

At the forefront of technology.

Global supplier of innovative custom interconnect solutions.

MAGNETIC POGO CONNECTORS

A range of reliable, precision machined interconnect solutions capable of 30,000 mating cycles.

- Magnets increase the reliability of connection and provide polarisation.
- Spring loaded contacts allow quick mating and unmating process and maintain connection in all environments with a stable current flow.
- Precision machined contacts provide a high quality, low resistance connection.
- Assembled in high temperature thermoplastic to form connector arrays.
- Functional 'tear away' design prevents damage caused by unintended disconnection.
- Up to 30,000 mating cycles; ideal for test environments and consumer electronics.

CUSTOM DESIGN & MANUFACTURE:

We pride ourselves on our flexible approach to meet specific customer requirements.

Whether it is basic modifications to an existing product or a clean-sheet design requiring high or low volume production, we can supply prototypes in as little as 4 weeks, with full concept to production in 12 weeks if required.

- **Free of charge samples**
- **No sample tooling costs**
- **MOQ as low as 200 pieces**
