Introducing Aesthetics

Aesthetics represents the two leading trade events in the UK medical aesthetics speciality, plus the most well-respected UK-based medical journal on all things aesthetics.

CCR, ACE, The Aesthetics Awards and the Aesthetics Journal epitomise excellence in the industry, featuring the biggest companies and the most reputable practitioners.

Our events and content provides a platform for the latest innovations in the world of aesthetics, giving a voice to those leading the way in enhancing patient safety and results.

With our advanced industry knowledge and relationships with the top companies, Aesthetics is the source for all that's new in the specialty.

Report Keycode

CCR Exhibitor

Visit companies who are showcasing their latest and greatest developments at CCR 2023 to chat more about their products – see their stand numbers at the end of the report.

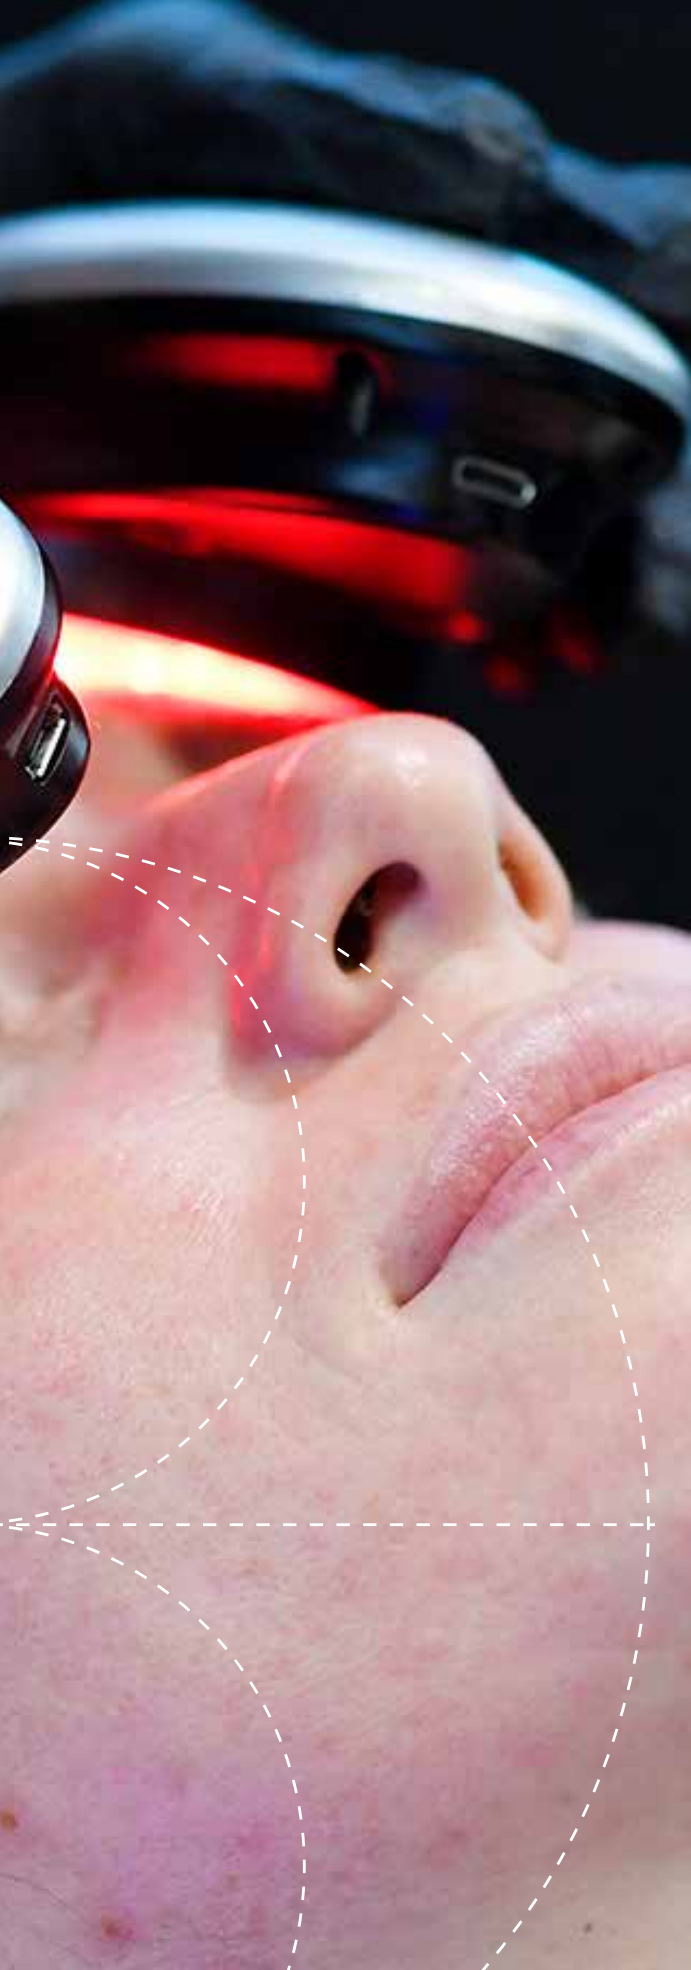

CCR Innovation Trail

Our Innovation Trail at CCR 2023 marks some of the most groundbreaking technology in the aesthetics world right now – pay these companies a visit at their stands to see what innovations they're inspiring.

Aesthetics AWARDS

These companies were Commended, Highly Commended or Winners at The Aesthetics Awards 2023 – known in the specialty as the Oscars of Aesthetics.

At Aesthetics, we're proud to be at the forefront of everything new and innovative in the specialty. It's been an incredible year with loads of emerging ground-breaking technologies, and we're excited to share them with you. From polynucleotides to exosomes, there are more options than ever for practitioners to offer to their patients.

Shannon Kilgariff, Editor and
Event Manager at Aesthetics

Introducing the Aesthetics Product Launches Report

The aesthetics industry is ever-evolving, and the Aesthetics Product Launches Report, brought to you by the Aesthetics journal, is a round-up of the exciting products, treatments and innovations newly released to the UK aesthetics market in 2023.

The list is divided into five sections for your ease:

1. Revitalising Injectable Treatments
2. Devices for Face and Body Rejuvenation
3. Skincare
4. Advanced Skin Treatments
5. Wellness and Longevity Treatments

These round-ups are a handy insight into the hottest trending techniques, ingredients and treatment approaches in the past year from the most reputable companies.

