

DRESSED

For Success

ALL-IN-ONE SOLUTION

Combine swivels, swivel tool changers, CiRo, hose packages, and preconfigured valve units into one complete system – fully matched and ready to install.

QUICK TO DEPLOY

Save valuable time with pre-configured systems tailored for your specific robot model, with quick installation time. Fast setup means faster production.

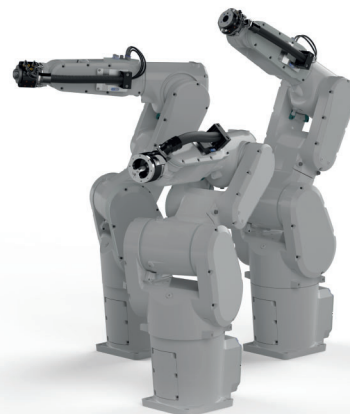

BUILT TO WORK TOGETHER

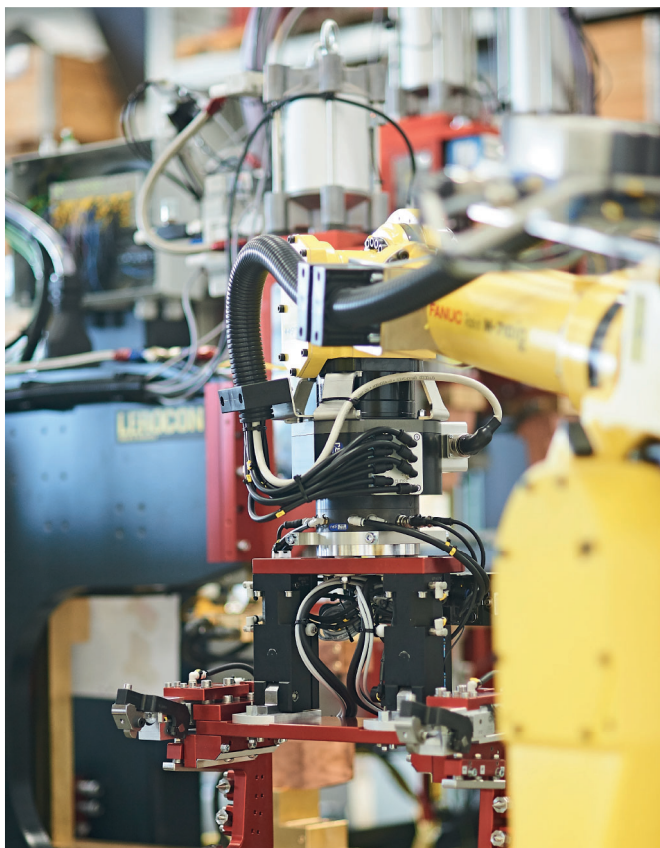

All components are designed to integrate seamlessly, ensuring maximum performance, safety, and uptime in demanding environments. Maximum versatility.

READY TO PERFORM

RSP tool systems combine everything your robot needs for high-performance automation. With a complete, pre-matched setup, you save time on installation – and gain in uptime.

Each tool system is tailored to fit your robot model and application. We combine tool changers, hose packages, and swivels into one robust, fully integrated solution. Designed to be robust, efficient, and easy to maintain, our tool systems minimize installation time and reduce long-term maintenance. Whether you work with ABB, Fanuc, or Yaskawa robots, we have the complete system to boost your productivity from day one.

READY, SET, PRODUCE!

"We like to work with fully developed components to avoid having to reinvent the wheel each time."

- Daniel Erlandsson, Lerocon

Automation of nut and bolt welding is Lerocon's speciality. Customers are primarily in the automotive industry. The product portfolio includes resistance welding and part feed using vision systems. Robot System Products supplies tool systems, complete with cable packages and valves.

As a system integrator, Lerocon takes responsibility for the entire chain, something customers appreciate and long-term customer relationships are important. Their customers are mainly in the automotive industry, and include Volvo Trucks and Scania.

Regarding RSP:s tool systems they state that it's about making things easier, avoiding separate installation of each component.

END-OF-ARM UNIT

PRE CONFIGURED VALVE UNIT

COMPLETE HOSE PACKAGE

ROBOT INTERFACE CONNECTIONS

YOUR END-OF-ARM SELECTION

Our pre-matched tool systems can be selected with the end-of-arm unit you prefer. This is to validate the functionality of the hose package installation.

WE ARE ROBOT SYSTEM PRODUCTS

RSP stands at the forefront of the industrial automation industry as a renowned global leader in delivering cutting-edge solutions for enhancing the performance and versatility of industrial robots. Our cutting-edge solutions empower you to optimize your robotic systems for maximum performance and efficiency, positioning you at the forefront of modern manufacturing.
