MELISSAFARM HONEYS

Our love for the nature, for an original way of life and for natural products, led us to picturesque village of Ancient Epidaurus 20 years ago. With patience and persistence, with inspiration and vision for the precious products of the beehive THE HONEY, we create a small apiculture farm in Ancient Epidaurus, the Melissafarm.

The earth of Epidaurus, rich in flora, offer us the raw material: citrus fruits, wild lavenders, thyme, savory, sage pines, carob trees.

In this rich earth of Peloponnesus, we produce our honeys : Orange blossom [Great taste Awards 2020], Wild flowers Thyme Honey [GOLD INTERNATIONAL AWARD MTA 2021], Pine Heather [SILVER INTERNATIONAL AWARD MTA 2021], Chestnut Fir, Carob [Great taste Awards 2020], polyflora Pollen and Royaljelly.

Moreover, we have create honey spreads with Chestnut Butter, Almond butter, Sesame butter, peanut butter and Pistachio butter and cocoa [Great taste Awards 2020] and Crème de miel. All these products are highly nutritious value with no preservatives, no additives and perfumes.

In parallel, we cultivate aromatic herbs (such as oregano, rosemary, lavender, sage, thyme etc.) and we create botanical herbal teas.

Our vision is that all our products be premium quality & safe to use, pure in their composition, attractive in appearance and satisfies the need

Melissafarm
