

# Peltier Dehumidifiers

Protects against corrosion and machine failures by preventing condensation

DR. NEUMANN

TECHNIK  
**Peltier**

IP67 Protection

Removes up to 750ml of condensate per day

Also available as compact version

Integrated control unit

## Efficient dehumidification to protect your components

**Dehumidification solutions** for enclosures protect your components from condensation in humid ambient conditions.

From **plug & play** products with **IP67 protection** for industrial applications to miniature solutions for the integration in **OEM applications**, our devices work **efficiently and reliably** to protect your equipment from condensate-related corrosion and machine failures.

Our Peltier housing dehumidifiers are optionally available in a **salt-fog resistant** version or with an **integrated pump** for active condensate drainage.

# Peltier Dehumidifiers

Protects against corrosion and machine failures  
by preventing the formation of condensation

- 1** Integrated control unit
- 2** Optional Pump
- 3** Additional air circulation
- 4** High dehumidification capacity
- 5** Various hood options
- 6** IP67 protection

**NEW  
SERIES  
2026**

## Plug- & Play dehumidifying solutions

Peltier dehumidifiers from the **PSE series** not only ensure **efficient dehumidification** of your application, but can also be integrated into existing systems as a plug & play solution thanks to their **integrated control unit**. The dehumidification performance is optimized by accessories such as **ventilation attachments**, **hygostats** and **active condensate removal** by means of integrated pumps.

**New** in our range are also **drainage elements** which, in addition to the safe removal of condensate, also provide **pressure equalization** as well as other accessories.
