

CHEMUK2026

The Supply Chain Expo & Speaker Programme for the UK's Chemical Industries

OPENING HOURS

Day 1

Wednesday 20th May
09.30 – 17.00

Day 2

Thursday 21st May
09.30 – 16.00

20TH & 21ST MAY 2026, THE NEC, BIRMINGHAM, UK

SHOWNEWS

1 EXPO 5 SHOW ZONES 550+ EXHIBITORS 150+ SPEAKERS & PANELS

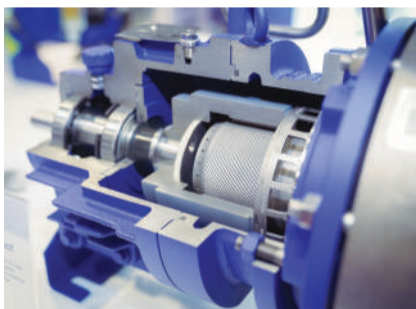

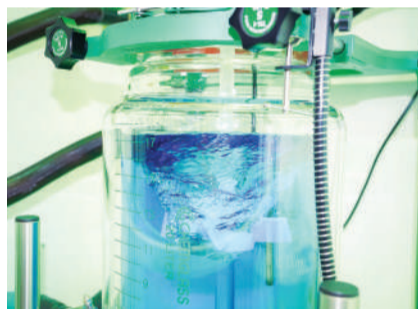

NETWORKING APP LAUNCHED FOR LARGEST EVER CHEMUK TRADE SHOW

Welcome to our feature preview of this year's CHEMUK 2026 Group of Events, that will be running on 20th & 21st May at the NEC in Birmingham. CHEMUK 2026 is the UK's largest trade show for the chemical, formulated product, and process sectors.

The event gives the entire supply chain the opportunity to come together to experience the latest products and solutions that are entering the market and understand the trends and

regulations that are driving demand patterns and affecting today's chemicals industries. This year, visitors will be able to download the brand new CHEMUK App allowing attendees to pre-arrange meetings, plan their schedule, join networking events, and lots more.

Please check out our website for latest announcements and news. We look forward to welcoming you this May.

CHEMICAL LABORATORY SHOW

Showcasing specialist laboratory chemicals and equipment suppliers supporting R&D, analysis, process design and development, scale-up, and quality testing.

CHEMICALS SUPPLY SHOW

Meet chemical manufacturers and distributors supplying to the commodity, speciality, and fine chemical manufacturing sectors, as well as the downstream industries.

CHEMICALS MANAGEMENT SHOW

Meet specialist organisations providing solutions covering chemical logistics; storage, labelling, and packaging; HSE management and regulatory compliance, and more.

PROCESS & CHEMICAL ENGINEERING SHOW

Experience the latest process engineering technology and services supporting plant, process, and control engineers from across the process industries.

FORMULATED PRODUCT MANUFACTURER SHOW

Supporting formulated product manufacturers providing ingredient sourcing, contract manufacturing, mixing & blending services, packing and labelling, and much more.

REGISTER FOR YOUR FREE VISITOR PASS! BRING YOUR TEAM TO CHEMUK

550+ EXHIBITORS

CHEMUK 2026 is the marketplace to find suppliers, solution providers, and expert partners, meeting the sector's materials, equipment, plant, and innovation needs under one giant roof. See a full list of exhibiting organisations on page 8.

2-DAY SPEAKER PROGRAMME

The speaker programme will present over 150 expert presentations and panel sessions addressing the biggest topics, trends, challenges, and opportunities influencing and shaping today's chemical and formulated product sectors.

NEW CHEMUK NETWORKING APP

The new CHEMUK app brings opportunities to establish new connections before even setting foot on the show floor. This is easily done through the matchmaking tool, which determines your top connections to give you best visibility in expanding your network.

PANEL DISCUSSIONS

Join the discussion! CHEMUK 2026 will host an expert series of panel discussions, featuring sessions from **Innovate UK, Chemical Business Association, Henry Royce Institute, NEPIC, IChemE, IMechE, CPI, RSC, British Plastics Federation**, but to name a few...

INNOVATION SUPPORT

Several of the UK's key innovation support organisations will be exhibiting and participating at CHEMUK. Startups and spinout entrepreneurs will be able to speak with support teams from **CPI, Henry Royce Institute, Bio Renewables Development Centre**, and many more.

UK GOVERNMENT AT CHEMUK

UK Government will be exhibiting and speaking at CHEMUK through several departments. Attendees will be able to join the annual UK landscape briefing at 12.00 on Wednesday 20th May, and liaise with international trade advisors on the show floor over the two days.

FEATURE DISPLAYS

CHEMUK 2026 will invite industry features from across the supply chain demonstrating the very latest technological advancements from next generation vehicular exhibits to interactive simulations that attendees will be able to experience during their visit.

INDUSTRY SUPPORT

CHEMUK 2026 is proud to be supported by some 50+ leading trade, technical & professional bodies PLUS specialist media across the broad chemicals landscape - inc **IChemE, Royal Society of Chemistry, Chemical Business Assoc, BASA**, plus many more.

SAFIC-ALCAN DEBUTS CLARIANT'S ECO-EFFICIENT TEXCARE™ ONE TERRA FOR CONCENTRATED LAUNDRY APPLICATIONS

Safic-Alcan, Stand M130

TexCare™ One Terra by Clariant is a soil-release polymer for high-concentrate

laundry liquids and capsules. It optimises formula stability for resource-efficient packaging and cold-wash cycles. Key benefits: superior soil release for easier future washes, whiteness maintenance via anti-redeposition, and energy-saving performance. It features a 74% Renewable Carbon Index, supporting the circular economy. Visit Safic-Alcan at CHEMUK 2026 to discover how it enhances your next formulations.

