labyrinth effective dust proof properties.
 - **Triple lipped seal:** Steel shield protection of the NBR triple-lip seals which provides excellent dust- and waterproofing contamination.
