AI Vision Made Easy:
Smarter Detection, Simple Setup

Ever given up automating a defect inspection due to cost and effort?

Difficult to configure/adjust

Can't figure out which processing items to use.

Expertise is key to achieving accurate results.

Limited to high-cost options

Simple inspections shouldn't require a big budget.

Smarter automation made easy with OMRON's AI Detection Camera.

Easy setup by simply following the guide.

Easy configuration, no expertise required

All-in-One lighting and lenses for effortless selection

**Smart Value, Smarter Vision**

Powered by AI

Setup completed in just a few minutes

Intuitive UI for effortless use

The AI Detection Camera is so intuitive that even first-time users can set it up. Just follow the on-screen steps and configure it in a few clicks.

Select inspection content

Simply select from three candidates

Presence Detection	Product Type	Defect Check
OK/NG judgment by item presence	OK/NG judgment by product type	OK/NG judgment by defect detection

Record images for learning

Simply record images for learning, and sort them to OK / NG folders

OK

NG

Start Learning

Simply click the "Start Learning" button

Start Learning

Done

New Self-learning AI that can be used with zero AI skills

## AI itself selects the right images to learn

Conventional AI

For AI to make proper judgments, it's critical that you teach it the right data. With conventional AI, it's up to humans to select the images to teach, which requires skills for identifying such images. Also, repeated additional learning can take days.

One whole day to a few days

New Self-learning AI

All you need to do is provide it with just a few images, and the right ones will be selected automatically to achieve zero overdetection through accurate judgment.
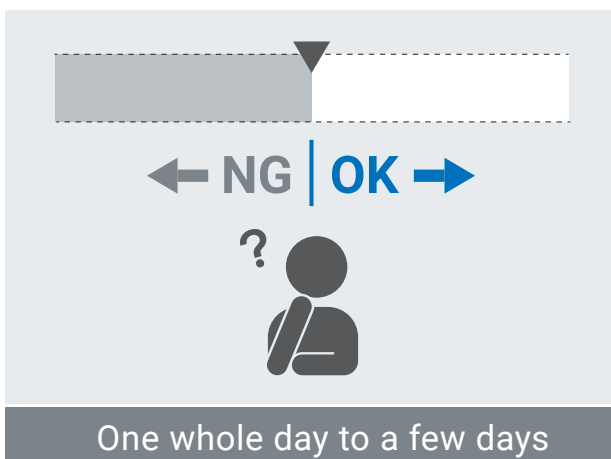

A mere few minutes
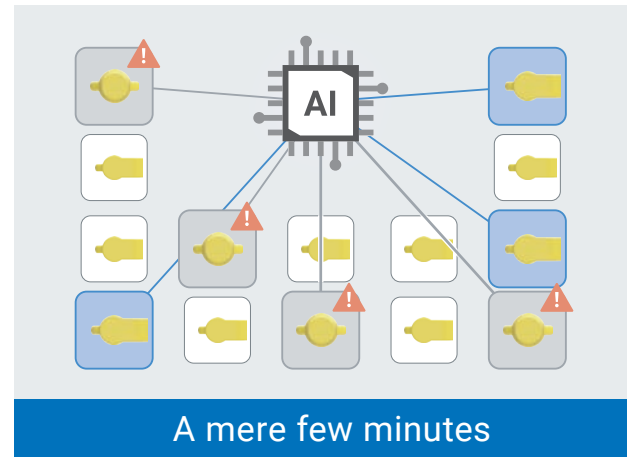

*Detection rate is that of images provided for learning.

AI itself sets threshold values

Conventional Vision Sensor

Teaching conventional AI to correctly distinguish between OK/NG for products requires testing repeatedly while fine-tuning threshold values. This can take days to complete.
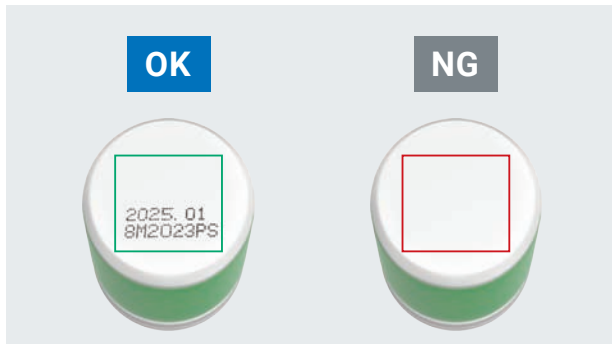

← NG | OK →

One whole day to a few days

New Self-learning AI

AI automatically sets threshold values based on the distribution of learning results.

Applications

Presence detection

Printing on food containers

Assembly components on molded products

Orientation detection
Orientation of component positioning/placement

Front/back detection

Front/back of machine components

Type detection

Incorrect cap types for tube containers

Simple defect detection

Pre-shipment inspection of dents in cardboard

Usable in a wide range of settings

Robust structure

IP67 waterproof structure

IP67 compatible to allow use in wet conditions, such as regular wash-downs at the sites where the cameras are installed.

High-mix production

Easy switching with autofocus

Autofocus lens lets you perform changeover just by switching your condition settings,* even in high-mix production of items of varying sizes.

Configuration operations

From your PC

You can download the software for free after purchasing the product and signing up online.
For details, see the member registration sheet included with the AI Detection Camera unit.