Some of these companies are exhibiting at CCR 2023, so you have the chance to learn even more on their stands (turn to the back of the report to see where to find them).

Revitalising Injectable Treatments

Aesthetic practitioners often describe injectable treatments as their bread and butter. Injectable treatments include products such as dermal fillers, botulinum toxin, skin boosters, collagen stimulators or polynucleotides, which can be used to address concerns like volume loss, skin laxity, fine lines and more.

These products' popularity among patients and their ability to create incredible transformations make them firm industry favourites.

CCR Exhibitor Company	Product	Product Type
AesthDerm	Karisma	Bio-Replenishing Filler
<p>Karisma is a bio-replenishing soft filler, combining high molecular weight hyaluronic acid with R-polypeptide collagen and carboxymethyl cellulose. According to the company, it restores pre-ageing conditions, acting on the rejuvenation of the extracellular matrix. It can be used to correct facial skin defects and restore facial volume.</p>		

CCR Exhibitor Company	Product	CCR Innovation Trail	Product Type
Amedica	Ameela		Polynucleotide
<p>Ameela is formed with fragments of salmon DNA, which is similar to humans. These fragments react with patients' cell receptors when injected, stimulating collagen and elastin production, according to Ameela. Ameela Eyes, Ameela Rejuvenation and Ameela Face contain differing concentrations of polynucleotides to allow for treatment of both the face and body, boosting hydration and stimulating deep tissue.</p>			

CCR Exhibitor Company	Product	Product Type
BeautyEurope	Juvelook	Collagen Stimulator
<p>Juvelook is a hybrid collagen stimulator with a concentration of 42.5mg of PDLLA and 7.5mg of non-crosslinked hyaluronic acid. The product can be applied in the eye area, face, neck and décolleté through injection directly into the dermis. According to the company, injection in this shallow layer maximises the plumping and glowing effect of newly synthesised collagen. This can induce skin texture improvement, reduction of fine lines, tightening of pores and more.</p>		

CCR Exhibitor Company	Product	Product Type
BeautyEurope	Lenisna	Hybrid Collagen Stimulator
<p>Lenisna is a hybrid collagen stimulator with a concentration of 170mg of PDLLA and 30mg of non-crosslinked hyaluronic acid. The product can be used on the face and neck, but also the body. According to the company, the product induces long-term collagen stimulation for treatment of deep wrinkles, skin laxity and volume contouring. The company says it is particularly effective when treating sagging of the stomach or buttocks.</p>		

CCR Exhibitor	Company	Product	Product Type
	CGBio	AiLEENE	Dermal Filler
<p>AiLEENE is a multi-layered filler range which combines highly viscous monophasic fillers and elastic biphasic fillers to create tailored results. AiLEENE has three different products in its portfolio, depending on viscosity and elasticity for the treatment area. Vol#1 is suitable for soft areas such as the forehead and under-eyes, Vol#2 can be used in areas which require volume like nasolabial folds and the forehead, and Vol#3 has a high viscosity and is ideal for the nose, forehead and chin</p>			

Company	Product	Product Type	Aesthetics AWARDS
Croma Pharma	PhilArt	Skin Booster	
<p>PhilArt skin boosters aim to improve patients' skin quality, rejuvenating the skin and adding radiance while restoring the skin's elasticity and promoting hydration, according to Croma Pharma. The company explains that the application ranges from the face, scalp and neck to the décolletage and hands. The PhilArt range offers four injectable treatments, suitable for all skin types and age groups.</p>			

CCR Exhibitor	Company	Product	Product Type
	DIBI Milano	Biostimulating Systems	Biostimulators
<p>DIBI Milano has introduced a range of biostimulating systems. These systems contain a patented hyaluronic acid formulation which combines HA at different molecular weights: 2 kDa, 400 – 1000 kDa and 1800 – 2200 kDa. This is combined with PDRN from salmon DNA and stabilised vitamin C to rejuvenate the skin through stimulation of cell proliferation, antioxidant activity and anti-inflammatory properties, according to the company.</p>			

CCR Exhibitor	Company	Product	Product Type
	Hansbiomed	Klárdie Cellup Solution	Skin Booster
<p>Klárdie Cellup combines Cellup Dia Solution and Cellup Ruby Solution to induce skin rejuvenation, inner moisture, skin elasticity and brightening, alongside reducing the appearance of freckles/blemishes. According to the company, Klárdie Cellup Solution contains the multi-layered Hyalusome™ complex which expertly replenishes the moisture both on the outside and the inside of the skin.</p>			

CCR Exhibitor	Company	Product	Product Type
	Mastelli	NEWEST	Polynucleotide
<p>NEWEST is a polynucleotide-based product that also contains hyaluronic acid – enabling practitioners to improve damaged and aged skin, while regenerating fibroblasts for continuous improvement in skin quality. NEWEST can be used on the face, neck and décolletage, while there is also a separate product – NEWEST One – designed specifically for use on the body.</p>			

Company	Product	Product Type
SuneKOS	Peforma	Collagen Stimulator
<p>Peforma is an injectable treatment designed to stimulate skin's collagen and elastin production, restoring elasticity and volume. It combines low molecular weight hyaluronic acids with hydrophobic amino acids to slow down HA breakdown, reducing degradation by 40% and thus making result last longer. The injectable treatment can be used up to the lash line for tear trough treatment, improving fine lines and dark circles around the eyes.</p>		

Company	Product	Product Type
Yvoire	Y-Solution	Dermal Filler
<p>Yvoire Y-solution 720 filler uses a S-HICE cross-linking method with high hyaluronic acid concentration for a spring-like, immediate volume result. Its combination of elasticity and cohesivity allows easy injection and impressive treatment results in the cheek, chin, jawline and lip areas.</p>		

Devices for Face and Body Rejuvenation

Aesthetic devices are some of the most multifaceted products in the industry. They offer dozens of treatment solutions, from hair removal to skin tightening, acne reduction to fat reduction. From minimally-invasive to more intensive treatments, there really is something for everyone when it comes to aesthetic devices. They often work well in combination with other treatments like injectable treatments and cosmeceutical skincare.

