## ROXDUR Unique Wear Material

ROXDUR is a wear plate product that utilises the latest technology to provide a long lasting and durable wear solution suitable for heavy duty and medium duty applications.

ROXDUR uses a unique composite material that combines cemented carbide and an iron matrix to create an impact absorbing wear plate that reduces downtime requirements & extend the life of conveyor components.

CUSTOMISED  
SOLUTIONS

IMPACT  
ABSORPTION

20 X LONGER  
WEAR LIFE

### Welding Segments

- Low weight, fast and safe installation
- Perfect alternative for area's with difficult access, or curved surfaces
- Can be patterned in groups to protect large areas

### Edge Liners

- Reinforce high wear edges
- Protect chute walls from impact
- Optimal solutions for boxes
- Fast install

### Wear Plates

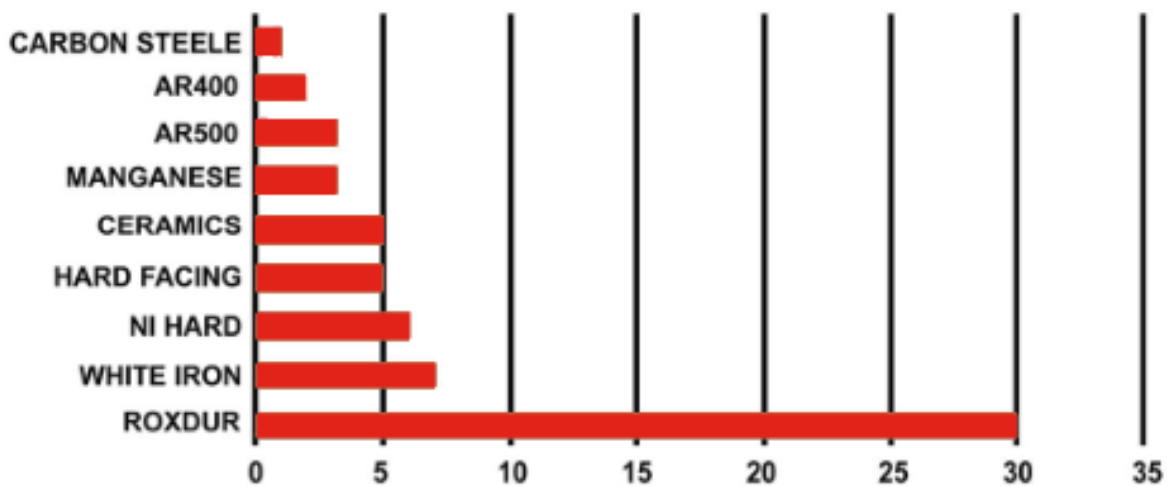

- Custom and standard sizes available
- Preformed inserts for unique wear problems
- Heavy and medium duty applications with impact and abrasion

## LKAB SVAPPAVAARA

"LKAB is more than pleased with the improvements that ROXDUR has provided in this application"

Material 5 - 20mm, iron ore  
Drop height of 2m  
Extended life by 16 months  
Liners installed after 11 months

### ROXDUR Performance

Typical performance of ROXDUR vs other common wear materials.
