

**YOUR PARTNER
IN POLISHING**

CIRCLE FINISHES

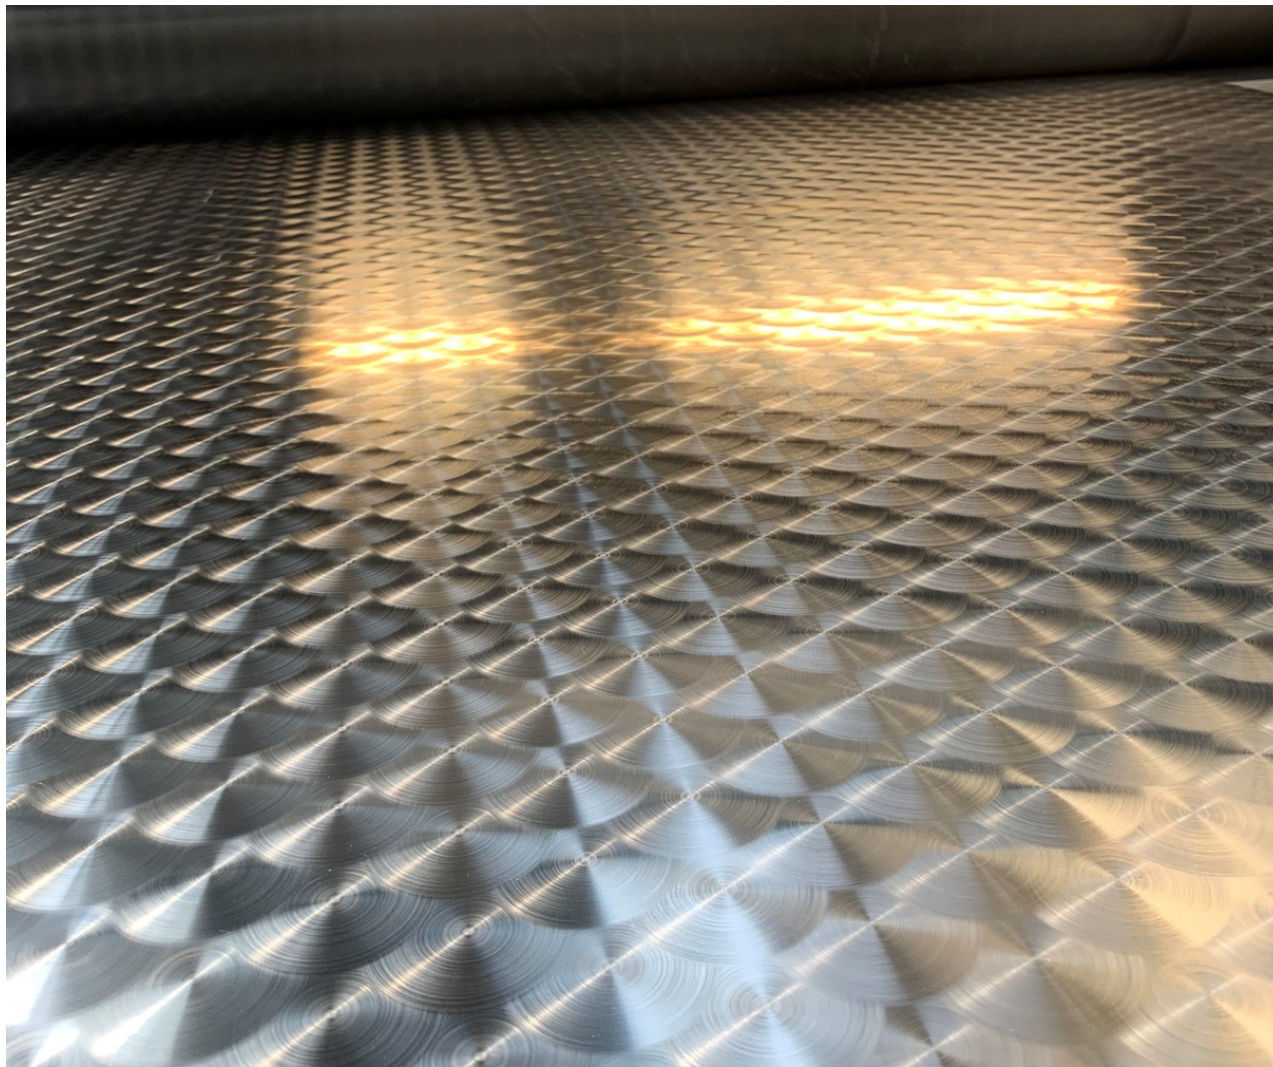

Circle Polishing has become the default finish for fish and chip counters and food trucks. It's patterned finish is fun and hygienic and forgiving of scuffs. Other uses include tanks for the wine and dairy industries and it's ideal for these applications for traceability.

Our standard Circle Finish is a 50mm dia with a 50% overlap although we can also offer a 75% overlap for a more intricate fan effect. We can also adjust the finish to produce a wave pattern, giving your project something truly unique. We have multiple lines producing up to 2000mm wide.

**For more information talk
to our Commercial Team.**