CCR Exhibitor	Company	Product	Product Type
	Aesthetics Solutions	UltraClear Laser	Laser
<p>According to Aesthetics Solutions, UltraClear is FDA-cleared as the world's first cold, ablative mid infrared fibre laser. The company says that due to pain management technology 3DIntelliPulse and the speed of delivery, numbing creams are not required for the majority of treatments, despite being ablative. It can also be used on all skin types with minimal risk of adverse events. The device can be used for antiageing and rejuvenation in short treatment sessions.</p>			

CCR Exhibitor	Company	Product	CCR Innovation Trail	Product Type
	Alma	Alma Opus		Radiofrequency
<p>Alma has introduced Opus – a non-invasive radiofrequency device for skin tightening and resurfacing, using unipolar RF to stimulate collagen production on the face, eye area and body. The RF is combined with fractional plasma technology to boost collagen stimulation. Alma explains that charged metal pins are applied to the skin at a high frequency (over 40 MHz) to produce a new skin surface without the need for invasive needles</p>				

CCR Exhibitor	Company	Product	Product Type
	APG Tech	Golden RF	Radiofrequency
<p>According to Aesthetics Solutions, UltraClear is FDA-cleared as the world's first cold, ablative mid infrared fibre laser. The company says that due to pain management technology 3DIntelliPulse and the speed of delivery, numbing creams are not required for the majority of treatments, despite being ablative. It can also be used on all skin types with minimal risk of adverse events. The device can be used for antiageing and rejuvenation in short treatment sessions.</p>			

CCR Exhibitor	Company	Product	CCR Innovation Trail	Product Type
	BTL Aesthetics	EMFACE		Facial Muscle Stimulator
<p>EMFACE is a needle-free, non-invasive procedure to lift and tighten the face and brow. Synchronised radiofrequency remodels and smooths the skin by heating the dermis, increasing collagen by 26% and doubling the amount of elastin in the tissue. HIFES is a patented technology that uses high-intensity electrical fields to restore and elevate facial tissues by selectively contracting muscles and increasing the density and quality of muscle structure.</p>				

CCR Exhibitor	Company	Product	Product Type
	BTL Aesthetics	EXION	Radiofrequency
<p>BTL Aesthetics explains that EXION treats the face, body and intimate area with four different applicators: EXION Fractional RF, EXION Face which induces hyaluronic acid production through combined RF and ultrasound, EXION Body which targets skin laxity and fat loss within one applicator, and EMFEMME 360 which uses non-invasive RF to treat vaginal laxity and sexual dysfunction in eight minutes.</p>			

CCR Exhibitor	Company	Product	CCR Innovation Trail	Product Type
	Celluma	RESTORE		Light Therapy
<p>The all-in-one Celluma RESTORE is the first light therapy device FDA-cleared and medically CE marked to treat several common aesthetic concerns in a single device including hair loss, acne and ageing skin. According to the company, the device delivers low-level light therapy (LLLT) to promote hair regrowth and prevent further hair loss.</p>				

CCR Exhibitor	Company	Product	Product Type
	Cosmeditech	TargetCool	Cooling Technology
<p>According to Cosmeditech, TargetCool is a precise, controlled, rapid FDA/CE Class II medical device that utilises proprietary cooling technology for control and comfort during aesthetic treatments and medical procedures. The device can be used to reduce pain through rapid cooling of tissue which reduces nerve transmission velocity in pain fibres. It can also be used to transfer serums into the skin at a fast rate, or to remove warts and lesions with precision cryotherapy.</p>			

CCR Exhibitor	Company	Product	CCR Innovation Trail	Product Type	Aesthetics AWARDS
	Cutera	AviClear		Acne Laser	
<p>AviClear from Cutera is the first US FDA-cleared aesthetic device to treat mild-to-severe acne, with permanent results. According to Cutera, AviClear will offer patients an alternative to prescription medications which can trigger side effects, requiring just three 30-minute sessions to provide a long-term solution to active acne. AviClear uses a 1726 nm wavelength that selectively targets and down-regulates the sebaceous glands rather than targeting melanin or water.</p>					

CCR Exhibitor	Company	Product	Product Type
	Dermalux	Tri-Wave MD II	LED Phototherapy
<p>The Tri-Wave MD II utilises an adjustable, four-pod head to deliver treatments to broad areas of the skin, both face and body. The device is designed to treat numerous dermatological skin conditions, pain management and wellbeing, through tolerant and high-power LED light output. The programmable wavelengths from the device are designed to penetrate different levels of the skin with maximum power output.</p>			

CCR Exhibitor	Company	Product	Product Type
	Hydrafacial	Hydrabody	Body Devices
<p>Hydrabody includes treatments for the neck, back, buttocks, legs, hands and arms, utilising the three-step procedure of cleanse, extract and hydrate. According to Hydrafacial, these treatments can be used to address conditions including keratosis pilaris, acne on the back or buttocks, or pigmentation and uneven skin tone.</p>			

CCR Exhibitor	Company	Product	Product Type
	Hydrafacial	Syndeo	Facial Devices
<p>The Hydrafacial Syndeo device includes 12 treatments in one system, including LightStim Elipsa LED therapy, lymphatic drainage, Keravive, Perk and Hydrabody. It also brings seamless gesture control for less hand-to-surface contact, automatic serum selection, compact gunkie with integrated light and magnifying glass and wireless upgrades.</p>			

CCR Exhibitor	Company	Product	Product Type
	Hydrafacial	Wet Diamond Tip	Facial Devices
<p>The Wet Diamond tip, which is only for use by medical professionals, is diamond-encrusted, offering the highest strength of cleansing and physical exfoliation in the Hydrafacial portfolio. Wet Diamond comes in either 100 or 120 Diamond Grid Pads for deeper or less abrasive treatments respectively, providing a lasting glow for patients with thick, oily skin or advanced skin congestion.</p>			

CCR Exhibitor	Company	Product	Product Type
	Hydrafacial	JLO Beauty Booster	Facial Booster
<p>The JLO Beauty Booster is a new product designed for all skin types, focusing on tightening, brightening and hydrating. It includes olive leaf extract, niacinamide, rice bran extract, hyaluronic acid and a fermented adaptogen blend. It can be added to Hydrafacial and Hydrabody treatments.</p>			

CCR Exhibitor	Company	Product	Product Type
	Indiba	Reverso	Radiofrequency
<p>Reverso fractional RF is a non-motorised, ablative bipolar fractional RF device. According to the company, Reverso offers very sharp pin technology, short pulses, higher energy/pin and 12 different treatment modality options. The company says that the device's frequency and energy delivery system means it causes minimal inflammation, reducing the risk of post-inflammatory hyperpigmentation.</p>			