NEW EXHIBITOR

AGILITY MINERALS EXHIBITING AT CHEMUK FOR THE FIRST TIME

Agility Minerals, Stand M134

We provide technical expertise in the field of industrial minerals and chemicals,

with support for product development and production. We are proud of our proactive customer service and efficient logistics. Representing Hoffman Mineral, Kaomin, Perlipol, Akpa, Gee Cee, Akripol, and Rubaloy in the United Kingdom.

PRESENTATION

FROM SOIL TO SURFACE: HOW CLEANING MECHANISMS SHAPE FORMULATION DESIGN

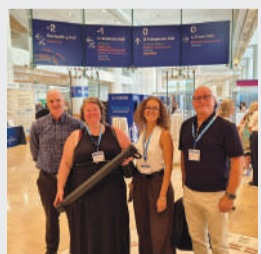

THUR 21 MAY
STAGE 3 / 13.30 -13.45

Speaker:
Ashley Quigley, Technical Development Manager - HI&I - Surfachem

PRODUCT STEWARDSHIP & REGULATORY CONSULTING

Penman Consulting, Stand C126

Penman Consulting provides Product Stewardship and Global Regulatory services, including UK and EU REACH and Only Representative

support. Based in the UK and Brussels, with over 20 years' experience and our Active Steward™ platform, we enable compliance and market access for globally integrated supply chains.

RELIABILITY THAT DELIVERS

Univar Solutions, Stand C104

Bringing together a full portfolio of chemistries with robust global logistics network to provide best in class, local service.

We understand the local and regional market needs of our customer base, leveraging our knowledge and network to provide individualized customer support.

LEADING THE WAY IN DISTRIBUTION!

Tennants Distribution Ltd, Stand E130

Tennants Distribution Ltd is a leading independent distributor of chemicals based in the UK. We have a network of strategically located depots offering a nationwide delivery service. Our Export and Freight Forwarding divisions offer Worldwide reach, and through our Group operations in China and India.

PRESENTATION

LIGNIN EMERGING AS A NEXT-GENERATION CHEMICAL FEEDSTOCK

THUR 21 MAY - STAGE 2 / 14.15 -14.30

Speaker:
Thomas Bithell,
Technology Analyst - IDTechEx

INNOVATING SPECIALITY CHEMICALS FOR A BETTER TOMORROW

Newport Industries Ltd, Stand G130

Newport Industries is an EcoVadis rated chemical distributor operating from a

BRC accredited facility in Liverpool. With our own 5 acre deep water terminal, we combine automated high speed packing lines with advanced robotic palletisation to deliver exceptional supply security and fast, reliable distribution. We provide competitive pricing by leveraging bulk purchasing, lowering the cost of key chemicals. Supporting multiple sectors: Feed, Food, Adhesives and Environmental services.

KEYNOTE

REDEFINING SOLVENT INNOVATION FOR TOMORROW'S CHEMISTRY: DRIVING CIRCULARITY THROUGH BIO-BASED SOLUTIONS

THUR 21 MAY
STAGE 3 / 11.40 -12.00

Speaker:
Jeffrey Whitford, Vice President of Sustainability and Social Business Innovation, Merck Life Science

PROVIDING THE FULL PACKAGE FOR WWT SOLUTIONS

OMEX Environmental Ltd, Stand G132

Growing since 1976, OMEX Environmental are your trusted partner in waste and wastewater treatment

solutions. We provide solutions to help industry optimise its' processes, from treatment of acidic WWT to biological additives. We also offer our bespoke dosing systems as well as ongoing technical support.

NEW EXHIBITOR

BOUD MINERALS

BOUD MINERALS, Stand L146

Boud Minerals is a UK processor and supplier of specialist sands,

decorative and functional minerals, and lightweight fillers. Founded in 1984, we use decades of expertise in blending, coating, processing and packaging to deliver tailored solutions that simplify handling and production. We supply own-label products to major dry-mix manufacturers, offer packing from small containers to bulk delivery, assemble kit-based goods while operating to ISO 9001 and ISO 14001 standards.

ADVANCED OLEOCHEMICAL ADDITIVES TRUSTED ACROSS GLOBAL MARKETS

FACI Group, Stand F146

FACI Group is a global oleochemical manufacturer with over 80 years of experience supplying high-performance additives to a diverse range of industrial and specialist applications. With multiple production sites worldwide, FACI delivers innovation, quality, and sustainable solutions to customers across international markets.

REGULATORY AND DATA MANAGEMENT SERVICES FOR SAP S/4HANA TRANSFORMATION

knoell, Stand F150

Build a strong foundation for SAP S/4HANA® success with knoell's product safety and regulatory expertise. As organisations

prepare for and progress through SAP S/4HANA transformation projects, ensuring reliable product safety & stewardship processes and compliant regulatory data is critical. knoell supports companies across SAP transformation initiatives with dedicated expertise focused on data quality, compliance readiness and long-term system usability.

DRIVING INNOVATION WITH BIO-BASED SURFACTANTS

Lankem, Stand C122

Lankem's BioLoop surfactants are 100% renewable, ultra-mild nonionic surfactants delivering excellent detergency, wetting and

tailored foaming. Offering sustainable alternatives to synthetic nonionics, they perform effectively across a wide range of applications.

SHOWCASING OUR FINE CHEMICAL, PHARMA AND NUTRACEUTICAL MANUFACTURING CAPABILITIES IN UAE AND INDIA

I-novamolecules, Stand L142

Our company have manufacturing capability and innovation at it's core. We provide materials to our customers at the highest quality at the most reasonable price utilising our expertise, plant capacities in two countries and global supply chain to become partner of choice. Come and talk to us about our plants in UAE and India and how we can collaborate with you.

COMBINING THE BEST OF DISTRIBUTION WITH MANUFACTURING

Plater Group, Stand G152

Plater Group has evolved from a distributor to a hybrid distributor-manufacturer, combining the key skills of distribution, sales,

purchasing & logistics with our production facilities, laboratory, liquid & powder blending.

