TYROLIT GROUP 2

The Tyrolit Group

Tyrolit is one of the world's leading manufacturers of grinding and dressing tools as well as a system provider for the construction industry.

Since 1919, our innovative tools have made an important contribution to the technological development in many industries. Tyrolit offers tailored grinding solutions for various applications, as well as a comprehensive assortment of standard tools for customers all over the world.

Headquartered in Schwaz (Austria), the familyowned business combines the strengths of being a part of the dynamic Swarovski Group with a century's worth of individual corporate and technological experience.

Tyrolit headquarters in Schwaz (Austria)

Facts & Figures

80,000+ products

30+ production locations

4,500+ employees worldwide

140+ countries within our reach

500+
international patents

Sales companies in Argentina, Australia, Austria, Belgium, Brazil, Canada, China, Czechia, Denmark, Estonia, Finland, France, Germany, Hungary, India, Indonesia, Italy, the Netherlands, Norway, Poland, Portugal, Russia, South Africa, South Korea, Spain, Sweden, Switzerland, Thailand, the UAE, the UK and the USA. Distributors in 65 other countries.

THE WORLD'S BEST CUT-OFF WHEEL

CERABOND X Cut-off wheels

for steel and stainless steel

Type no.	Dimension	Specification
34690818	115 × 1,0 × 22,23	CA60Q-BFPX
34690817	125 × 1,0 × 22,23	CA60Q-BFPX

YOUR ADVANTAGES

- + 25% more cuts
 than comparable brand
 products
- + Extreme cutting ability
 thanks to the self-sharpening
 ceramic grain.
- Longest service life thanks to airtight packaging

www.tyrolit.com

FEEL THE POWER OF MAKING

Reach your goal faster with **CERABOND products from Tyrolit**

Our self-sharpening ceramic abrasive is among the best that the technology currently has to offer. However, the best grain in the world is only of limited use if the quality of the bond is not as high.

This is why Tyrolit developed the CERABOND system! Using this technology, we have succeeded in achieving an optimal combination of ceramic grain and bond structure. Thus it is possible to keep the abrasiveness and the lifetime of the cut-off wheel at the highest level. The CERABOND system prevents premature break-out of the grain and thus guarantees the full grinding power of the individual grains.

Shorter work processes
 Working times are substantially reduced through improved abrasiveness.

+ Longer lifetime

The unique bond system prevents the premature break-out of the grain and leads to a long product lifetime.

+ Enhanced abrasiveness

The self-sharpening ceramic grain in combination with our CERABOND bonding system offers maximum stock removal on the workpiece.

Stock removal rate

Discs at STANDARD level with good performance

Discs at PREMIUM level with very good performance

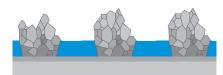

CERABOND SYSTEM

With a normal bond it is not possible to thoroughly bind the hard and brittle grain.

The CERABOND technology enables optimal bonding of the ceramic grain.

CERABOND X Cut-off wheels

for steel and stainless steel

+ Shortest cutting times due to the structure of the ceramic grain used

 Extremely sharp cut-off wheel enables the user to work very comfortably and with little effort

 Very long lifetime on hard and demanding materials

Application:

- + For machining different steel and stainless steel grades
- + For cutting very hard, challenging workpieces and solid materials

We recommend:

- + 1.0 to 1.6 mm for fastest cutting and minimum burr formation
- + 2.0 mm for long lifetime and maximum stability
- + Best results when used on powerful angle grinders

CERABOND X Cut-off wheels

for rail cutting

 Shortest cutting times and comfortable working with low effort

 Cleanest surfaces without any discolouration reduce rework and working times

 Very long service life and stability Best results even with humidity, cold and temperature fluctuations

Application:

- + For cutting rails
- + Developed for use on manual cut-off machines with electric or petrol engines

We recommend:

- + Use only on well-maintained and powerful machines (> 5 kW)
- + Developed for use on manual cut-off machines with electric or petrol engines

CERABOND X Cut-off wheels

for cast iron

+ Excellent lifetime and stability

Shortest cutting times and comfortable working with low effort

+ Highest aggressiveness over the entire lifetime

Application:

- + For machining various cast materials, such as lamellar graphite cast iron and spheroidal cast iron
- + For cutting very hard, demanding workpieces and large cross-sections

We recommend:

