# → Enclosure series proboxx

Modern, elegant and compact enclosure with a maximum of flexibility

- **Empty enclosures** page 10
- **M12 connection** page 11
- **IO-Link** page 15
- **AS-Interface** page 19
- **sWave® radio technology** page 23

## → The proboxx in detail

Particular attention was devoted to the design of the proboxx. Therefore, the screw fitting was deliberately placed on the bottom side, so the enclosure's appearance is not disturbed by exposed screw heads. This aesthetic detail corresponds with the added value of safety: The enclosure can not be opened without dismounting it. For the labelling of the pushbuttons and switches special labels have been developed which fit perfectly into the design and can be fixed easily by clipping on. The inscription is custom-made and engraved by lasering.

- high-quality, stable enclosure made of polyamide
- appealing design
- innovative mounting mechanism for base, wall and profile mounting
- asymmetrical placement on guard lockings
- screw fitting on the bottom
- labels to clip on (laser marked)
- degree of protection IP65
- dimensions
  - width 52 mm
  - height 44 mm
  - length 69 mm, 105 mm, 141 mm, 177 mm
- pushbuttons and switches
  - pilot lights
  - pushbuttons
  - selector/key switches
  - emergency-stop

## → proboxx: Synergy of design and function

Flexible, functional and elegant - these are the characteristics featuring our new enclosure series proboxx made in Dürmentingen. With the new product line we - the expert for pushbuttons and switches - are complementing our portfolio of enclosures by a particularly class and also practical variant making daily work easier.

We currently offer the proboxx as an empty or an assembled enclosure. The assembled variant is available for four different systems.

- Empty enclosure
- Assembled M12 enclosure
- Assembled IO-Link enclosure
- Assembled AS-Interface enclosure
- Assembled enclosure with sWave® radio technology

### **How to configure and order my proboxx**

Orders and individual assemblies of the proboxx can be submitted via the new Schlegel online configurator for enclosures. Based on your requirements, you can select an empty enclosure or an assembled one and choose the most suitable assembly for your application from a variety of sizes and systems.

→ [proboxx.schlegel.biz](https://proboxx.schlegel.biz)

### **Get started with the startboxx**

Would you like to get familiar with the proboxx now? Then simply order our startboxx! The startboxx is a fully functional proboxx equipped with 3 pushbuttons and switches. The proboxx is easy to connect via the M12 connector and can be used immediately.

### → Simple

Thanks to the new innovative mounting mechanism the enclosures are quick and easy to assemble. The enclosure is securely fixed by simply sliding and snapping it in.

### → Functional

- direct integration in IO-Link or AS-Interface systems
- asymmetric fixing for safety gates
- optional, flexible labelling option

### → Plug & Work

Simply to connect with M12 connector, no wiring necessary.

### → flexible

- up to 4 holes for pushbuttons and switches
- various connection options (M12, M16 cable gland, radio system)
- available as pre-equipped or empty enclosure

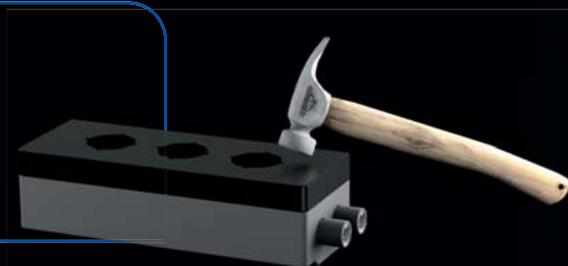

### → Valuable

Appealing, high-quality and modern design

### → Reliable

- stable plastic enclosure
- degree of protection IP65

### → Empty enclosure

- individual use
- with predetermined breaking point for M16 cable glands
- without predetermined breaking point for the use with radio systems or special connectors

### → Assembled M12 enclosure

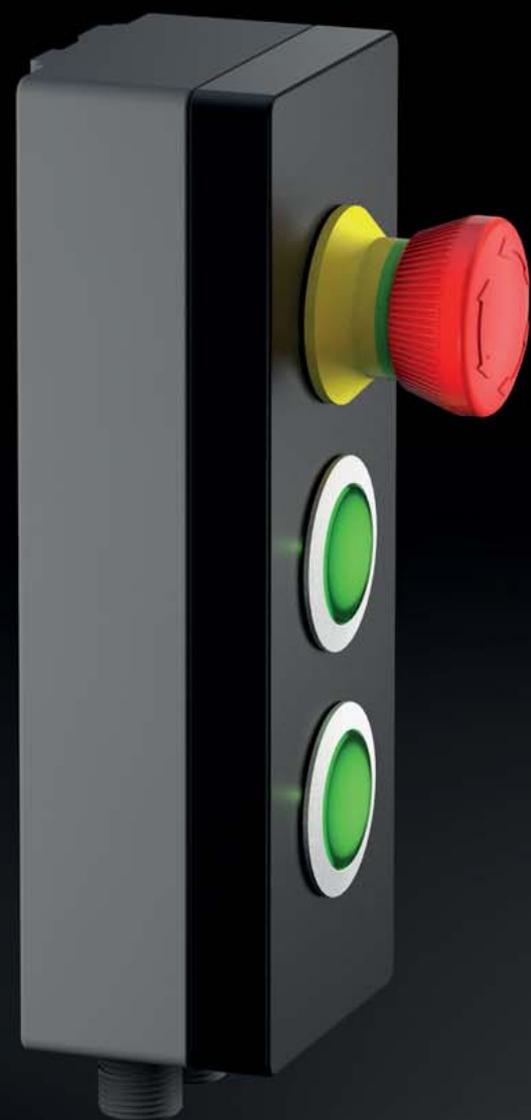

- for conventional wiring
- two M12 connectors
- the emergency-stop is connected separately via the second M12 connector

### → Assembled IO-Link enclosure

- IO-Link certified
- two M12 connectors (IO-Link / emergency-stop (AIDA))
- IO-Link status indication
- The following features can be parameterised:
  - dimming or night design of all LEDs
  - operating hours meter
  - monitoring of switching cycles (lifetime) of each pushbutton or switch
  - monitoring of the status indication

### → Assembled AS-Interface enclosure

- AS-Interface certified
- two M12 connectors (bus is looped through)
- AS-Interface status indication
- Safety@Work (emergency-stop)

### → Assembled enclosure with sWave® radio technology

#### Transmitter

- sWave® technology of steute
- frequency range 868 MHz (EU and China)
- bidirectional communication (transmitter electronics with long-life battery)
- LED for status indication (monitoring of switching states and battery)
- range of up to 450 m in the open field and up to 40 m indoors

#### Receiver

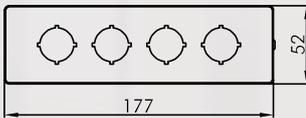

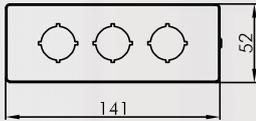

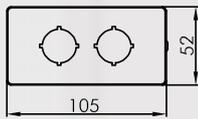

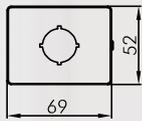

- sWave® technology of steute
- frequency range 868 MHz (EU and China)
- 4 potential-free relay outputs (NO)
- learning mode (assignment of outputs)
- LED status indication (switching states)
- range of up to 450 m in the open field and up to 40 m indoors
