IPR – Solutions at hand

Our components make your robot more intelligent, flexible and versatile

Innovation meets top quality

IPR – Intelligente Peripherien für Roboter GmbH is a leader in the development and manufacturing of products related to industrial robots and offers an extensive product range with innovative systems and components for assembly and handling technology. Our parallel and angular grippers, tool changers, joining and compensating systems as well as load limiters, 7th axes for robots, force-torque sensors and customer-specific solutions are used by customers in many

countries around the world. Companies from all industries trust our products. Quality, technical and industry knowledge are our most important success factors.

We offer you standard products ready for immediate use, but we also support you in special and large-scale projects. Here you benefit directly from the development and manufacturing technologies in our house.

Industry-specific solutions for robot applications and automation solutions

Assembly and handling technology

Machinery loading and unloading

Foundry and forge

Automotive

E-mobility

Medicine and pharmaceuticals

Increased value for your application

IPR components are used in a wide variety of industries. The high variance in the product series combined with the possibility of creating modified standard or specifically designed special products in a short time holds a lot of potential for meeting the requirements of our customers. Our success is the result of many years of experience in

our company. Our employees are professionals in their field and have extensive knowledge around industries and production processes. This is how we continually develop innovative, high-quality and high-performance solutions for each individual project.

Individuality for your application from standardized to customized

For individual solutions, we combine standardized components with custom-built modules to reduce design and delivery times as well as costs. Our company provides these services for a wide range of industries such as the

automotive and supplier industry, machine tools and plant engineering, intralogistics, electrical industry, renewable energies, medical technology and the aerospace industry.

IPR offers everything that robots need to work

Discover our extensive portfolio of peripherals for robots

Our product range of series-produced automation modules includes a variety of grippers and tool changers, joining and compensation modules, force-torque sensors, collision protection systems and 7th axes for robots.

Within the individual product types, differently graded sizes are available for all load ranges. The excellent quality of our product range ensures high availability as well as smooth use in the production process.

We would be pleased to inform you about our components and technologies. Benefit from the many years of experience of IPR consultants.

IPR stands for:

■ Customer proximity

We are always there for our customers with advice and support.

■ Internationality

We are on site worldwide.

■ Innovation

We offer innovative solutions in top quality.

■ Competence

We utilize many years of experience and the know-how of all employees.

■ Quality and flexibility

We live lean structures and short decision-making paths.

2

Joining and compensation modules

Compensation of positioning errors in x, y and z direction as well as compensation of angle misalignment.

6

7th axes

Modular system.
High repeatability.
Extreme load capacity.
Long life.

5

Force-torque sensors

Active force control during deburring, polishing and mounting of parts, overload detection.

+

4

Collision protection systems

Mechanical device with included sensors to prevent damage in case of overload and collision, optional with internal cable routing.

1

Gripper

Compact design and very robust construction. Gripping force retention via spring (optional).

3

Tool changer

Quick change of tools and grippers on the robot or gantry. Simple assembly and high flexibility due to short changeover times.

7th axes for robots

CGS – The 2-jaw universal parallel gripper

Key advantages of our CGS2 series

Fields of application

The gripper series was developed for universal use. From clean assembly applications to dirt-prone applications in forges and foundries, there is a suitable gripper version for every task.

Function description

The vertical stroke movement of the oval piston is translated via wedge hook into a horizontally synchronized movement of the jaws. The application of compressed air to the pneumatic piston thus causes the gripper to open and close. The optional spring enables the gripping force to be maintained proportionally in the event of a drop in compressed air.

CGS | COMPATIBLE GRIPPER SERIES

- + Various sizes
- + Precise and reliable use
- + Light to heaviest handling weights
- + Maximum gripping forces

MORE VERSATILE

GREATER VALUE

TOUGHER

Product advantages & benefits at a glance

- Compatible with standard universal grippers from the competition
- Maximum guide length of the base jaw (suitable for longer gripper fingers)
- Lubricant pockets as grease reservoirs (leads to extended maintenance intervals)
- Up to 15 % lighter than comparable universal grippers due to weight-optimized design
- Optimized position measuring system for safe handling, type recognition and quality control
- Insensitive to crashes, dust and dirt due to the tried and tested T-slot guide
- Oval piston for maximum gripping force (maximum force density, minimum interference contour)
- Customary third-party sensors permissible (standardization of the customers can be matched)

1

Oval piston

The effective area of the piston has been optimized for the geometry of the base body to allow maximum gripping forces.