+ Best results when used on powerful angle grinders

CERABOND X Cut-off wheels

CERABOND X rough grinding wheels

for steel and stainless steel

- Fastest grinding thanks to the structure of the ceramic grain used
- Consistent abrasiveness thanks to the combination of the new bond system and ceramic grain

+ Maximum lifetime and therefore fewer wheel changes for the operator

Application:

Ideal for grinding hard steel and stainless steel surfaces, for example edge grinding, surface grinding or removing welding seams

We recommend:

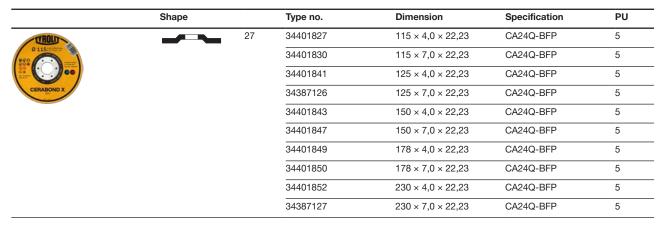

- + 4 mm thickness for peripheral grinding
- + 7 mm thickness for rough grinding
- + Best results when used on powerful angle grinders

CERABOND X rough grinding wheels

CERABOND X COMFORT rough grinding wheels

for steel and stainless steel

- + Fast grinding due to the structure of the ceramic grain used
- Consistent aggressiveness thanks to combination of new bond system with ceramic grain

 Less pressure required thanks to excellent cutting ability

+ Maximum working comfort over the entire lifetime

Application:

+ For demanding applications on various steel and stainless steel qualities, e.g. edge grinding, surface grinding or removal of welding seams

We recommend:

Developed for increased working comfort and applications with low grinding pressure

CERABOND X COMFORT rough grinding wheels

	Shape	'	Type no.	Dimension	Specification	PU
TROUT		27	34645085	178 × 7.0 × 22,23	CA24P-BFP	5
0 178 mm			34611111	230 × 7.0 × 22,23	CA24P-BFP	5

CERABOND X rough grinding wheels

for cast iron

- Fastest grinding due to the structure of the ceramic grain used
- Consistent aggressiveness thanks to combination of new bond system with ceramic grain

- Extensive lifetime and best results without edge chipping
- Developed for high pressure in the most difficult conditions

Application:

 For the most demanding applications on cast iron with lamellar graphite (GJL) and spheroidal cast iron (GJS), for surface grinding as well as for deburring and smoothing work

We recommend:

+ Optimised for high-frequency and compressed air-driven turbine angle grinders

CERABOND X rough grinding wheels

CERABOND X COMFORT rough grinding wheels

for cast steel

 Fast grinding due to the structure of the ceramic grain used

 Consistent aggressiveness thanks to combination of new bond system with ceramic grain

 High working comfort thanks to excellent cutting ability over the entire lifetime

+ Edge chipping is reduced to a minimum

Application:

+ For demanding applications on cast steel, for surface grinding as well as for deburring and smoothing work

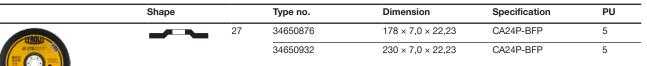

We recommend:

+ Optimised for high-frequency and compressed air-driven turbine angle grinders

CERABOND X COMFORT rough grinding wheels

for cast steel

CERABOND X flap discs

for steel and stainless steel

 Thanks to its ceramic grit and unique bond system, it offers a 30% higher stock removal rate compared to its predecessors.

+ Trimmable core in the 28N shape means that the entire disc can be used

 Unique bond system prevents premature grain break-out and permits maximum lifetime

Application:

- + For demanding grinding applications on different steel and stainless steel grades
- + Best suited for surface grinding, edge grinding and removing welding seams.

We recommend:

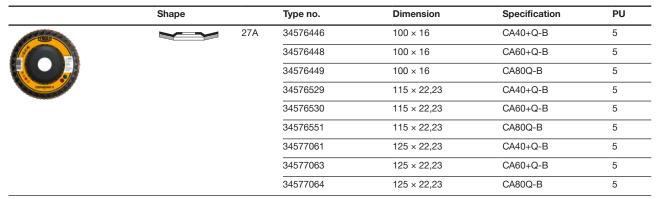

- + Grit size 40/60 for high stock removal
- + Grit size 80 for fine work
- + Best results when used on powerful angle grinders

