

FOR IMMEDIATE RELEASE

Telemecanique Sensors Celebrates **100 Years** of Innovation in Sensing and Industrial Automation

Angouleme, France – 17th February 2025 – Telemecanique Sensors, a brand renowned for its expertise in sensing and industrial automation solutions, is celebrating its centennial anniversary. This remarkable journey began in 1924 with the creation of the first Limit Switch. This milestone marks a century of groundbreaking achievements: Michel Le Goulllec created the Manufacture d'Appareillage Electrique, which became La Télémécanique Electrique in 1928, the brand has evolved into a global leader in industrial sensing technologies.

Over the past century, Telemecanique Sensors has established itself as a **pioneering** force in the sensors industry, consistently **ranking among** the top 10 sensor specialists worldwide. Key milestones include when André Blanchet patented the first bar contactor in 1928, a major innovation that marked the beginning of the production of contactors and other electromechanical devices followed by global expansion during the 1960s and 1970s. In 1988, Telemecanique became part of the Schneider Group, further strengthening its leadership in the industry. In 2009, it integrated into Schneider Electric's brand portfolio, which helped enhance its capabilities and resources for innovation.

In 2023, the Telemecanique Sensors brand took another significant step by becoming part of YAGEO Group, positioning itself for future growth in an evolving market. This transition underscores the brand's ongoing commitment to innovation, ensuring its place at the forefront of industrial automation solutions.

*"As we celebrate this centenary, we not only honor our storied past but also embrace the exciting opportunities ahead," said **Claudio Lollini, Head of the Sensors Product Business Group at YAGEO Group**. "Integrating Telemecanique Sensors into our portfolio has been a transformative milestone for YAGEO Group. This union enhances our global presence in the sensor market and our commitment to innovation, positioning us as a partner of choice as we strive to be among the top five sensor specialists worldwide."*

Telemecanique Sensors has always distinguished itself through its diverse range of high-quality products and a client-centric approach. Recent innovations, including the Miniature Photoelectric Sensors and the XUY photoelectric roller sensor, reflect the brand's ongoing dedication to improving operational efficiency and meeting the evolving needs of industrial clients.

As we move forward, Telemecanique Sensors remains dedicated to a culture of innovation, collaboration, and sustainability, ready to address future challenges and capitalize on new opportunities.

Join us in celebrating our legacy of excellence and our continued commitment to innovation in industrial automation.