PRESENTATION

PFAS EMISSIONS MANAGEMENT USING SURFACE-MODIFIED GAC (GRANULAR ACTIVATED CARBONS) - "SEARCH, CAPTURE & DESTROY"

WED 20 MAY
STAGE 4 / 15.15 - 15.30

Speaker:
David Reay, Head of Strategic Partnerships - Puragen

SUSTAINABLE SPECIALTY CHEMICAL SOLUTIONS FOR UK MANUFACTURING

Heterochem UK, Stand E142

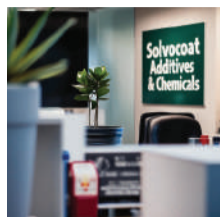

Heterochem is showcasing its latest portfolio of innovative specialty ingredients, specifically

tailored for the Functional Food, Animal Nutrition, and Cosmetic industries. Partnering with global manufacturers, we provide bespoke technical support and sustainable raw materials to enhance product performance. Visit us to explore our curated range of additives and functional components designed to meet the highest quality and regulatory standards in nutrition and personal care.

A PETROCHEMICAL DISTRIBUTION AND MARKETING COMPANY

Solvocoat Additives & Chemicals UK Ltd, Stand A150

Solvocoat Additives & Chemicals Ltd is a Milton Keynes-based petrochemical distributor specialising in solvents, lubricant additives, base oils and speciality

chemicals. The company focuses on reliable supply, quality control and technical support for industrial formulations and processes.

YOUR PERFORMANCE PARTNERS IN PROCUREMENT

CAMIDA, Stand G124

Camida is a leading supplier of specialised chemical

products to the Industrial, Life Sciences and Ingredients industries, globally. Products are supplied on a scale from gram to multi-tonne quantities from our trusted partners around the world. We're your sourcing team – performance partners in procurement. One touch sourcing and supply. To simplify your working life.

THE NORTH EAST'S MOST POWERFUL INDUSTRY CLUSTER

NEPIC, Stand M60

The North East of England Process Industry Cluster (NEPIC) is a not-for-profit

membership organisation that supports the needs and interests of the process sector in the North East of England. We focus our efforts on working closely with member companies, universities, research institutes and public bodies, to forge meaningful business relationships that allow us to identify opportunities for investment, influence and innovation, facilitate connections, promote collaboration and enable growth.

KEYNOTE PRESENTATION

GREAT BRITISH CHEMICALS: TOWARDS A RESILIENT CHEMICALS INDUSTRY

THUR 21 MAY
STAGE 1 / 10.00 – 10.20

Speaker:
Dr Thomas W. Franklin MRSC,
Programme Manager,
Great British Chemicals

SHOW FEATURE

CBA AT CHEMUK

We are delighted to announce that the Chemical Business Association (CBA) will be exhibiting and hosting an expert series of panel sessions discussing the challenges and opportunities facing the UK chemical supply chain today. The programme will include an unmissable keynote by the CBA's CEO, Tim Doggett.

PANEL SESSION

"DON'T MENTION THE 'C' WORD"

WEDNESDAY 20 MAY
STAGE 1 / 11.00 – 12.00

Panel Host:
Hosted by Tim Doggett, Chief Executive – Chemical Business Association (CBA)

PANEL SESSION

A NEW WORLD ORDER: WHAT IT MEANS FOR THE CHEMICAL SUPPLY CHAIN

THUR 21 MAY
STAGE 1 / 11.00 – 12.00

Feature Panel Session:
Hosted by
Chemical Business Association (CBA)

DISTRIBUTOR OPERATING IN INDUSTRIAL, PHARMACEUTICAL AND PERSONAL CARE MARKETS.

Alfa Chemicals Ltd, Stand E134

We partner with a unique mix of globally established and up-and-coming manufacturers of both bulk and packed raw materials. Our manufacturing division offers an in-house portfolio of high-quality products supported by our expert technical and commercial teams for both domestic and export sales.

We partner with a unique mix of globally established and up-and-coming manufacturers of both bulk and packed raw materials. Our manufacturing division offers an in-house portfolio of high-quality products supported by our expert technical and commercial teams for both domestic and export sales.

BASA SHOWCASE 20/11/2026

British Adhesives & Sealants Association (BASA), Stand A140

Why not sponsor BASA's third annual Showcase taking place at the Leeds Met on Friday 20 November 2026. This year's event will recognise winning BASA member companies for excellence in innovation, sustainability and community engagement.

Email showcase@basa.uk.com for details.

SPECIALIST BULK CHEMICAL SUPPLY

Leading Solvents, Stand K150

Leading Solvents provides a diverse portfolio of solvents & thinners, as well as finished products, including automotive cleaning, repair and refinishing solutions. We provide custom blending services, specialised paint ranges, and versatile packaging. We ensure the highest standards of reliability and consistent quality for every industrial and retail application.

FAMILY VALUES, CHEMICAL EXCELLENCE

CARVANSONS, Stand E120

Our Fragrance Trend eBooks provide insights into the trends and consumer buying habits affecting products influenced by the Household and Cleaning Market. These trends are built around industry insight, market research and current consumer buying habits. The ebook can be downloaded from the website. <https://www.carvansons.co.uk/cleaning-household-fragrance-trends/>

LEADING DISTRIBUTOR OF RAW MATERIALS AND CHEMICALS

Wilfrid Smith Ltd, Stand K124

We represent world class manufacturers and supply into a variety of markets including Personal Care, Plastics & Rubber, Refractory & Ceramics, Coatings, Inks and Pharmaceutical. Our highly skilled team provides the highest levels of commercial and technical expertise, support, and service to our customers.

