

OPDPRO.CARE

We make your production future-proof!

Our mission at OPDPRO.CARE is to make your production processes more efficient, more transparent, and more sustainable.

With our value stream architecture without vendor lock-in, we connect AI with your team and make intelligent, data-driven production possible.

With our demo, you experience live how our digital solution creates real added value for you in practice.

up to 24.3% higher cost savings

Creation of a central data basis

up to 13.7% higher efficiency

better collaboration for greater motivation

Transparency that builds trust – from raw materials to final delivery

value stream

EDGE AWARDS
Winner 2025

Bundesministerium
für Bildung
und Forschung

"Future-proof production only emerges when people, machines, and data work in harmony. That is exactly what I stand for – this is our vision."

FROM IDEA TO FULLY OPERATING SYSTEM

From digital vision to practical and modular solution. We stand by your side as a partner in every phase of development.

- Consulting and trainings
- Control, visualization, and automation
- Support and service
- Customized add-ons

With the digital twin, we seamlessly integrate IT and OT data – flexibly in the cloud or on-premise.

KEY STRENGTHS

Together with you, we analyze your processes, uncover potential, and define your requirements – leveraging over 55 years of expertise.

Engineering

From process planning and quality management to electrical engineering, sensor/actuator integration, and product development – including modernization and retrofitting of existing plants.

IT

Connecting third-party software, databases, web applications, and networks – enabling the intelligent orchestration of your systems

OT

PLC & SCADA programming, interfaces, security technology, and network support

Digital twins

App development and edge platforms for modern, integrated industrial applications

SERVICE

Real-time data, predictive maintenance, and reduced downtime – making efficiency truly scalable. With our service, we support you personally across the entire lifecycle.

- Installation & commissioning
- Mechanical adjustment (e.g., scale calibration)
- Shopfloor support
- Remote support
- Hardware and Software support

Take off with us & secure your future