2

Spring for gripping force retention (depending on version)

Due to a spring installed in the piston chamber, the gripping force can be maintained even in the event of a drop in compressed air pressure.

3

Sensor holder included as standard

Inductive sensors for monitoring the jaw stroke can be mounted in the aluminum blocks below the jaw guides. In addition to that, commercially available magnetic sensors can be inserted in the C-slots in the housing.

4

Cam adjustment made of robust steel

The exact jaw position at which the inductive sensors output a signal for stroke sensing can be defined stepless with standard tools.

5

Backdrop / wedge hook

Thanks to an optimized design of the wedge hook the force of the piston is transmitted to the jaws with low loss and low wear.

6

Lubricant pockets

Pockets in the sides of the jaws allow permanent storage of grease and thus maintenance-free application under normal conditions.

7

Mounting holes for lateral mounting

Different mounting options for fastening of the gripper offer maximum flexibility for any application.

CGS2-80 with dust cover (similar to protection class IP64)

Type	CGS2-80-1-SA	CGS2-80-1-FA-SA	CGS2-80-1-FI-SA
Item no.	150001053	150001055	150001056
Weight [kg]	0.68	0.81	0.90
L x W x H [mm]	116 x 42 x 54.5	116 x 42 x 77	116 x 42 x 77
Type	CGS2-80-2-SA	CGS2-80-2-FA-SA	CGS2-80-2-FI-SA
Item no.	150001054	150001057	150001058
Weight [kg]	0.70	0.83	0.82
L x W x H [mm]	116 x 42 x 54.5	116 x 42 x 77	116 x 42 x 77

Other technical data correspond to the basic variants (see table on the left).

CGS2-80 as high temperature version

Type	CGS2-80-1-VH	CGS2-80-1-FA-VH	CGS2-80-1-FI-VH
Item no.	150001059	150001061	150001062
Max. operating temperature [°C]	+130	+130	+130
Type	CGS2-80-2-VH	CGS2-80-2-FA-VH	CGS2-80-2-FI-VH
Item no.	150001060	150001063	150001064
Max. operating temperature [°C]	+130	+130	+130

Other technical data correspond to the basic variants (see table on the left).

Double check valve for air pressure preservation

Type	DSV-1 M5
Item no.	152600002
Connection thread	2x M5
Nominal volume flow [m³/h]	0.22

Sensors for position monitoring

Type	Sm-8-C-PNP f. CGS2-64-380	Si-8-PNP
Item no.	118000422	11800011
Measuring principle	Magnetic field	inductive
Position sensing	Piston stroke	jaw stroke
Sensing distance [mm]	-	2
Connection type	0.3 m cable with M8x1 plug, 3-pin	M8x1 plug, 3-pin

L x W x H [mm]	292 x 115 x 115.5	292 x 115 x 172	292 x 115 x 172

Other technical data correspond to the basic variants (see table on the left).

CGS2-240 as high temperature version

Type	CGS2-240-1-VH	CGS2-240-1-FA-VH	CGS2-240-1-FI-VH
Item no.	150001113	150001115	150001116
Max. operating temperature [°C]	+130	+130	+130
Type	CGS2-240-2-VH	CGS2-240-2-FA-VH	CGS2-240-2-FI-VH
Item no.	150001114	150001117	150001118
Max. operating temperature [°C]	+130	+130	+130

Other technical data correspond to the basic variants (see table on the left).

Double check valve for air pressure preservation

Type	DSV-2 G1/8"
Item no.	152600000
Connection thread	2x G1/8"
Nominal volume flow [m³/h]	0.53

Sensors for position monitoring

Type	Sm-8-C-PNP f. CGS2-64-380	Si-8-PNP
Item no.	118000422	11800011
Measuring principle	Magnetic field	inductive
Position sensing	Piston stroke	jaw stroke
Sensing distance [mm]	-	2
Connection type	0.3 m cable with M8x1 plug, 3-pin	M8x1 plug, 3-pin

Drawings show views of the basic product but are valid for all product variants. The dimensions of the individual product variants can be taken from the tables on the previous pages.