We represent world class manufacturers and supply into a variety of markets including Personal Care, Plastics & Rubber, Refractory & Ceramics, Coatings, Inks and Pharmaceutical. Our highly skilled team provides the highest levels of commercial and technical expertise, support, and service to our customers.

PRESENTATION

CHALLENGES FOR THE SUPPLY CHAIN IN REGULATING GROUPS OF CHEMICALS

THUR 21 MAY
STAGE 1 / 13.45 – 14.00

Speaker:
Dr. Martina Schneider,
Regulatory affairs manager – UL Solutions

NEW EXHIBITOR

FAMILY VALUES, CHEMICAL EXCELLENCE

Stort Group, Stand E114

Stort Group is a leading independent speciality chemical distributor to the Industrial, Fragrance & Flavours and

H I&I/Personal Care Industries in the UK & Ireland. Founded in 1981, we remain 100% family-owned.

A LEADING INNOVATION SERVICE PROVIDER IN THE SPECIALITY CHEMICALS AND FOOD INGREDIENTS INDUSTRY

Azelis, Stand C140

Being a speciality distributor of chemicals and food ingredients, Azelis is a fully

integrated and leading innovative service provider. Collaborating across 70+ laboratories to be a benchmark for innovation. A focus for ambitious brands. And a catalyst that helps our customers to solve challenges and improve lives. Custom formulations, product testing, regulatory compliance, and sales support are just some of the services Azelis offers.

KEYNOTE PRESENTATION

DETERGENTS AND DIGITAL PASSPORTS

THUR 21 MAY
STAGE 1 / 10.40 – 11.00

Speaker:
Dr Eleanor Grimes,
Regulatory Specialist, Lisam

WE HAVE YOUR CHEMICALS COVERED

Norkem Ltd, Stand F136

Distributing high quality and speciality chemicals worldwide, we have stocks strategically placed across the globe to ensure we can respond fast and efficiently to all your needs each and every time. From Ammonium Dimolybdate to Zinc Oxide, our extensive product range has it covered.

YOUR LOCAL EXPERT FOR SUSTAINABLE CHEMISTRY**BTC Europe Chemical Distribution, Stand C136**

BTC, a BASF brand, is your local expert distributor offering speciality and

commodity chemicals from BASF and other global and local suppliers. We cover over 30 industries and prioritise environmental responsibility with our sustainable portfolio which includes low-carbon footprint products, biobased and biodegradable materials.

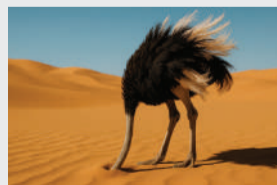

FINE AND SPECIALITY CHEMICAL DISTRIBUTION & PRODUCTION**ABCR, Stand D144**

At ABCR we supply and produce speciality chemicals for industry as well as for research & development. From small quantities to bulk, in

according to desired specifications and units, deliveries & extended service worldwide – all from one source. Specialists in Silanes and Siloxanes, Organofluorine compounds and High Purity Ceramics.

ACA PANEL SESSION**BEYOND INVEST 2035: WHAT THE UK INDUSTRIAL STRATEGY MUST DELIVER FOR CHEMICALS**
WED 20 MAY
STAGE 1 / 13.00 - 14.00

Alliance of Chemical Associations (ACA)

**SUPPLY CHAIN EXCELLENCE DELIVERED AS STANDARD****Chemical Business Association, Stand E154**

We are not just another trade association, we are your award-winning association.

We provide support, training & guidance & promote sustainability & responsible care. We represent through advocacy & lobbying. We inspire future generations & new talent & are the voice of the chemical supply chain & an extension to your team! We are the Chemical Business Association. Don't stick your head in the sand... Find out how we can help you!

PRESENTATION**REACH INFORMATION REQUIREMENTS FOR ENDOCRINE DISRUPTION**
THUR 21 MAY
STAGE 5 / 10.15 - 10.30
Speaker:
 Dr David Andrew, Technical Director - RSA
ECO RANGE™ - TURNING THE WORLD GREEN**Croda, Stand E150**

The 100% bio-based ECO range is the widest range of 100% renewable surfactants on the market. By using an alternate

route to EO with bioethanol from biomass sources, it significantly increases the bio-based content of ethoxylated products and reduces reliance on fossil fuels. Moreover, the ingredients are manufactured with renewable energy, yet their performance is identical to petro-based options.

NEW EXHIBITOR**INFINIUM PHARMACHEM LIMITED - THE INSIDE OF APIS****Infinium Pharmachem Limited, Stand F127**

Infinium Pharmachem Limited, incorporated in 2003, is a GMP-compliant, FDA, ISO-9001 and ISO-14001 certified manufacturer based in Gujarat, India.

We specialize exclusively in iodine chemistry, producing 200+ iodine intermediates (KSMs) and s18+ APIs from our auditable facility.

TEES VALLEY - HOME TO THE UK'S BIGGEST CHEMICAL COMPLEX, THE 2ND LARGEST IN EUROPE**Tees Valley, Stand F92**

Tees Valley is a global leader for the chemical and process industry, with one of the most significant integrated industrial economies in the world. The region's chemical industry is concentrated across a relatively small area with a well-developed infrastructure. The three main sites of Wilton International, Billingham and Seal Sands & North Tees run approximately 12 miles east to west either side of the River Tees and contain major international companies, including SABIC and Huntsman.

HOLIFERM - COST EFFECTIVE, HIGH PERFORMANCE, SUSTAINABLE BIOSURFACTANTS**Holiferm, Stand F110**

Founded in 2018 as a University of Manchester spinout, Holiferm uses patented fermentation and gravity separation

to convert renewable materials into cost-effective biochemicals. The company scaled from lab to manufacturing, raising £18.5m Series B in 2023 to expand its Wallasey plant to 1.65KTA and grow global sales. With sites on the Wirral and in Manchester, Holiferm delivers sustainable alternatives to surfactants including HoneySurf and HoliSurf, and free formulation support.

