elunic®

Measurable AI Automation for Industry

with the AI Automation Score.

Obstacles in AI projects

Over 70% of AI initiatives fail to achieve their goals and are perceived as disappointing. Companies rely on chatbots and other tools that remain unused. Incorrectly distributing roles between AI and experts leads to inefficient processes. This results in valuable resources being wasted while the potential of AI automation remains untapped.

How elunic supports you:

No more ignored chatbots! Our solutions integrate into your workflows: AI guides, experts decide.

- ✓ **Test your potential** in a safe environment, without risk
- ✓ **Calculate the ROI** before the first euro
- ✓ **Preserve your expertise** systematically and permanently
- ✓ **Start with a pilot** and scale up according to your plan

without elunic	with elunic
experts under daily stress	focus on value creation
tedious search for information	answers in seconds
know-how gets lost	knowledge stays in-house
no success measurement	documented metrics

40%
faster information-access

85%
knowledge work automated

100%
measurable results
