

Meet the new LA21 actuator

## Powerful beyond size

”

Our products demand extremely compact solutions, and the LA21 actuator delivers exactly that. It is both strong and fast, and most importantly, it has halved our cycle time – a huge advantage for our customers.

Says **ROEQ**, who has already included the LA21 into their products

about the **NEW**  
LA21 actuator

## Fits where others don't

Meet the **NEW LA21** - the compact and powerful electric actuator that redefines what's possible in tight spaces:

- Fastest in its size class
- Low backlash & high position resolution
- Engineered for tough environments

The choice is yours - **straight** or **angled cable options**

Instant **visual feedback**

Designed for machine builders who are done with compromises.

## Built to perform

**Slim design** - Fits tight spaces with angled cable options

**Strong performance** - Up to 3,500 N force, up to 85 mm/s speed

**Built to endure** - IP66/IP69K rated for harsh environments

**Flexible setup** - Stroke length up to 800 mm, multiple mounts

**Smart control** - Supports intelligent feedback systems

**Durably built** - Metal gears, integrated brake, robust housing

**Quick diagnostics** - LED indicators for instant status
