

LIANOL: THE NATURAL START!

BASDIAR IS PART OF THE LIANOL 5 STEP PIG CONCEPT

①	②	③	④	⑤
FERTILITY sow	FARROWING sow	BIRTH piglet	FARROWING PEN piglet	WEANING piglet
Higher farrowing rate and more uniform piglets	Smooth birth of vital, heavier piglets	More energy and extra immunity right after birth	Good gut development and digestion from day one	Healthy gut around weaning

Lianol 5 step Pig Concept is an innovative feed approach from Ardol.

FARROWING HOUSE

GOOD GUT
DEVELOPMENT AND
GOOD DIGESTION
FROM DAY ONE

GOOD PROTECTION AND RAPID GUT DEVELOPMENT

The clay minerals and algae promote the piglets’ rooting behaviour.

Colostrum and sow milk are the best and cheapest feed for a piglet. Essential for smooth development. It is also important that the piglets’ gut is prepared for weaning. Lianol basdiar has been developed specifically for this purpose.

Lianol basdiar is a 100% natural, tasty, non-perishable pig feed. A supplement to sow’s milk, which quickly teaches EVERY piglet to eat plant-based feed through natural rooting behaviour. It contains special building blocks for good protection and rapid gut development. This promotes the digestion of colostrum and milk and therefore results in better growth.

The faster and better gut development with Lianol basdiar not only promotes efficient digestion, it also provides better protection against intestinal infections by strengthening the immune system.

Lianol basdiar in the first week of life:

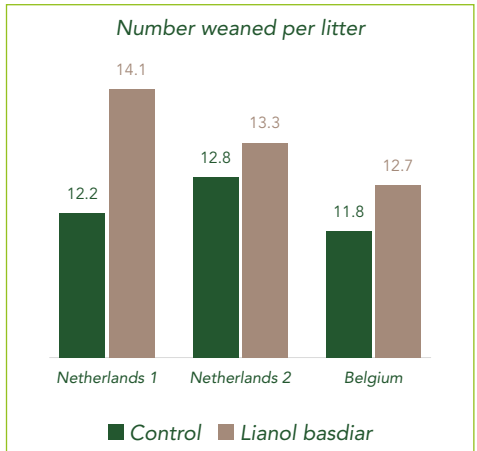

- teaches all piglets to eat
- prepares the gut for plant-based feed
- reduces mortality before weaning
- binds endotoxins and is a natural source of iron
- provides good gut protection

Lower mortality

Measured variable: BE: 683 NL: 21,958; ES: 29,312

More weaned piglets

Measured variable: NL1: 16,198; NL2: 32,017; BE: 683

Clay minerals and algae

Lianol basdiar and Lianol 2wean contain specific clayminerals and algae. These ingredients accelerate the development of the young gut and improve digestion by protecting the gut from germs and toxins, increasing feed absorption capacity, and slowing down passage of the feed.

USE OF LIANOL BASDIAR

Lianol basdiar is a powder that is mixed with water.

Use:

- Day of birth: 200 ml solution per litter per day (dose: 100 g in 1 litre of lukewarm water).
- Day 2-7: slowly increase the volume to max. 1 litre per litter per day.
- Day 7-10: Mix Lianol basdiar with increasingly more creep feed; allow feed bowl to be emptied daily.
