## *Complete EYE & LIP treatment*

Years ago, our team of chemists began a research project. Their mission: to develop a master formula that could **eliminate the tiny wrinkles caused by ageing that surround the eyes and lips.**

*Soberbia contour* is the result of microchemistry in our labs: a combination of countless new molecules that form amino acid chains, generating innovative and ultimate effective peptides.

For the first time in non-invasive cosmetics, it can **reduce bags under the eyes and eliminate almost all age-related wrinkles around the eyes and lips.**

The result is rejuvenated, wrinkle-free skin and a smoother, firmer complexion.

# The Formula

ul<sup>®</sup> biocomplex

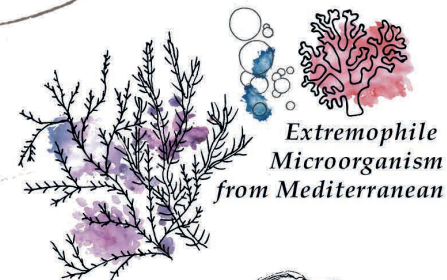

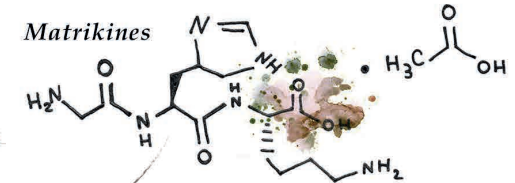

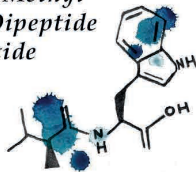

Caffeine

## *Its recommended application at night*

As the complex contains oils, we recommend that it should **be applied at night** by gently massaging it around your eyes and lips until it is completely absorbed. Always apply it **after removing make-up** and preferably **after cleaning** so that the product can penetrate more easily.

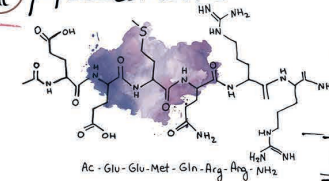

In just four nights, your face will be free of micro-wrinkles, giving you a younger-looking complexion with fewer signs of aging.