CERABOND X flap discs

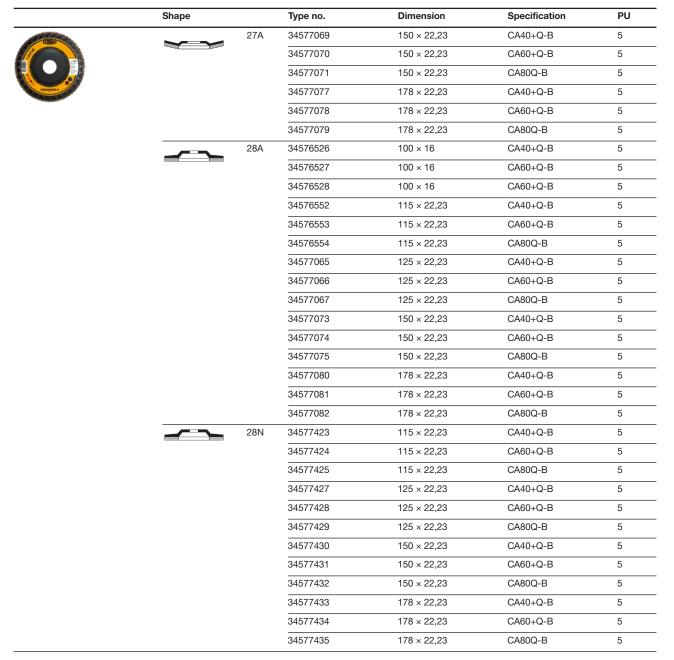

CERABOND X flap discs

CERABOND X fibre discs

for steel and stainless steel

+ Extremely fast stock removal thanks to a unique grain structure

 Cooling layer for maximum lifetime

+ Consistent abrasiveness

Application:

+ For coarse grinding work as well as for removing rust and burrs from hard steel and stainless steel surfaces

We recommend:

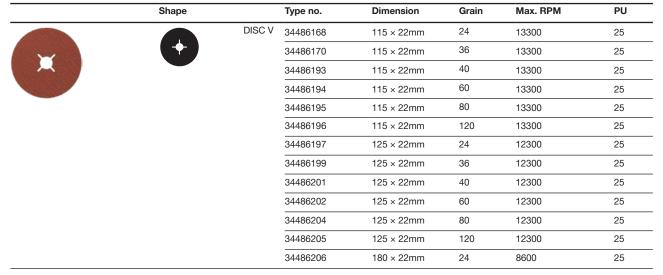

- + Grit size 24/36/40/60 for maximum stock removal
- + Grit size 80/120 for fine grinding

CERABOND X fibre discs

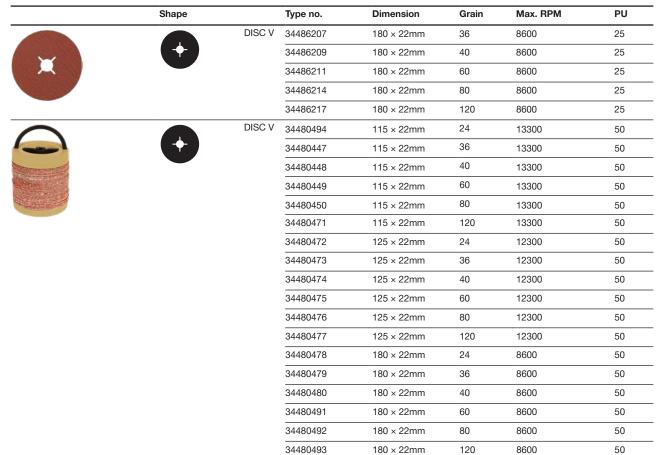

CERABOND X fibre discs

CERABOND X natural fibre discs

for steel and stainless steel

+ Extremely fast stock removal thanks to a unique grain structure

+ Cooling layer for maximum lifetime

+ Consistent aggressiveness and durability

Application:

+ For coarse grinding work as well as for removing rust and burrs from hard steel and stainless steel surfaces

CERABOND X natural fibre discs

CERABOND X belts

for steel and stainless steel

 Highest possible stock removal thanks to the use of ceramic grain

 Self-sharpening grain for constantly good surface result combined with reduced operator workload

+ Coolant layer for very cool grinding

Application:

+ For grinding regular and hard steel and stainless steel using belt grinders

We recommend:

- + Grit size 24/36/40 for maximum stock removal
- + Grit size 60/80 for a perfect surface finish