CCR Exhibitor	Company	Product	Product Type
	InMode	EvolveX	Body Sculpting
<p>InMode's EvolveX device aims to remodel skin, reduce fat and sculpt muscles using a combination of bipolar radiofrequency energy, high voltage pulse and electrical muscle stimulation, with no downtime. A clinical study on the combination of RF and EMS saw changes in abdominal circumference, caliper pinch thickness and ultrasound fat thickness.</p>			

CCR Exhibitor	Company	Product	Product Type
	InMode	Empower RF	Intimate Rejuvenation
<p>Empower RF uses radiofrequency energy and intravaginal electrical muscle stimulation to treat various issues, including neuromuscular re-education, urinary incontinence and vaginal atrophy. It aims to improve vulvo-vaginal health by treating collagen and muscle, avoiding complex surgery and promoting women's wellness.</p>			

CCR Exhibitor	Company	Product	Product Type	Aesthetics AWARDS
	Lumenis	Legend Pro+	Radiofrequency	
<p>Legend Pro+ is a three-in-one skin and body platform which offers three radiofrequency (RF) based technologies. TriPollar triggers collagen and elastin stimulation through controlled heating of the dermis for skin tightening; Voluderm creates micro wounds to encourage hyaluronic acid production; and TriFractional resurfaces the skin through ablative RF and volumetric heating.</p>				

CCR Exhibitor	Company	Product	Product Type	Aesthetics AWARDS
	Lumenis	ULTRApulse Alpha	Laser	
<p>The Lumenis ULTRApulse Alpha brings CO2 precision and power to various aesthetic settings. According to the company, the short pulse delivered by ULTRApulse Alpha creates a deep-clean wound for skin resurfacing. The device's settings can be adjusted to provide treatments ranging from skin resurfacing to scar revision and even minimally invasive aesthetic surgeries like blepharoplasty.</p>				

CCR Exhibitor	Company	Product	Product Type	Aesthetics AWARDS
	Lynton	Moveo Technology	Laser	
<p>Lynton has introduced four new handpieces for use. This includes the Motus AY: Moveo PL for pigmentation treatments, Moveo VL for vascular concerns including rosacea, Moveo SR for skin rejuvenation and the Moveo HR for hair removal. The handpieces are able to move across the skin as opposed to a single spot stamping technique, which achieves lasting results and eliminates wasted and scattered energy, notes Lynton.</p>				

CCR Exhibitor	Company	Product	Product Type
	Novus Medical	JetPeel	Jet Pressure Treatment

Based on jet propulsion technology, JetPeel uses fine misty jet streams of high velocity liquid traveling at subsonic speeds. Applied to the skin, these powerful jet streams create microchannels to facilitate deep subdermal delivery, with no needles, no incisions, no skin breakage and no pain. According to the company, the device can be used to treat uneven skin tone, signs of ageing, skin sensitivity, acne prone skin, sun damage, hair restoration and more.

Company	Product	Product Type
Reveal Lasers	UK LAUNCH	Lasers

Reveal Lasers brings a new portfolio of aesthetic devices to the UK, headed up by the ADVATx laser which can be used to address a range of skin concerns including vascular concerns, pigmentation, acne and scarring, as well as skin rejuvenation. The company is now offering a range of laser hair removal devices, skin rejuvenation systems, and more to UK practitioners.

CCR Exhibitor	Company	Product	CCR Innovation Trail	Product Type
	Sculpt Pro Aesthetics	e-Magnescence		Combination Treatment

e-Magnescence combines three technologies into one intelligent handpiece: RF, HI-EMS and HI-TENS. According to the company, these can be used to target all layers of the skin, aiming to tighten the skin, sculpt muscles and minimise cellulite. Monopolar, tripolar and fractional RF are all available, providing versatile treatment options for a variety of indications.

CCR Exhibitor	Company	Product	Product Type
	Shenzhen GSD Tech Co.	Coolite Evo	Laser

Coolite Evo is a fibre diode laser for use in skin rejuvenation and hair restoration through three wavelengths within one handpiece. According to the company, the device can be used to brighten and tighten skin, shrink pore size and provide overall rejuvenation. The company says that hair removal is effective for skin types I-VI.

Company	Product	Product Type
Zemits	PureKio	Electrode Therapy

Zemits has announced the release of high-frequency device PureKio, designed to improve skin quality with electrodes. According to the company, the device's electrical therapy helps tackle oily, acne-prone skin and address various other skin conditions, as well as reducing fine lines and wrinkles. The device's four different electrode options can be adjusted to target the body, face and scalp.

CCR Exhibitor	Company	Product	Product Type
	3D Aesthetics	EMlift	Facial Tightening

EMlift's high intensity focused electromagnetic energy aims to enhance muscle density and quality, whilst restoring and elevating the support of facial features. The radiofrequency increases the stimulation of collagen production and elastin fibres through dermal heating, 3D Aesthetics explains. The device can treat the forehead, cheeks, jawline and give the eyebrows a lift, with benefits including a reduction in fine lines and wrinkles and skin tightening.