Operation via touch panel monitor

You can use the touch panel monitor by installing the software for AI Detection Camera. You can download the software for free after purchasing the product and signing up online.
For details, see the member registration sheet included with the AI Detection Camera unit.

Smart Camera Data Unit

Item		Parallel interface
Model		FHV-SDU10
Input/output specifications	**Parallel I/O**	Input: 12 Output: 24 (NPN/PNP combined use)
Smart Camera Interface		Special cable to connect No. of connectable cameras: 1
Indicator	**Main**	POWER: Green, ERROR: Red, RUN: Green, BUSY: Green, CAMERA: Yellow, OR: Yellow
Power supply voltage		21.6 to 26.4 VDC (Note: 24.0 to 26.4 VDC when a data unit cable with 20 m is connected.)
Insulation resistance		Between DC terminal block and FG terminal: 0.5 MΩ (250V Megger)
Current consumption		4.5 A or less
Usage environment	**Ambient temperature range**	Operating: 0 to +50°C, Storage: -25 to +65°C (with no icing or condensation)
	Ambient humidity range	Operating and storage: 35 to 85%RH (with no condensation)
	Ambient atmosphere	No corrosive gases
	Vibration tolerance	Oscillation frequency: 10 to 150 Hz, Half amplitude: 0.1 mm, Vibration direction: X/Y/Z, Sweep time: 8 minutes, Sweep count: 10 times
	Shock resistance	Impact force: 150 m/s^2, Test direction: 6 directions, Three times each (up/down, front/behind, left/right)

	Noise immunity	Fast transient burst
		• DC power
		  Direct infusion: 2 kV, Pulse rising: 5 ns, Pulse width: 50 ns,
		  Burst continuation time: 15 ms / 0.75 ms, Period: 300 ms, Application time: 1 minute
		• I/O line
		  Coupling clamp: 1 kV, Pulse rising: 5 ns, Pulse width: 50 ns,
		  Burst continuation time: 15 ms / 0.75 ms, Period: 300 ms, Application time: 1 minute

	Grounding	Class D grounding (100 Ω or less grounding resistance) ✽ Existing the third class grounding
External shape	**Dimensions**	H (90 mm) × W (93 mm) × D (65 mm)
	Weight	Approx. 250 g
	Degree of protection	IEC60529 - IP20
	Case material	PC+ABS, PC
Accessories		• Instruction sheet: 1 • Compliance sheet: 1

Recommended Operational Environment for PC Software Remote Operation Tool

Name	Description
CPU	Intel Pentium Processor (SSE2 or higher, supports AVX2)
OS	• Windows 10 Pro (32/64-bit) or Enterprise (32/64-bit) • Windows 11 Pro (64bit) or Enterprise (64bit)
Memory	8GB (16GB or more recommended)
Hard disk space	2GB or more
Display	Resolution: 1280 x 800 dots or more Color: True Color (32-bit)
Network	10BASE-T (100BASE-TX recommended)

Using the PC Software Remote Operation Tool requires Microsoft .NET Framework 3.5 installed.

Parts and Names

| No.	Name		Description
1	Imaging unit		Captures images.
2	I/O cable connector		Use this connector when connecting the smart camera with a power supply or an external device using an I/O cable. Dedicated I/O cable: FHV-VD(L)B2 ☐☐M
3	Ethernet cable connector		Use this connector when connecting the smart camera with a personal computer and so on using an Ethernet cable. Dedicated Ethernet cable: FHV-VN(L)B2 ☐☐M
4	External lighting connector		Use this connector when connecting an external lighting and the external lighting controller. This product does not support connecting to external lighting.
5	Connector to attach microSD card		Use this connector to attach a microSD card. Do not extract/insert the microSD card during processing. Otherwise, measurement time may be influenced or data may be broken.
6	Operation indicator	PWR (Green)	Lights while power is supplied.
		RUN (Green)	Lights when switching to the layout in which the RUN signal output is set ON.
		LINK (Yellow)	Lights when connected with Ethernet equipment and blinks during communication.
		BUSY (Green)	Lights while processing is in progress.
		OR (Yellow)	Lights when the overall judgment output signal is ON.
		ERR (Red)	Lights when an error occurs.
7		SD ACCESS (Yellow)	Lights when accessing to the microSD card.
8	Mounting screw holes		Use them to screw up the smart camera. Recommended tightening torque: 2.3 N·m

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.
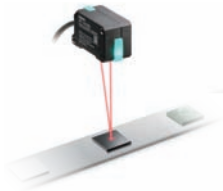

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

OMRON's Vision System product lineup

High ← Performance/cost → Low

FH series
OMRON's flagship vision system series that delivers supreme accuracy, speed, and functional diversity. A single unit can provide 360-degree coverage—including of scratches, contamination, dimension, OCR, and even AI.

FHV7 series
High-precision smart cameras that integrate lens, lighting, and image processing. High resolutions of up to 12 megapixels and auto optimization ensure sound operation, even in high-mix, high-speed production lines.

FQ2 series
These palm-size cameras are easy to set up, perfect for first-time image inspections. They can be quickly used for presence, position, print, and other simple inspections.

Detect by Height

ZP-L series
Stable detection with initial configuration left intact.
Suitable for inspection/detection of around 10 μm to 1 mm.

Height/Thickness	Positioning/Control	Shape/Curves
Stroke/Deflection	Joints/Counting	

Note: Do not use this document to operate the Unit.
