# Temperature sensors for railway application

The service range of Paul Rüster & Co. GmbH offers development, engineering, manufacturing, calibration and distribution of sensors and components for temperature measurement devices.

Our family company is a synonym for reliable individual solutions, for innovation and flexibility as well as high quality.

We are regularly audited by our customers and evaluated by various accredited test centers.

Rüster temperature sensors provide easy installation and a long service life.

Additionally we provide calibrations according to customer demands in our in-house laboratory.

Benefit from our knowledge.

## Features:

- Shock & vibration EN 61373
- Fire protection acc. EN 45545-2
- 100% routine inspection
- High-voltage test
- Certified to DIN EN ISO 9001
- RTD's in 2-,3- or 4-wire circuits
- Customized solutions
- Temperature range -55°C to +450°C
- Made in Germany
- Available in explosion-proof versions

Our team will gladly assist you with configuring your sensors.
