

BEE LIGHT

CLEAN ROOM LIGHTING SOLUTIONS

Who we are Where we are going

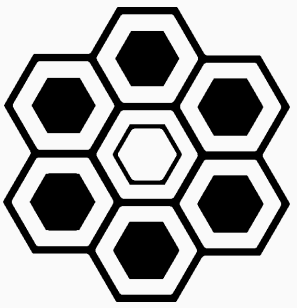

**Experience, Team, Quality,
Ecology**

Bee-Light is a team of professional lighting experts, people who are incredibly dedicated to their passion for creating lighting solutions. Bees symbolize our employees, who are experts with an incredibly long experience of several years. Hard work, extraordinary diligence, great ambition, constant desire to improve and develop are the features that distinguish us. As a group of specialists in the lighting industry, our mission is to provide professional service and advice on choosing the right solution that not only meets but exceeds expectations. To meet expectations we have teams of designers throughout the country to have the opportunity to personally consult the project. Light and the concept of living and working in harmony with nature inspired us to create a brand in which we focus on science, development, ecology and respect for our planet and environment.

Production in Poland

Our solutions are designed and
manufactured in Ostrowiec
Świętokrzyski

Customization of solutions

DNA Bee-Light ...

At our company we are passionate about light and everything related to it. Behind our products stands an extremely talented and experienced team of professionals in the field of lighting technology. Bee-Light is not just a ready-made solution. Do you need advice on choosing a solution? Do you want us to create a solution just for you? Our engineers will be happy to prepare a design and 3D model for you.

Clean Room Solutions

ROSE

ROSE ISO

The luminaire is designed for spaces with an approved air cleanliness class from ISO 3 to 9 according to ISO 14644-1:2015

ROSE MED

ROSE MED is a sealed luminaire, designed for rooms with increased requirements for cleanliness. Special, certified anti-microbial varnish coatings are used, which guarantee no growth of bacteria, fungus, mould cultures on the luminaire.

ROSE MED

We use LEDs with a color rendering index CRI>95 (with particular attention to the R9 and R13 spectral components, which fully render the color of human tissue and blood)

ROSE PRO

ROSE PRO is a sealed luminaire for clean rooms. The latest generation of LEDs with light efficiency $>190 \text{ lm/W}$ guarantee the most energy efficient solution available on the market. The lifetime of LED sources enables 35 years of work at 8 hours per day.
