SOAPING THERAPY

The Greek Handmade Natural Soaps Collection

MORE THAN SOAPS

SoapingTherapyNaturalSoaps

SOAPING THERAPY

THE GREEK HANDMADE SOAP COLLECTION

The Soaping Therapy Handmade Natural Soaps are prepared based on pure Greek olive oil and completely natural ingredients, to protect skin and give it health purity, freshness, shining day after day!

They do not contain chemical ingredients dangerous to health and the environment that we usually find in commercial soaps. Specifically, they do not contain Parabens, Sodium Lauryl Sulfate, Propylene glycol Phthalates, NM, PCM, MIT Triclosan, DeA.

The cold saponification process we use, dates back to the 17th century! It differs significantly from the hot method - which is widely used in most soaps - in the fact that here the soap stays and matures for 45 whole days before packaging, so the caustic soda is converted into Glycerin completely Natural, rich in Moisturizing properties with great Cosmetic value!

In addition, the cold process allows us to add to our recipes precious oils and herbal extracts, fruits & fruit juices, essential oils and clays, exfoliants and milk, making our soap very rich in ingredients, beneficial in properties for safe daily use by the whole family!

The specialized knowledge that we constantly acquire across the way, allows us to produce soaps in a variety of recipes aiming at individualized needs of cleansing and hydration.

Let us give ourselves the luxury of a high quality natural soap and let us enjoy the touch of nature on our skin.

We are a small group of people, who have chosen a natural way of life with a healthy diet and exercise. We strongly believe that the selected food can be our medicine, and the responsible care of our health is essential for a quality life.

Our involvement with Handmade Natural Soaps started as a necessity to create pure cleansing and moisturizing products, free from dangerous chemical additives, for ourselves and our families.

The raw materials we use are always of excellent quality. Cretan & Peloponnesian Olive oil, vegetable oils, products of the Greek land such as essential oils, herbs, honey, goat milk & donkey milk, clays, fruits and juices, and many more.

The whole production that takes place is purely handmade and natural; it is made with the traditional cold method process, the soap then matures for long, so the natural produced Glycerin remains in it, offering the maximum cosmetic value.

Our effort was quickly embraced so enthusiastically that we have created a wide range of cosmetic soaps under the brand:

SOAPING THERAPY NATURAL SOAPS

The expert knowledge that we constantly obtain allows us to easily produce tailor made recipes.

Our soaps have been produced with meticulous care and great dedication, will fully satisfy your needs and perfectly match with your high aesthetic standards that characterize you as sophisticated consumers.

Enjoy our Hellenic land pure richness and allow a generous healthy touch of freshness, on your body.