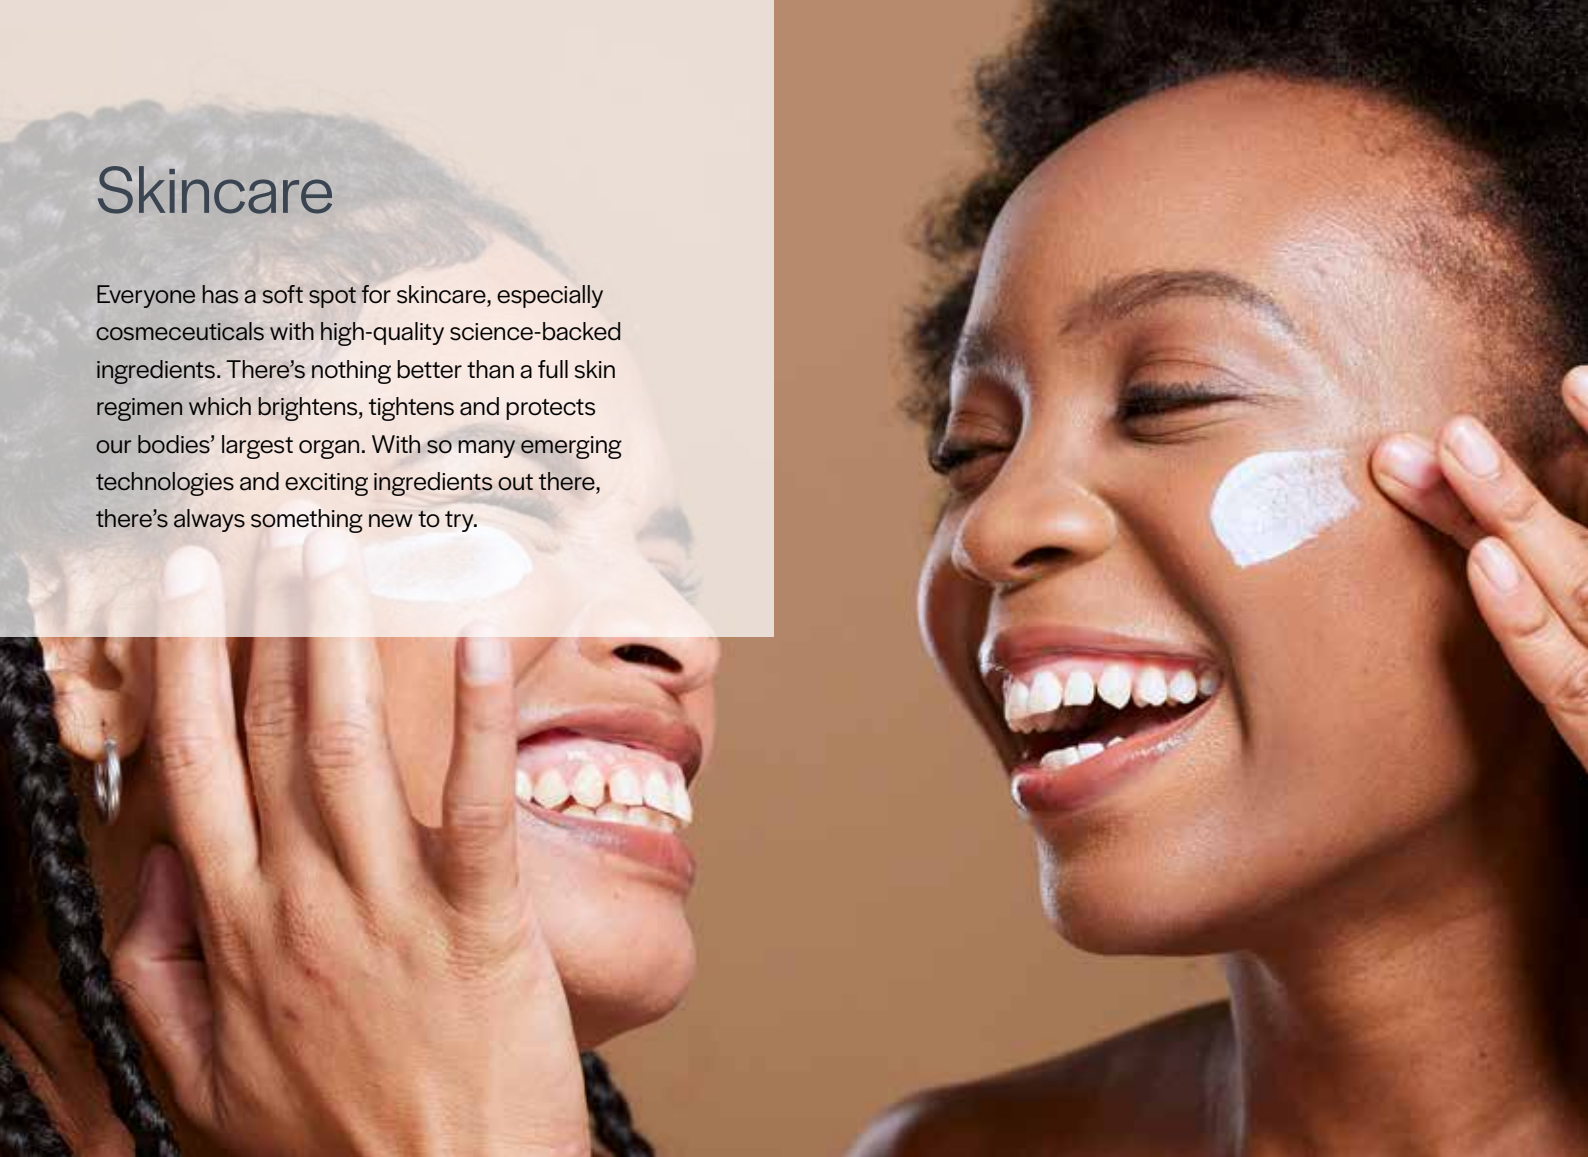

CCR Exhibitor	Company	Product	Product Type
	4T Medical	Lumixa	Light Therapy

Lumixa is a phototherapy treatment that uses fluorescent light energy technology (FLE). It consists of a topical gel that is applied to the skin and activated under a professional LED light. Unlike traditional LED, FLE simultaneously covers the entire spectrum in the different layers of the skin, to repair and regenerate skin at the cellular level, notes 4T Medical.

Skincare

Everyone has a soft spot for skincare, especially cosmeceuticals with high-quality science-backed ingredients. There's nothing better than a full skin regimen which brightens, tightens and protects our bodies' largest organ. With so many emerging technologies and exciting ingredients out there, there's always something new to try.

CCR Exhibitor Company	Product	CCR Innovation Trail	Product Type
Crown Aesthetics	BIOJUVE		Skin Biome Care
<p>Crown Aesthetics, the company behind the celebrated SkinPen microneedling treatment, has expanded its product lineup with BIOJUVE skin biome products, utilising microbiome technology to optimise the skin's overall biome. The products feature patented Xycrobe technology, incorporating skin-native bacteria to work harmoniously with the skin's natural biology. The BIOJUVE portfolio includes a Conditioning Cleanse, Living Biome Essentials Serum, Activating Mist, Biome Support Complex and Hydrating Barrier Cream, recommended for twice-daily use to enhance skin health and leverage Xycrobe technology's benefits.</p>			

CCR Exhibitor Company	Product	Product Type
AlumierMD	Refining Clay Mask	Mask
<p>AlumierMD has added a new at-home exfoliating mask, the Refining Clay Mask, to its medical-grade skincare lineup. With a 78% improvement in spots, 41% improvement in texture, and 16% improvement in redness, this mask combines clay and exfoliating elements like papain, lactic acid, bentonite, and kaolin to remove dead skin cells, clear trapped sebum, and promote skin renewal.</p>		