BUSINESS SUPPORT ORGANISATION FOR THE CHEMICAL INDUSTRY AND ITS SUPPLY CHAIN**Chemicals Northwest, Stand C130**

Chemicals Northwest are a business support organisation for the Chemical Industry and its supply chain.

We are a membership organisation. We organise events, an annual Awards dinner and quarterly magazine called Elements.

PRESENTATION**BEYOND CONVENTIONAL TESTING: GROUPING STRATEGIES DRIVING THE NEW REACH POLYMER REQUIREMENTS**
THUR 21 MAY
STAGE 1 / 13.30 - 13.45
Speaker:
 George Leathley,
 REACH Project Manager - Staphyt
**RSC AT CHEMUK 2026 STAND F112****RSC CEO TO KEYNOTE AT CHEMUK****WEDNESDAY 20TH MAY, 14.00 - 14.30**
Speaker:
 Dr Helen Pain MBE CSci CChem FRSC, Royal Society of Chemistry's Chief Executive. Attendees are invited to attend Helen's keynote as she provides invaluable industry insight and talks about her goals for the organisation.
RSC MEMBERS' CAREERS CLINIC

The RSC will be running 'one-two-one' careers consultations for their members at the show over the two days. If you are an RSC member and would like to book a free consultation with the RSC Careers advisor, please register for a CHEMUK visitor badge and tick the relevant boxes at the foot of the form. The CHEMUK team will then get in touch to send you further information.

RSC MEMBERS' NETWORKING RECEPTION**WEDNESDAY 20TH MAY**

The RSC will be hosting their member's reception on the RSC Networking Area at 5pm on Wednesday 20th May 2026 and are looking forward to sharing a drink and having the chance to chat with their members, face to face. When you register for CHEMUK 2026, you will be able to select the option to attend the RSC reception.

BECOME A MEMBER TO ENHANCE YOUR CAREER**ROYAL SOCIETY OF CHEMISTRY, STAND F112**

Become a member of the Royal Society of Chemistry to keep innovating and collaborating:

- Join interest groups
- Network across the chemical sciences
- Get discounts on RSC events and exhibitions
- Access RSC journals and knowledge
- Gain a professional award or chartership
- And more. Speak to us on stand to learn more or head to [rsc.li/join](https://www.rsc.li/join).

NEW EXHIBITOR

EXWOLD TECHNOLOGY: PARTNER IN PROCESSING

Exwold Technology Ltd, Stand L74

Exwold is a progressive contract formulation and processing company. With five sites in the North East of England, Exwold are specialists in solids handling, including: • Granulation : Extrusion, Compaction, Coating & Impregnation • Blending • Size Reduction. We are ISO 9001, 14001 & 45001 certified and have Ecovadis Silver.

CHEMICAL PROCESS AID SOLUTIONS

PennWhite Limited, Stand M86

PennWhite specialise in solving problems and providing peace of mind for our customers. Our speciality chemical process aids, including the renowned FoamDoctor® foam control range, have been proven across the globe in demanding applications such as food processing, wastewater treatment, fermentation, coatings, adhesives and printing.

NEW EXHIBITOR

CUSTOM FORMULATION AND CONTRACT MANUFACTURING SERVICES

Technikraft, Stand M98

Technikraft is a UK-based chemical formulator and manufacturer, creating high-performance products for automotive, cycling, home care and industrial markets. We partner with brands to deliver bespoke formulations, private label solutions and scalable manufacturing – from concept through to compliant, on-time supply.

SOLVING INNOVATIVE FORMULATION AND TESTING CHALLENGES

Here2Grow Cosmetics & Homecare labs, Stand L86

Here2Grow Cosmetics & Homecare Labs is an award-winning innovation arm to well-known blue-chip companies, providing R&D, commercial formulation solutions, testing, small-scale manufacturing and compliance expertise. Clients come to us because we are able to solve the most complex FMCG formulation and analytical testing challenges.

YOUR PARTNER OF CHOICE FOR CUSTOM SYNTHESIS, FORMULATION & PACKING.

Briar Chemicals LTD, Stand M100

Briar Chemicals delivers contract and custom manufacturing solutions to customers across the globe. We service world-leading companies in the crop protection, fine and speciality sectors, utilising a broad asset and technology base, underpinned by quality driven project management. Briar also offers a segregated, highly automated but flexible formulation, filling and packaging facility.

BASA PANEL SESSION

STICKY BUSINESS: EXPLORING FUTURE OPPORTUNITIES IN ADHESIVES & SEALANTS

WED 20 MAY
STAGE 3 / 10.00 -11.00

As industries rapidly evolve under the pressures of sustainability, digitisation, and electrification, the adhesives and sealants sector faces both disruption and opportunity.

BASA's Lorna Williams, Jim Palmer and Caroline Raine will be joined by a number of member company representatives including Bostik, HB Fuller, F Ball and Co Ltd and Mapei.

PANEL SESSION

IS EXTENDED PRODUCER RESPONSIBILITY FOR PACKAGING (pEPR) HELPING OR HINDERING THE DOMESTIC CHEMICAL MARKET?

THUR 21 MAY
STAGE 2 / 11.00 -12.00

Hosted by
British Plastics Federation feature panel

ADVANCED FOAM CONTROL SOLUTIONS

Custom Powders Ltd, Stand M96

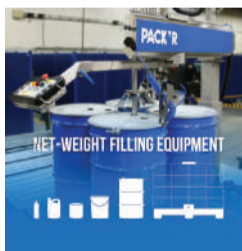

Custom Powders delivers flexible, reliable powder processing solutions for customers across multiple industries. From milling, sieving and blending to compaction, our technical expertise, responsive partnership approach and scalable capabilities ensure consistent quality, optimised performance and dependable results from development through to full-scale production.

