

Packaging Line Semi-Automatic

CT 300 Carton Erector
CT 403 SD Taping Machine
Ampag Speed TR Strapping Machine

The semi-automatic packaging line, consisting of the CT 300 carton erector, the CT 403 SD case sealer, and the Ampag Speed TR strapping machine, provides an ideal solution for automating packaging processes. This combination is particularly cost-effective, fast, and efficient, offering companies the opportunity to significantly optimize their packaging operations. Through automation, labor costs are reduced, and resources are used more efficiently, while minimizing the need for manual intervention and reducing potential sources of errors.

Thanks to the high precision of the machines, consistent packaging quality is ensured. The CT 300 reliably erects cartons, the CT 403 SD ensures precise taping, and the Ampag Speed TR straps the carton in the shortest time.

The packaging line is available either as a complete solution or in individual components, allowing companies to tailor the solution exactly to their specific needs and production requirements. Additionally, the systems can be easily integrated into existing production lines, enabling step-by-step automation without the need for a complete overhaul of the entire system. The solution is suitable for small to large production volumes and can be further scaled up as needed.

CT 300

- ✓ Automatic guidance on the gluing machines
- ✓ Roller conveyor
- ✓ Stainless steel

CT 403 SD

- ✓ Compatible with 50 mm Paper or PVC Adhesive Tape
- ✓ Side driven belt system for box movement
- ✓ Up to 1.200 cartons/hour
- ✓ Top and bottom sealing

AMPAG SPEED TR

- ✓ For paper and PP strap
- ✓ Up to 65 cycles/min
- ✓ Adjustable strap tension
- ✓ Automatic ejection