Company	Product	Product Type
Cellcosmet	Body care range	Body Skincare
<p>Swiss skincare brand Cellcosmet has released a new range of body care products, incorporating cellular and biotechnological technology into the new CellBust-XT Hand Cream and Cellular Body Gel-Cream. This technology includes CytoPep Cellular Extracts (collagen, fibronectin, actin and keratin), which is designed to boost skin elasticity and barrier function. The products also contain the moisturising Cellcosmet HydraFresh Complex and marine-origin Postbiotics Complex, according to the company.</p>		

Company	Product	Product Type
Croma Pharma	Detox Face Mask	Mask
<p>Aesthetic pharmaceutical company Croma Pharma has introduced a new detox face mask designed to purify the skin and enhance its smoothness and radiance. The mask contains 40% charcoal powder for charcoal benefits without mess. Key ingredients include bakuchioli, white willow bark, magnolia leaf for gentle exfoliation, charcoal powder for impurity removal, hyaluronic acid, poly-y-glutamic acid for hydration and plumping and nutgrass for improving skin texture.</p>		

Company	Product	Product Type
Dermalogica	Porescreen SPF 40	SPF
<p>Dermalogica has introduced Porescreen SPF 40, a new sunscreen offering protection from UVA and UVB rays with zinc oxide. It also features 2% niacinamide and antioxidants to hydrate the skin and minimise the appearance of pores. According to the company, the product has multi-tasking benefits, including SPF protection, pore support, a blurring effect and a hint of tint for radiant skin.</p>		

Company	Product	Product Type
Dermalogica	Oil to Foam Cleanser	Cleanser
<p>According to the company, the Oil to Foam Total Cleanser is a makeup remover and cleanser aimed to eliminate all debris, excess sebum and pollutants from the skin in a single wash. The formula includes sea buckthorn oil which, combined with water, creates a foam to remove impurities, sebum and debris.</p>		

Company	Product	Product Type
Dermanda	Hydration and Firming Mask	Mask
<p>Luxury skincare brand Dermanda has released a new Hydration and Firming Mask suitable for all skin types. Formulated by founder and pharmacist Dr Awatif Mandour, the mask aims to enhance absorption and optimise results. It includes active ingredients like humectants for hydration and promoting ingredient absorption, piper methysticum stem extract for skin conditioning and moisture retention, caffeine for skin brightening and tightening and hyaluronic acid for plumping.</p>		

Company	Product	Product Type
ESK Skin	UK LAUNCH	Skincare
<p>Australian skincare brand ESK has officially launched in the UK, offering products formulated based on clinical studies by doctors, dermatologists, and scientists. The products contain antioxidants, acids and other ingredients such as botanicals to tackle conditions like ageing, acne, rosacea and sensitive skin. Products include microneedling patches, cleansers and serums, with a variety of treatment kits include a Mature Anti-Aging Kit, a Menopause Kit, a Rosacea Skincare Kit and a Teenage Acne Kit.</p>		

CCR Exhibitor	Company	Product	Product Type	CCR Innovation Trail	Aesthetics AWARDS
HEADLINE SPONSOR	Galderma	Alastin	Skincare		
	<p>Alastin skincare is the latest addition to the Galderma aesthetic portfolio, providing a collection of products for optimal procedure results and daily skincare regimens. The products are formulated with TriHex Technology, a patented blend of peptides that work with the skin to help clean out damaged elastin and collagen while supporting the skin's natural ability to produce new, healthy elastin and collagen. Skin Nectar is a pre- and post-procedure product that complements aesthetic treatments to help support recovery and improve results.</p>				

Company	Product	Product Type
Hyclo Skin	UK LAUNCH	Skincare
<p>Hyclo Skin is the first brand to launch a revolutionary 90% pure hypochlorous acid formula. This high strength, high purity formulation can address all manner of indications including active acne, acne damaged skin, dryness, redness and irritation, rosacea and eczema, according to the company. Repair contains the hypochlorous acid formula, while Replenish is gentle and nourishing moisturiser to hydrate the skin.</p>		

Company	Product	Product Type
IMAGE Skincare	BIOME+ range	Skincare

IMAGE Skincare has launched the BIOME+ collection, which is designed to be gentle on the skin and microbiome, including three products: BIOME+ cleansing comfort balm, BIOME+ dew bright serum, and BIOME+ smoothing cloud crème. These products feature fermented squalane from sugarcane, ashwagandha, tiger grass extract, niacinamide, and hyaluronic acid to strengthen the skin barrier. The packaging is eco-friendly, with 85% bio-resin made from sugarcane, and the collection is PETA-certified and vegan.

Company	Product	Product Type
IMAGE Skincare	PROTECTION+ range	SPF

IMAGE Skincare has unveiled three new SPF products as part of its PROTECTION+ suncare range. The Clear Solar Gel SPF 30 is transparent and waterless, featuring antioxidants like vitamin C, vitamin E, and green tea for UV protection without leaving a white cast. The Sun Serum SPF 30, available in tinted and untinted versions, is suitable for various skin tones and includes plant-derived sugar cane squalene, ginger root and chamomile to soothe the skin.

Company	Product	Product Type
iS Clinical	Retinol+ Emulsion	Retinol

The nourishing Retinol+ Emulsion duo of Retinol+ Emulsion 0.3 and 1.0 is a comprehensive solution that addresses a multitude of skin concerns. The proprietary blend of bakuchiol, plus powerful botanical boosters, antioxidants and extremozymes, effectively targets fine lines, deep wrinkles, uneven skin tone, rough texture and blemishes, according to the company. Moreover, it works to enhance the complexion by smoothing, softening and brightening, while also promoting improved skin firmness and elasticity.

CCR Exhibitor

Company	Product	Product Type
Marini Skin Research	UK LAUNCH	Skincare

Developed by dermatologists, Jan Marini Skin Research (JMSR) offers evidence-based treatments for various skin conditions, including ageing signs, acne, sun damage, and skin discoloration. It is also used for rosacea and redness. JMSR products enhance in-clinic treatments like IPL, microneedling, chemical peels, and more. The range includes cleansers, exfoliators, retinols, masks, sunscreens, moisturisers, and hyaluronic acids.

Company	Product	Product Type
Medica Forte	Glutaceuticals	Skincare

Medica Forte has launched a new collection of professional skincare, treatments and home peels, designed to simplify skincare routines. The Glutaceuticals range contains antioxidant glutathione and a blend of more than 25 ingredients and acids, delivered at low concentrations to correct and protect the skin, explains the company. The range includes a moisturiser, calming cream, regenerating cream, overnight peel cream and a mask peel.