NEW EXHIBITOR

INNOVATIVE INGREDIENTS FOR EFFORTLESS ECO-FRIENDLY LIVING

PACK'R, Stand J92

From standalone units to complete production lines, PACK'R supports every stage of your project. Our net-weight filling technology is ideal for various products including flammable, corrosive, foaming, or toxic liquids, and handles a wide range of product viscosities. From 100ml bottle to IBC we engineer tailored solutions based on your product, container, and output needs. Beyond installation, we ensure excellence with comprehensive maintenance, training, and optimization for lasting success.

UK MANUFACTURER AND GLOBAL SURFACTANT DISTRIBUTOR

Libra Speciality Chemicals, Stand F122

Librateric LDB 30 is a mild amphoteric surfactant based on Lauryl Betaine. It delivers good foam, effective cleansing, and viscosity build, with low irritation and broad pH stability. Suitable for personal care and cleansing formulations where mildness and performance are required.

NEW EXHIBITOR

INNOVATIVE WATER TREATMENT SERVICES FROM ROCK COMPLIANCE – SAVING MONEY, SAVING THE PLANET

Rock Compliance, Stand J82

Sustainability is a collective responsibility. Rock Compliance Water Treatment services are designed to help you save the earth's most precious resource – water. By using water more efficiently, you use less energy too – for every £ you spend on Water Treatment services, we aim to save you a £ in energy costs. That's a win for the planet, and a win for you.

COSMETICS FEATURE

WHAT DO BEAUTY BRANDS REALLY WANT FROM THE BIOECONOMY?

Join the Cosmetics Cluster UK team and special guests from across the supply chain as they discuss consumer demands and the implications for the industry.

THOMAS SWAN TO SHOWCASE CUSTOM MANUFACTURE AND SUSTAINABLE INNOVATION

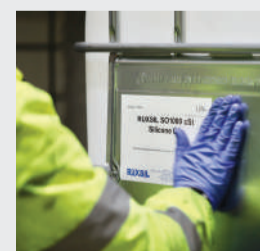

Thomas Swan & Co. Ltd, Stand L90

Thomas Swan celebrates 100 years of innovation with two divisions at CHEMUK. Our Custom Manufacture team partners with customers to deliver bespoke chemical manufacturing on a contract or toll basis, leveraging agile scale-up and world-class facilities. Green Feather Innovation drives sustainable growth through plant- and bio-derived raw materials, pioneering eco-friendly solutions that meet sustainability goals.

50+ YRS TOLL MANUFACTURING LEADER. FSSC 22000 FOOD-GRADE CERTIFIED. SUSTAINABLE UK CHEM EXCELLENCE!

Rutpen Ltd, Stand L120

Founded 1970, is a leading UK contract chemical manufacturer specialising in toll blending, solvent recycling, and product development. With over 50 years' expertise, we offer custom solutions for solvents, powders, liquids, and silicones through our new Ruxsil division (2025). On a 12+ acre Membury site, we hold ISO 9001, 14001, 45001 and FSSC 22000 (food-grade) accreditations, EcoVadis Bronze (2025), plus recent CGP acquisition. Dedicated to quality, safety, sustainability and excellence.

NEW EXHIBITOR

TOXICOLOGY & REGULATORY CONSULTANT [CM1.1] TO THE CHEMICAL & RELATED INDUSTRY SECTORS

toXcel International Ltd, Stand E146

toXcel International Ltd is a Scientific and Regulatory Consultant providing support to clients requiring toxicology and regulatory support in the UK, Europe and North America. Experienced staff can support data gap analysis, regulatory strategy, laboratory selection, study design, Good Laboratory audits, Study Monitoring and report review.

TAILORED APPROACH TO YOUR CHEMICAL REGULATORY COMPLIANCE

WSP, Stand M120

At WSP, we recognise that chemical companies encounter diverse challenges; including fluctuating demand, regulatory compliance and digital transformation, whilst driving cost-effective production methods. WSP's expertise empowers our chemical industry clients to confront these challenges head-on throughout the entire asset lifecycle.

CHEMICAL REGULATION AND RISK ASSESSMENT SPECIALISTS

SIP Speciality Oils and Fluids, Stand D146

SIP Ltd is a leading independent marketer and distributor of specialty oils and fluids, supplying customers across Europe and

international markets. Our extensive product range serves multiple sectors and applications, all supported by strong technical expertise and continuous product development. We are widely recognised for our base fluids and broad viscosity range of high-quality mineral white oils, offered with Halal, Kosher, and vegan approvals, ensuring regulatory and ethical compliance.

THE UK'S LEADING MANUFACTURER OF ROTATIONALLY MOULDED TANKS AND LIQUID STORAGE CONTAINERS

Enduramaxx Limited, Stand M10

Enduramaxx stands as the foremost plastic water and chemical tank manufacturer in the United Kingdom.

Our extensive product range encompasses water tanks, chemical tanks, water bowlers, and tanks designed for a variety of agricultural, industrial and construction applications, whether underground, above ground, open top, cone shaped, slimline or squat we manufacture numerous sizes and shapes of tanks to serve a diverse customer base across various industries throughout the UK.

DRIVING THE DEVELOPMENT OF A CIRCULAR BIOECONOMY

Biorenewables Development Centre, Stand P114

The BDC provides open-access R&D and demonstration facilities to unlock the potential of biobased materials, chemicals

and products. We bridge the scale-up gap from concept to commercialisation, offering complete process solutions and enterprise support to accelerate your journey through TRL 3-6 and beyond.

THE ASSOCIATION FOR SPILL AND INCIDENT MANAGEMENT ORGANISATIONS

UK & Ireland Spill Association, Stand P144

Our member companies – spill responders, consultants, manufacturers, oil and chemical handlers,

insurers, and loss adjusters—serve the UK, Ireland, and international markets. In 2026, we are developing the Competence by Qualification Scheme for individuals and advancing best practices in pollution response for plastic and battery incidents.