List of abbreviations

Overview abbreviations CGS2 series

AB	Number of holes – gripper mounting standard	DPS	Diameter fit of lateral mounting holes gripper
ABSS	Number of holes – lateral gripper mounting	DSMG	Diameter counterbore mounting holes gripper
ALAS	Distance between optional air connections on lateral mounting surface	DSMGS	Diameter counterbore lateral mounting holes gripper
ALAU1	Distance 1 optional air connections on lower mounting surface	HALAS	Height of optional air connections on the side mounting surface
ALAU2	Distance 2 optional air connections on lower mounting surface	HGF	Height of gripper
AMB1	Distance between mounting holes gripper fingers (gripper open / closed)	HGK1	Main body height
AMB2	Distance between mounting holes gripper fingers	HGK2	Total height main body
AMG1	Distance 1 mounting holes gripper	HLA	Height of air connection
AMG2	Distance 2 mounting holes gripper	HMGS	Height of mounting holes gripper side
AMGS	Distance of lateral mounting holes gripper	HPHB	Height of centering sleeves gripper jaws
AMK1	Distance between mounting holes, customer-specific attachment 1	HPHG	Height of centering sleeves gripper jaws
AMK2	Distance between mounting holes, customer-specific attachment 2	HPHK	Height of centering sleeves, customer-specific attachment
BB	Width gripper jaws	LA	Distance between air connections
BGF	Width gripper	LGF	Length gripper
BTK	Width pocket of customized attachment	LGK	Body length
DLA	Air connection diameter	LTK	Length pocket custom attachment
DMB	Gripper finger mounting thread diameter	MGG	Mounting thread gripper
DMG	Diameter of mounting holes gripper	TDLA	Depth of diameter air connection
DMGS	Diameter of lateral mounting holes gripper	TDMB	Depth of diameter mounting thread gripper finger
DMK	Mounting thread diameter customer-specific attachment	TDMK	Depth of diameter mounting thread customer-specific attachment
DPHB	Centering bushes diameter gripper jaws	TMGG	Depth of mounting thread gripper
DPHG	Centering sleeve diameter body	TPS	Depth of fit lateral mounting holes gripper
DPHK	Diameter of centering bushes customer-specific attachment	TSMG	Depth of countersink mounting holes gripper
		TSMGS	Depth of counterbore lateral mounting holes gripper
		TTK	Depth of pocket custom attachment

Standard is not enough for us

Solution competence made to measure

Our standard components can easily be adapted to customer-specific requirements. Various attachments and accessories are available for this purpose.

For more complex applications, where the modification of standard components no longer offers a sensible solution, we design special components that are precisely tailored to your applications. Many years of experience help us to find a technically and economically fit solution for you – quickly and effectively.

**Special nozzle
changer for seam
sealing applications**

Personal consulting

We are happy to provide advice on our components and technologies. Benefit from the long standing experience of the IPR advisors.

01

CONSULTING

Our expert employees specifically address your wishes and requirements and offer you competent advice on your application. With over 30 years of experience in the production of high-quality components and systems, IPR supports and supplies its customers world-wide, thereby creating valuable customer proximity.

02

QUOTING & PROJECT PLANNING

In the next step, we develop a solution proposal for you and create a project plan in this context. This is followed by a cost-benefit optimization and a feasibility analysis. These include the technical designs as well as constructive tests by our engineering team.

**Complex
tool changer for
PVC applications**

03

**ENGINEERING
AND DESIGN**

Our engineers and designers are professionals in their field and have in-depth knowledge of all industries and processes. Our specialists implement individual projects professionally and on schedule look forward to first-class conception and implementation.

04

MANUFACTURING

A machine park equipped with the latest technologies and processes, great know-how in manufacturing as well as highly trained employees ensure that every single product is manufactured with the highest precision, quality and passion to your satisfaction.

05

ON SITE SERVICE

We offer you a unique support in every phase – even after commissioning: from maintenance and repair service to spare parts service and customer training on site or at IPR. Our professional services show that customer proximity is very important to us.
