YUU SPRING

2025 Second version

Company Profile

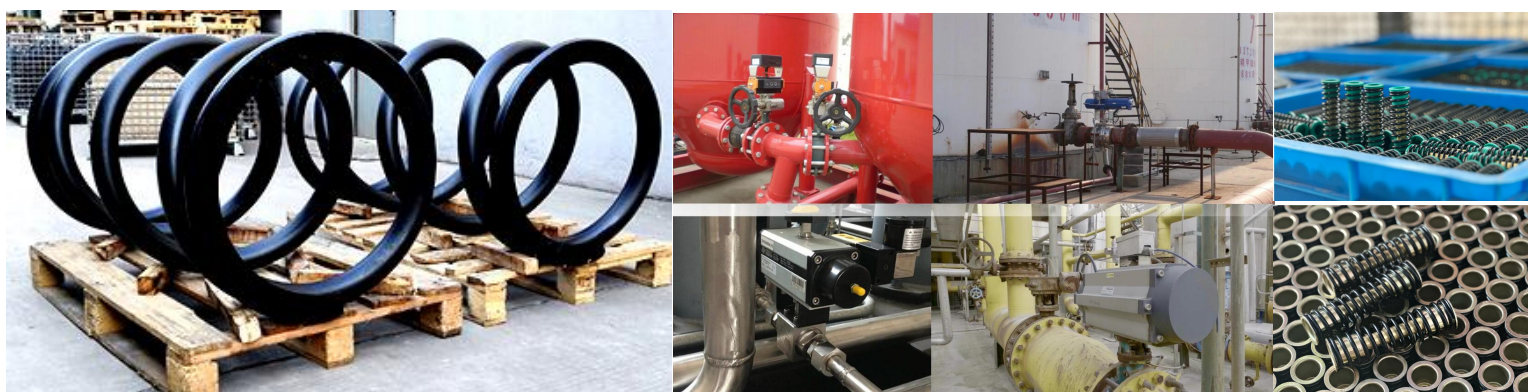

WEB: <https://www.yuu-spring.com>

Our company is located on the banks of Taihu Lake, in the picturesque tourist city of Wuxi. Situated in the Yuqi Industrial Concentration Zone of Wuxi Huishan Economic Development Zone.

Founded in 1996, after nearly 30 years of continuous development and improvement, we have rich spring design and production capabilities. We currently have 100 sets of CNC spring processing equipment, production equipment, and testing equipment imported from multiple countries. We use imported high-quality raw materials and strictly implement the ISO9001: 2015 and IATF 16949:2016 management systems to achieve lean production. We have a comprehensive testing center and introduce advanced testing equipment such as hardness testers, imaging machines, tensile and compressive testing machines, and fatigue testing machines to provide customers with excellent product quality assurance.

Committed to supplying high-quality springs to professional executive institutions and leading valve benchmark enterprises, striving to become a trusted global brand for valve springs.

In good faith, high quality, mutual benefit, the company will continue to expand with more domestic production, support, distribution, enterprise cooperation and common development hand in hand! Crafting each spring with dedication, daring to think and act, ensuring worry-free experience for our customers.

Main products and output value in the past three years

We specialize in the research and production of actuator springs, control valve springs, waveform springs, disc springs, snap springs, mold springs, diaphragm covers, high-temperature springs, safety valve springs, Stamped and injection molded parts etc.

Main qualification certificates and resumes

High quality material selection/Professional production equipment/ Ensuring product quality and stability

1. Serve over 150 actuator and valve manufacturers worldwide with dedication
2. Annual production of 6 million pneumatic actuator springs and 60 million other types of springs
3. The connecting rod is made of high-quality H62 copper tube (304 stainless steel tube), which is ultra long and corrosion-resistant
4. Advanced epoxy electrophoretic coating treatment on the surface, with a coating thickness of up to 25um, passing 300 hours of salt spray test.
5. The company has invested over 30 million yuan to purchase precision CNC equipment.

Qualification certificate

After continuous development, the company has also achieved certain honors, passing the ISO9001:2015 quality system certification and IATF16949 automotive industry quality certification System certification. Received honorary titles such as "Jiangsu Province Science and Technology oriented Small and Medium sized Enterprise" and "Wuxi City Innovative Small and Medium sized Enterprise". "National High tech Enterprise".