Company	Product	Product Type
Medik8	Crystal Retinal Ceramide Eye	Eye Cream

Medik8 has added the Crystal Retinal Ceramide Eye to its skincare lineup, targeting under-eye rejuvenation with three strength options for visible results in one step. The product aims to reduce crow's feet, wrinkles, crepiness and puffiness while remaining gentle on the delicate eye area. Suitable for those with dryness and signs of ageing around the eyes, it also simplifies evening routines. Clinical studies with 38 and 50 participants showed improvements in wrinkles and gentleness in the eye area.

Company	Product	Product Type
Mesoestetic	Resurfacing Gel	Gel
<p>This blemiderm resurfacing gel, part of the Anti-Blemish Solutions line, is designed for combination, oily and acne-prone skin. The company says that the company aims to refine pores, purify, retexture the skin, reduce excess sebum and decongest pores. The active ingredients in the product also regulate action on the main acne triggering factors to prevent the appearance of blemishes, according to the company.</p>		

CCR Exhibitor Company	Product	Product Type
Monika Heiligmann	UK LAUNCH	Lipcare
<p>Monika Heiligmann offers a range of lip products tailored for aesthetic patients, including the After Injection Lip Recovery Balm, which is designed to accelerate the healing process, leading to nourished and hydrated lips. The Deep Regenerative Lip Balm is also designed to prevent natural and external skin dehydration through everyday use, according to the company. The company explains that its plastic-free products contain all-natural ingredients including hyaluronic acid, growth factors, vitamin E, cerafluid (liquid ceramides), raspberry oil, shea butter and more.</p>		

Company	Product	Product Type
Morphiya	UK LAUNCH	Biotech Skincare
<p>The London Regenerative Institute (LRI) has launched biotech skincare range Morphiya, harnessing exosome technology to reverse the effects of ageing at a cellular level. The products contain Exomorph – a patented technology which combines exosomes with liposomes to make ‘hybrosomes’: the key component in Morphiya. According to the company, these hybrosomes reprogram cells’ transmission to send messages which make skin cells younger.</p>		

Company	Product	Product Type
NeoStrata	Hyaluronic Luminous Lift Gel	Gel
<p>Crown Aesthetics, the company behind the celebrated SkinPen microneedling treatment, has expanded its product lineup with BIOJUVE skin biome products, utilising microbiome technology to optimise the skin's overall biome. The products feature patented Xycrobe technology, incorporating skin-native bacteria to work harmoniously with the skin's natural biology. The BIOJUVE portfolio includes a Conditioning Cleanse, Living Biome Essentials Serum, Activating Mist, Biome Support Complex and Hydrating Barrier Cream, recommended for twice-daily use to enhance skin health and leverage Xycrobe technology's benefits.</p>		

Company	Product	Product Type	Aesthetics AWARDS
PCA Skin	Pro-Max Serum	Serum	
<p>Pro-Max Age Renewal Serum is clinically proven to visibly lift and firm the appearance of skin by 60%, according to PCA Skin. The patent-pending Micro Growth Factor Technology (MGF) penetrates deeper than conventional growth factors through four unique signal tripeptides, supporting collagen production and reducing the appearance of sagging, loss of volume, lack of firmness and wrinkles.</p>			

Company	Product	Product Type	Aesthetics AWARDS
PCA Skin	Vitamin B3 Eye Brightening Cream	Eye Cream	
<p>This eye cream contains 5% niacinamide, botanical extracts and antioxidants to address discoloration and fine lines. Participants in a 12-week clinical study of five participants with Fitzpatrick types ranging from I to V reported a reduction in skin redness, improvement in skin texture and directional change in undereye brightness with twice-daily use, according to the company.</p>			

Company	Product	Product Type
PRIORI	UK LAUNCH	Skincare
<p>PRIORI offers professional peel systems addressing various skin concerns, such as pigmentation, lines, wrinkles, sun damage and hormonal blemishes. The company's products feature adaptive skincare ingredients like DNA Enzyme Complex for DNA repair, IR Complex for broad-spectrum protection and Advanced Moisture Complex for dry skin.</p>

ROSSA

3D Microfibre Hydro Mask

Mask

The 3D Microfibre Hydro Mask is designed to protect the skin barrier and combat dryness. The mask is infused with 70% rose water, birch sap, 10 types of hyaluronic acid, ceramides and bio-actives to improve hydration, nourish and protect the skin. It also diminishes the appearance of fine lines and wrinkles, according to the company.

skinbetter science

Mystro Active Balance Serum

Serum

UK distributor of the skinbetter science range, AestheticSource, unveils skinbetter science Mystro Active Balance Serum, targeting redness, texture, dullness, pore size and uneven pigmentation for a healthier skin appearance. In a 12-week clinical trial, 53 patients with mild-to-severe photodamaged skin used the serum twice daily. Results showed 98% felt more confident in the appearance of their skin. A further 87% said friends and family noticed or commented on their skin's improved appearance and 82% said they wore less makeup after using the serum.

SkinCeuticals

A.G.E Interrupter Advanced

Serum

SkinCeuticals launches A.G.E Interrupter Advanced, an upgraded version of the original A.G.E Interrupter, which was launched 14 years ago, to target visible signs of ageing with more advanced skin technology. The product's formulation uses wild fruit flavonoids, glycyrrhetic acid and concentrated proxylane (20% more than the original A.G.E Interrupter) to optimise collagen matrix integrity, according to SkinCeuticals.

5 Squirrels

Clarify Collection

Skincare

5 Squirrels adds a range of new skincare products to its lineup with the Clarify Collection, providing for oily and blemish-prone skin. The range includes Clear: Degreasing Cleanser, Remove: Oil Control Pads, Control: Breakout-Buster Serum and Zap: Blemish Control Pen. These offerings cater to various skincare needs, from makeup removal to blemish control, with a focus on natural ingredients.

Advanced Skin Treatments

Sometimes our skin needs a little more TLC to keep a healthy, glowing complexion. With newly developed technologies constantly in the works, patients' skin has never had more options.

