

Customer satisfaction at the click of a button: The ultimate configurator!

About CONFIGON

CONFIGON is an installation-free product configurator, that enables you to configure your complex products easily and error-free in 2D/3D.

Why companies choose our product configurator:

- ✗ Intuitive 3D configuration via drag & drop – even from the comfort of your sofa.
- ✗ Independent article and rule maintenance via a single tool, without programming knowledge.
- ✗ Exporting the configuration into 100+ native CAD/CAE/BIM formats is possible.
- ✗ Creates quotations, generates production data and transmits the order.
- ✗ Developed by a team that is on hand with quick and uncomplicated solutions.

More than Configure Price Quote (CPQ)

Our product configurator optimises the entire process from planning and quotation to production:

Reduce complexity

The user is guided intuitively through options and clear steps to the customised product. Depending on the selection, suitable items are filtered and accessories are suggested.

Create documents efficiently, optimise processes

The relevant documents such as quotations, parts and price lists and scaled drawings are created automatically.

Increase customer satisfaction, avoid errors

Plausibility checks prevent faulty configurations. If something does go wrong, the user receives information on what's happened and troubleshooting solutions / quick fixes.

Reference:

WAGO Kontakttechnik GmbH & Co. KG

Our 3D online configurator enables WAGO customers and employees to configure WAGO components error-free. Users can easily configure directly in the browser. Here are a few highlights at a glance:

1

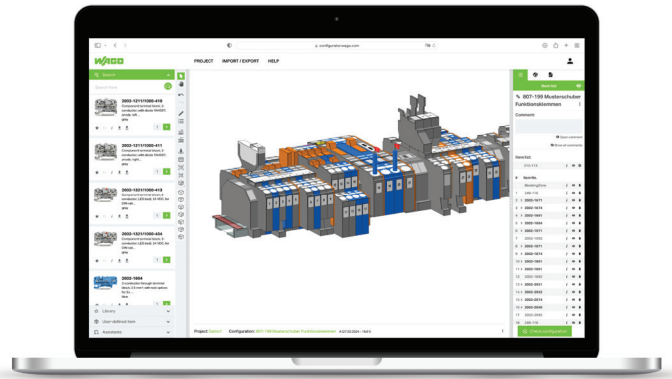

Very detailed plausibility checks based on mathematical, logical, electrical and mechanical rules.

2

85 % of configurations are produced without post-processing. All data, e.g. for PLM and ERP, is generated at the click of a button.

3

Seamless integration into existing systems (CAD, CRM, ERP, etc.) and direct ordering capability.

„With the WAGO Smart Designer, our customers can easily and intuitively assemble WAGO components and check the configuration. Together with the Resolto team, we can respond flexibly to specific requirements.“

Simone Brinkmann-Tewes

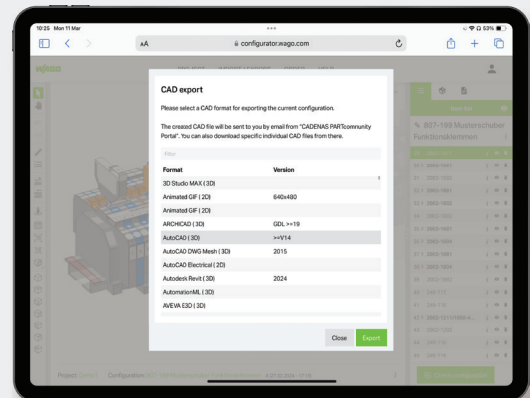

Leitung smartDATA Engineering, WAGO Kontakttechnik

Revolutionising data export:

CADENAS X CONFIGON

By integrating the CADENAS multi-CAD interface, every configuration can be exported into 100+ native CAD formats, simplifying the digital configuration of customised products. Our configurator automatically generates the required BIM, CAE and CAD data in the appropriate format – without import problems and post-processing.

Does CADENAS already maintain your data? CONFIGON can use this data to create your configurator faster. The design details remain hidden and the data is protected.

Next step:

Let's get talking!

Do you want to start your product configurator project or are you still unsure whether you could benefit from a product configurator? Find out more about your options and advantages. Let us assist you personally and without obligation advice – get in touch!

CONFIGON is a product of Resolto Informatik GmbH.

A member of the Festo group.
