

**YOUR PARTNER
IN POLISHING**

ALUMINIUM POLISHING

Polished aluminium sheet and plate is often anodised to ensure a surface suitable for external applications. The colour of the final product after anodising can be affected by the polish that we apply to the surface finish.

From a Coarse Ground grained finish to a Bright / Mirror Finish we are experienced in working with stockholders and anodisers to ensure the end product meets your client's needs and vision.

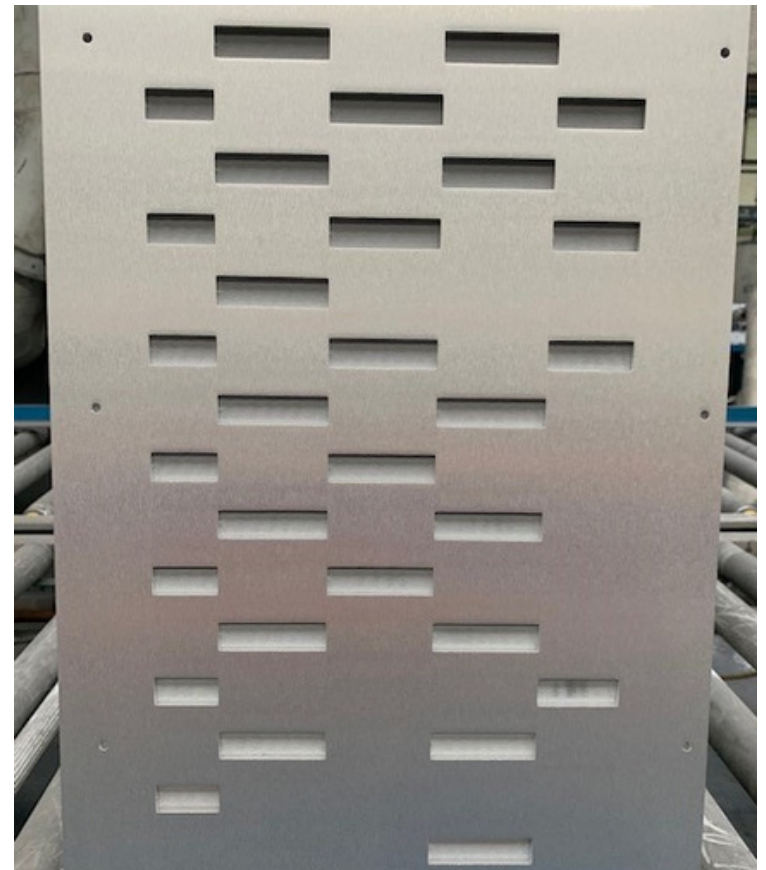

For more information talk
to our Commercial Team.

+(44) 121 555 6569
