

Individual Solutions

Are you looking for more than just a standard product? As a leading solution provider for waterproof switches and connectors, we will be happy to help you. From pre-assembled connectors to individually laser-marked push-buttons, we can provide you with a product tailored to your requirements - even labelled and packaged according to your specifications.

Our Services at a Glance:

- **Cable assembly:** Customised cables and connections for ideal performance and a perfect fit
- **Laser marking:** Precise, permanent labelling of products and components
- **Overmoulding:** Increased durability and safety in demanding environments thanks to protective overmoulding
- **Plastic injection moulding:** Precisely manufactured plastic parts for a perfect fit and functionality
- **PCB assembly:** Electronic precision through manual soldering, automated assembly, automatic optical inspection (AOI)
- **Packaging:** Safe and attractive packaging solutions for transporting and presenting products
- **Labelling:** Clear marking for easy product identification and information transfer
- **Printing:** Customised design of products and packaging in premium quality

Our experts are here to help you turn your vision into reality. Contact us today to find out how Engelking can realise your individual requirements.