Company	Product	Product Type
ABG Lab	UK LAUNCH	Mesotherapy
<p>US mesotherapy company ABG Lasers is entering the UK market. The company' mesotherapy products address various skincare concerns such as skin renewal, facial remodelling and hair loss. These include Meso-Wharton P199 for ageing skin, Meso-Xanthin F199 for damaged skin, Mesosculpt C71 for facial contouring and Mesoeye C71 for periorbital correction.</p>		

CCR <small>Exhibitor</small> Company	Product	Product Type
Dermapenworld	EXO-SKIN	Exosomes
<p>Containing ethically produced Exosomes, EXO-SKIN is multipotent and highly versatile. While exosomes are not cells, they act as messengers between cells sending vital information for tissue healing, skin regeneration and repair. They are a new innovation aiming to promote healthier skin quality, texture and tone. EXO-SKIN is formulated with hyaluronic acid, vitamin pro-B5 and copper peptides, delivering highly potent actives to the skin. According to the company, the product boosts cellular repair and maximises the potential for skin regeneration.</p>		

CCR <small>Exhibitor</small> Company	Product	CCR <small>Innovation Trail</small>	Product Type
Dermoaroma	Purasomes		Exosomes
<p>The application of Purasomes has been crafted as a combined therapy in conjunction with the microinjuries caused by controlled skin puncturing during microneedling. Purasomes comprise three formulations to enable the body to initiate skin regeneration: Purasomes SGC 100+ Skin Glow Complex to brighten and protect skin; Purasomes NC 150+ Nutri Complex to address signs of ageing and Purasomes HSC50+ Hair Scalp Complex to prevent hair loss and promote healthy growth.</p>			

Company	Product	Product Type
EXOJE	UK LAUNCH	Exosomes
<p>EXOJE is a plant-based exosome treatment. Using plant-derived extracellular nanoparticles (PDEN) technology, it rejuvenates the skin with peptides, growth factors, liposomes and amino acids, targeting inflammation by rebalancing skin signalling pathways. The treatment includes DJTOX skin preparation, the EXOJE serum and the REPAIR serum, showing significant increases in collagen production, elastin and hyaluronic acid secretion.</p>		

Company	Product	Product Type
Luna Microcare	RÉVIVE	Microcone Patches
<p>RÉVIVE is a non-invasive antiageing treatment that visibly rejuvenates the appearance of the skin with patches that create results from their very first application. Supported by 13 patents, each corrective patch contains hundreds of painless micro-cones. These cones contain ingredients including palmitoyl tripeptide-5, hyaluronic acid, s-Mu-conotoxin Cn11C, adenosine, seaweed extracts and acetyl octapeptide working on the epidermis, where they dissolve to relax expression lines and wrinkles. This product is specially designed for smile lines and forehead wrinkles.</p>		

CCR Exhibitor

Company	Product	Product Type
Promoitalia	V-Tech	Exosomes
<p>Promoitalia introduces V-Tech, a synthetic exosome treatment system. V-Tech Serum features synthetic exosomal structures, high molecular weight polydeoxyribonucleotides and biomimetic peptides to activate cell receptors, promoting collagen production, hydration and free radical defence to combat skin ageing. The treatment is suitable for the face, neck, hands and feet, with optimal results within two weeks after the first session, followed by additional sessions as needed.</p>		

Company	Product	Product Type
SQT	SQT Bio-Microneedling	Bio-Microneedling
<p>Microneedling company SQT has expanded its portfolio with SQT Bio-Microneedling, featuring SQT Spongilla Spicules derived from freshwater sponges. These siliceous bio-microneedles stimulate the skin's dermis, enhance microcirculation, clear capillary blockages, and accelerate natural exfoliation. Suitable for all skin types, it can address acne, acne scarring, pigmentation, pores, blemishes, and fine lines.</p>		

CCR Exhibitor

Company	Product	Product Type
4T Medical	Platelet-Rich Plasma kit	PRP
<p>The platelet-rich plasma kit is designed to provide all the components required for the preparation of autologous PRP to help promote and accelerate the skin's natural rejuvenation and healing process. The registered device includes two test tubes of 10ml with an anticoagulant (sodium citrate) solution and the consumables necessary for drawing blood, notes the company.</p>		

Wellness and Longevity Treatments

Brand new for CCR 2023 is the Medical Longevity Summit (MLS). Here, we'll be exploring ways in which practitioners can help patients enhance their wellbeing through functional medicine and wellness treatments. With the emerging area of medical longevity, we can now elongate our healthspan – making our lives healthier for longer.

CCR Exhibitor Company	Product	CCR Innovation Trail	Product Type
Lifecode Gx	Longevity DNA Package		DNA Consultation

The Longevity DNA Package comprises a DNA test, personalised report and 1:1 consultation with a nutrigenomics specialist to empower and motivate patients to take control of their health. The package analyses over 40 genes, looking at lifestyle and metabolic factors to improve health. For example, the SIRT (sirtuin) genes repair UV and age-related damage; mTOR genes can be moderated to tackle skin wrinkles, lines, roughness, rosacea and psoriasis; COL (collagen) genes maintain skin and tendon elasticity; and PPAR genes control fat burning and metabolic health.

Company	Product	Product Type
Map My Mole	UK LAUNCH	Mole Checking Service

Map My Mole is an app-based service whereby users are sent a clip on dermoscope that is a registered class 1 medical device to photograph suspicious moles or lesions. These dermoscopic images are then sent to be assessed by a consultant dermatologist. The service is available for patients to use at home, but clinics can also establish a partnership with Map My Mole to provide their patients with quick cancer checks.

CCR Exhibitor Company	Product	Product Type
Medichecks	Plasma	Blood Testing

According to the company, Plasma offers more than 150 tests, from single biomarkers to comprehensive health checks. It gives detailed insights into hormone levels, heart health, nutrition and more. The service offers finger-prick and venous sample options, which can be taken at home or conducted in clinic. The company notes that blood testing can enhance the assessment process and inform science-backed, bespoke treatment plans, which can provide better outcomes for patients.

NAD+ At Home

UK LAUNCH

Micro-Injectable Supplements

NAD+ At Home has launched a range of at-home micro-injectable supplement kits, designed to help people integrate wellbeing into their routines through at-home microdosing of coenzyme nicotinamide adenine dinucleotide (NAD+). The supplements can help reverse the ageing process, improve energy levels and cognitive function whilst the kits can also boost the metabolism, improve sleep, elevate mood and boost libido, according to the company.

The Aesthetics Portfolio

Aesthetics is a media and event portfolio servicing the medical aesthetics profession. This exciting market is growing rapidly and Aesthetics' corporate customers include pharmaceutical producers of injectable products, as well as skincare companies and laser device manufacturers.

The portfolio encompasses the monthly print Aesthetics journal, a strong online and social presence, and three annual events: the prestigious Aesthetics Awards ceremony, and two leading conferences and exhibitions – ACE and CCR.
