

elephantboard

The elephantboard is a heavy-duty and multi-functional transport trolley with a load capacity of up to 1000 kg and carries various load sizes and SCLs.

The shelves are made of 5 mm thick plastic sheets, which makes it extremely impact-resistant. Plastic is also the ideal material as it is weatherproof, flame retardant and temperature stable.

With the elephantboard moving heavy loads is extremely easy. The modular system makes it also very resilient and versatile.

Various footprints and sizes are available upon request – contact us for more information!

Key benefits

- ✓ Improves work flow and reduces handling costs
- ✓ Easy and safe to handle
- ✓ Designed for easy maintenance and high resistance to damage
- ✓ Enables transport of various size items