PROVIDING CHEMICAL & PRODUCT REGULATORY COMPLIANCE & SUSTAINABILITY SERVICES

REACHLaw UK, Stand D136

As a leading expert in chemical and product regulatory compliance, we deliver tailored services for substance

registration, authorisation, and notification within and beyond the EU. Our expertise includes EU REACH & CLP, UK REACH & GB CLP, KKDIK, K-REACH, UA REACH, India BIS, ESPR, EU PCN, microplastics, and more. We support market access, ensure compliance, and guide companies through the REACH Revision and the Chemicals Strategy for Sustainability.

SPECIALISTS IN HIGH-PURITY CHEMICAL PROCESSING

Tradebe Life Sciences | Purification, Stand J124

Tradebe Life Sciences | Purification provides value-added services for complex custom synthesis needs. Our in-house

chemical expertise, specialist technologies and flexible facilities support projects from concept to commercial scale, delivering fast, adaptable solutions aligned with stringent quality and regulatory standards.

WITH EXPERTISE AND DATA, WE SIMPLIFY YOUR PATH TO CHEMICAL COMPLIANCE

H2 Compliance, Stand F124

H2 Compliance is a full-service chemical consulting firm dedicated to introducing our customers' products onto global markets. We provide assistance in areas including REACH, GHS implementation worldwide (SDS and labelling), PCN, and cosmetics, underpinned by our element1™ chemical management software and product stewardship expertise.

SPECIALIST FOR PUMPING TECHNOLOGY

Ruhrpumpen, Stand E32

Ruhrpumpen is a global pump manufacturer providing highly engineered pumping solutions for chemical processing applications. With extensive experience in handling aggressive, corrosive, and hazardous fluids, Ruhrpumpen delivers reliable, efficient, and API/ANSI-compliant pumps designed to ensure safe and continuous operation in demanding chemical environments.

WE BUY, SELL AND CLEAN SECONDHAND IBC CONTAINERS

Recontainers Ltd, Stand G120

Recontainers Ltd is a family run business that specialises in the reconditioning of empty hazardous and non-hazardous

IBC containers. Established in 1991, IBCs have been at the heart of our operations for decades, enabling us to offer an industry leading quality of service to customers – big and small. This has helped us to become one of the sectors fastest growing companies.

YOUR PARTNER IN THE CHEMICAL INDUSTRY SUPPORTING BUSINESS AND INNOVATION.

British Chemicals Association, Stand L122

We represent our members' interests through engagement with government and other stakeholders in the industry at both UK and EU levels. As well as working to shape the regulatory landscape, we support our members by providing information on developments in chemicals legislation plus seminars and courses for staff development. We encourage growth and innovation and champion a thriving chemicals industry.

SUSTAINABLE PACKAGING SOLUTIONS

Fenton Packaging Solutions, Stand M146

Sustainability is at the heart of Fentons' offering. Our product ranges feature steel, tinplate, plastic and cardboard packaging that is 100% recyclable. Switching to flexible packaging alternatives such as Bag-in-Box allows users to reduce their carbon footprint throughout the supply chain, while reducing packaging costs.

FINNCONT – YOUR TRUSTED SOURCE FOR UN-APPROVED IBC TANKS

Finncont Oy, Stand D110

Finncont IBC solutions for liquids and powders combine decades of stainless steel expertise. Our UN-approved transport containers and custom-designed storage and process tanks ensure safety, efficiency, and meet the specific needs of every customer. Trusted quality for demanding industrial applications.

TAKING GLOBAL SOLUTIONS, PERSONALLY

Grace Overseas, Stand F142

With over 40 years of expertise in the freight forwarding industry, Grace

Overseas provides seamless and efficient logistics solutions tailored to chemical businesses worldwide. Whether by road, sea, or air, in bulk tankers or stored in our secure warehousing facilities, our comprehensive services ensure your cargo reaches its destination safely, on time, and with maximum cost efficiency.

SEE GRUNDFOS' LATEST ADVANCEMENTS IN CHEMICAL WATER TREATMENT

Grundfos, Stand C20

Grundfos' DDA SMART Digital Dosing pump combines renowned accuracy with next-level simplicity, safety, and connectivity. Designed for industries, utilities, and building owners, it supports a more sustainable future with:

extended pump life through repairable design and easy service; quick setup with time-saving transfer of settings, and enhanced monitoring & connectivity for smooth, continuous dosing. Experience precision, usability, and sustainability, all in one solution.

PANEL SESSION

UK REACH: WHAT'S IN THE MIX FOR '26? WED 20 MAY 2026 / STAGE 1 / 14:00 – 15:00

An expert panel of representatives have been brought together from industry, trade association, NGO, legal sector and government in this session for a lively debate on the UK REACH issues affecting the chemical and downstream-user sectors. This panel will provide an opportunity to hear varying perspectives on this everchanging and continuously developing topic, along with the chance for questions from the audience to our expert panellists.

Joint Hosts: Elaine McGavin, Operations Director – Chemical Business Association (CBA)
Neil Hollis – Regulatory Affairs Manager – BASF plc

Panellists: • Rebecca Leete – Head of UK REACH service & policy – Department for Environment, Food and Rural Affairs (Defra)
• Silvia Segna – Senior Chemicals Policy Executive – Chemical Industries Association (CIA)
• Chloe Topping – UK Campaigner – CHEM Trust • Darren Abrahams – Partner – Steptoe
• Ciara Dempsey – Regulatory Affairs Manager – British Coatings Federation (BCF)
• Dr. Diane Kelly – Regulatory Operations Manager – REACH at Reckitt

INCIDENT PREPAREDNESS, RESPONSE, AND RECOVERY WITH CHEMTREC

CHEMTREC, Stand B142

CHEMTREC supports organisations across the full incident lifecycle - before, during, and after an event. Through preparedness resources, expert guidance, and training, we help teams plan for risks and strengthen response capabilities. When incidents occur, our 24/7 emergency operations center provides timely, reliable support to help manage situations effectively. Afterward, CHEMTREC assists with follow-up services that help organisations recover, learn, and improve resilience moving forward.

