WHY GEN250 FlowBox?

CONTENT PROTECTION

- Secure waterfall edges keep rain and contaminants out of the box
- High center and sloped flat areas help water run off the lids versus pooling in the middle
- Lids are easily secured with lid locks or zip ties

LATERAL TOP RING REINFORCED

- Improved lateral support braces or cross-members
- Thickened to provide better strength
- Easy to clean undersides
- Improved attachment points to the sidewalls of the ring (top half of box)

LARGE DISCHARGE OPENING

- Large, 10.7"x 8.1" centered opening
- Fast and safe discharge of flowable contents
- Open / close slide gate to activate

IMPACT-PROTECTED CORNERS

- Black, powder-coated metal hit plates on slide gate side of box for quick identification of slide gate side
- Four (4) mounting screws secure strongly to box to protect against forklift and other impacts

STACKING CAPABILITIES

Secure stacking indents on the base align easily with the corner stack edges on the lid

DOCUMENT HOLDERS

- Two improved, jacket-style black zippers along with reinforced seams
- Magnetic clasp folder with improved clarity

TOP HALF LOCKING HANDLES

- Eight (8) locking handles with industry-strength design
- Improved latch engagement tab to secure top half of box to base

SLIDE GATE LATCH AND DISCHARGE OPENING

- One-hand operated slide gate allows for easy discharge of contents
- Contents discharge in under a minute
- Slide gate latch lockable with a zip tie

HARDWOOD BOTTOM DECK BOARDS

- High quality hardwood anti-slip bottom deck boards for secure movement while using forklifts or pallet jacks
- Chamfered edges for reduced wear

CENTER FUNNEL INTERIOR

- Unique-angled interior of bottom half for fast and clean discharge
- Closeable center discharge opening allows for metering product out the bottom

BASE WITH FOUR-WAY ENTRY

Four-way entry bases with easy access via forklifts or pallet jacks

INDUSTRY-LEADING TRUCKLOAD CAPACITY

FIT 66 BINS
PER 53' TRAILER

FEATURES:

- Contents weighing up to 2500 lbs empty out in 30 seconds
- Safely stack up to four (4) containers high at 2500 lbs
- Secure-locking attachment point of the mid-section to the base
- Product flows from the bottom when pulling slide gate out
- Angled supports to reduce screw boss cracking
- Stronger four-hole hit plates less prone to damage
- One-degree draft angled ribs to prevent pooling water
- Ergonomically designed ring latches with finger recesses and longer engagement tabs
- Easy-to-identify slide gate side with black-colored, four-hole corner hit plates
- Metal U-plate behind the slide gate rails to prevent product from getting trapped behind gate
- Larger grid patterns on the bottom runners to reduce mud and rocks from getting stuck
- Improved lid lock security tie hole for easier installation and removal

The **GEN250® seed box** offers a robust, rigid design with the same seed capacity as the older-designed container, plus features a more efficient and easy-to-use packaging solution for flowable products.

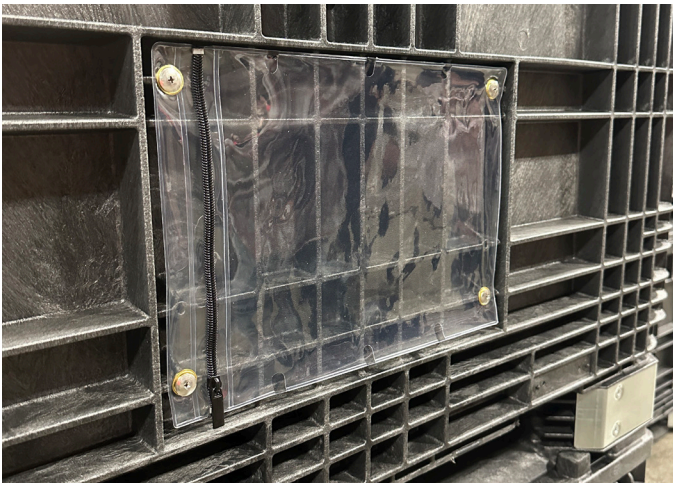

The fully reusable GEN250 cuts freight costs and interfaces seamlessly with your existing fleet of center discharge containers, while providing system-wide improvements in maintenance and handling. The streamlined bin design holds the same seed volume while offering better truckload efficiency.

GEN250 is built for a long service life and environmentally-friendly product handling. The containers collapse and stack securely together, minimizing storage needs and increasing transportation efficiency.

- Completely recyclable
- Molded with recycled materials
- Water-resistant with a securable plastic lid
- Made from high-density polyethylene
- 100% stack-and-nest compatible with existing containers
- Forklift and pallet-jack compatible
- Offers 50% more empty bins per return trip
- Improved sustainability, reduced carbon

FEATURES AND BENEFITS

Document Holder

Improved Hardwood Bottom Deck Boards

4-Hole Metal Corner Hit Plates

Caution Label

Securable Lid Design

Securable Slide Gate Latch

Slide Gate for Discharge of Contents

COLLAPSED BIN TRAILER CAPACITY

Alternative Bin

GEN250 Bin

STACKED BIN TRAILER CAPACITY

Alternative Bin

GEN250 Bin

Max out 53' trucks while shipping 50% more GEN250 seed bins per return trip.
Shippers can fit 66 empty GEN250 bins per truck, versus 44 alternative bins
