

Electro hydraulic actuators for industrial valves

On/Off, Modulating and Fail Safe

For all applications with high demands on safety, speed, thrust and accuracy.
As well as durability and low maintenance.

ATEX / SIL / MRL / ISO9001

Compact self contained Single- and double acting with hydr. power pack

Our actuator consist of a small hydraulic power unit with valve technology and a quarter turn or linear unit. On site, only an appropriate electrical connection is necessary. Due to the robust design with closed oil circuits, the actuator need very low-maintenance only.

Our actuators are designed for valve automation in the oil&gas, steam and water sectors. We are able to supply you with a complete package with valve and process control software.

We have more than 20 years of experience in the actuator business and a large number of confident customers and installed systems all over the world.

Norms and directives:

- ISO 9001:2015
- ATEX 2014/34/EU
- MRL 2006/42/EG
- EN ISO 12100 / ISO13849
