## This is ShopfloorGPT:

ShopfloorGPT automates tasks, makes knowledge accessible, and relieves your teams – **without creating new dependencies**.

The software recognizes, structures, and automates knowledge work – from service tickets to technical documentation.

Employees gain valuable time, **processes become transparent, knowledge is preserved.**

A central interface connects your systems, data, and employees – **simply and securely.**

Trusted by leading companies from mid-sized businesses to corporations:

BOSCH

GEA

SYNTEGON PROCESSING & PACKAGING

Waygate Technologies a Baker Hughes business

schenck process

ENVISION

WINDMÖLLER & HÖLSCHER

weber®

komax

AMMANN

Trust through collaboration:

Manufacturing AI
Certified software
ShopfloorGPT

ShopfloorGPT

Knowledge that starts in the office and works at the machine.

elunic®

How ShopfloorGPT works:

1

Recognize:
ShopfloorGPT identifies recurring tasks in everyday work.

2

Structure:
Data from tickets, documents, and communication are made available as a digital knowledge twin.

3

Delegate:
Self-learning AI agents automatically perform tasks – e.g., requirements specification reviews or service report analyses.

4

Integrate:
ShopfloorGPT connects existing systems, tools, and communication channels.

Personal guidance for your success:

Our experienced team **personally and practically** guides you in implementing ShopfloorGPT – from analysis to implementation.

With deep industry knowledge, we develop a solution that fits your requirements – **for measurable results.**

ShopfloorGPT in practice:

Experience how ShopfloorGPT solves real challenges. An overview of your possible **entry points**:

Service reports with AI
Automatically created. Ready for immediate use.

Requirements specification review with AI
Identify contradictions. Gain clarity.

Spare parts ordering with AI
Recognize needs. Trigger orders.

Customs verification with AI
Check embargoes. Avoid risks.

Why ShopfloorGPT:

Knowledge preservation: Knowledge is retained – even when experienced employees leave the company.

No new dependencies: full source code access, no vendor lock-in, on-premises or as a cloud solution.

Industry focus: Specially developed for mechanical engineering, production, and service processes.

Seamless integration: Connection to existing tools like Microsoft Teams, Slack, SAP, SharePoint, etc.

Quick results: minimal training effort, directly measurable relief for your teams.

Future-proof knowledge work: A digital assistant that continuously learns – customized and scalable.