INDEPENDENT CONSULTANTS SPECIALISING IN THE INDUSTRIAL AND COMMERCIAL APPLICATION OF CHEMISTRY

Chemical & Industrial Consultants Association (CICA), Stand J160

The Chemical and Industrial Consultants Association (CICA) is a network of independent consultants specialising in the industrial and commercial application of chemistry and chemical technologies. Whether you need help with formulation, technology, manufacturing, marketing, plant design, regulation, or other chemistry-related challenges, CICA's members are here to assist.

INNOVATIVE SOLUTIONS FOR HIGH-END SOLVENT AND PRECIOUS METAL RECOVERY

Indaver Solvents Ltd., Stand J140

Indaver Solvents delivers sustainable, one stop solutions for solvent recycling across Europe and full relief for diverse solvent streams. Within the Indaver group, we also provide high-end precious metal recovery from liquids, including a dedicated installation for homogeneous catalyst streams. These solutions help industrial companies to meet environmental goals and financial savings, advancing circular economy practices and climate objectives through reliable resource management.

TAILORED REGULATORY SOLUTIONS FOR CHEMICAL COMPLIANCE

Enviresearch Ltd, Stand L126

Enviresearch works with companies needing clarity and reliable guidance through UK and EU chemical regulations. We combine scientific knowledge with practical regulatory experience to turn complex requirements into workable compliance strategies across regulations including REACH, CLP and the Biocidal Products Regulation. Our approach helps you understand key issues, manage regulatory risks and keep compliance on track.

AIR SEA CONTAINERS OPENS NEW UN PACKAGING TESTING LAB

Air Sea Containers Ltd, Stand E60

Air Sea Containers, a leading supplier of compliant packaging for dangerous goods, has launched a UKAS accredited testing laboratory. Aimed at businesses requiring performance testing to obtain UN approval for packaging intended for the transport of dangerous goods. The new test lab is fitted with high-tech testing equipment and staffed by a team of experienced dangerous goods packaging specialists, delivering comprehensive performance testing in accordance with UN dangerous goods regulations.

CHEMICAL INDUSTRY JOURNAL

Chemical Industry Journal, Stand H124

Chemical Industry Journal is one of the leading voices of the chemical industry, giving expert industry analysis and comment on legislation, regulations and innovations as well as insights on leadership and management issues throughout the industry. The Chemical Industry Journal goes out to industry professionals across the Chemical industry, Tier 1 and Tier 2 contractors, wider supply chain and regulators.

DANGEROUS GOODS TRANSPORT TRAINING & CONSULTANCY

Peter East Associates, Stand E110

We are experts in the transport of dangerous goods by air, road, sea & rail. Internationally recognised, our training and consultancy experts specialise in helping to keep your organisation, safe, compliant and informed. Come to our stand and speak to one of our DGSA's.

INTERNATIONAL SPECIALISTS IN COMPLIANCE FOR THE MULTIMODAL TRANSPORT OF DANGEROUS GOODS

Labeline International Ltd, Stand E112

Labeline International is a world leader in dangerous goods (DG) compliance. As the UK's only authorised reseller for IATA, IMO and UN, the company supplies the full range of DG regulations, hazard labels, placards and marks which are tested for adhesion, UV protection, and resistance to abrasion. Labeline also provides software for dangerous goods (DG) compliance, online and classroom training, consultancy and Dangerous Goods Safety Advisor (DGSA) services, DG packaging and documentation.

DANGEROUS GOODS TRAINING & CONSULTANCY

Logicom Hub Ltd, Stand K144

Logicom Hub Ltd is a leading provider of Dangerous Goods training and Dangerous goods advisory service. We help customers ensure that they stay compliant with the regulations for Air, Sea, Road & Rail.

CONTAINMENT POWDER HANDLING SYSTEMS

Rubitec AG, Stand G64

SmartDock of rubitec ag which is very suitable for containment systems such as BigBag and drum filling and emptying systems. It meets the strictest guidelines.

DANGEROUS GOODS COMPLIANCE, DOCUMENT, PACKAGING AND MOVEMENT SPECIALISTS

DG Global Forwarding UK Ltd, Stand H86

DG Global Forwarding (UK) Ltd is a specialist freight forwarder offering compliant and reliable documentation, packaging and freight solutions across the UK and globally. We combine our own fleet with trusted partners to handle all commodities and service levels. Certified to ISO 9001 and ISO 27001, we deliver compliance-driven operations with real-time tracking, sustainability initiatives and expert support for all dangerous goods, temperature sensitive and time-critical shipments.

LEADER IN THE MANUFACTURING OF INDUSTRIAL PACKAGING FOR LIQUID & SOLID PRODUCTS

Müller AG Verpackungen, Stand M150

The Mueller Group is known as a quality leader in the manufacturing of industrial packaging for liquid and solid products. The customer solutions are made of steel, plastics and fiber and include Tight Head, Composite and Open Head drums in various versions and sizes up to 217 liters.

PALLET SOLUTIONS FOR STORAGE AND TRANSPORTATION

Scott Pallets, Stand D10

Innovative pressboard pallets made from recycled sawdust and wood chips, compression-moulded into strong, lightweight, stackable pallets. They save storage and transport space, offer consistent supply, meet quality standards, are recyclable, and are suitable for worldwide export under ISPM15.

PRESENTATION

EIGHT REASONS TO INVEST IN HIGH QUALITY CHEMICAL EMERGENCY RESPONSE

SPEAKER: CHRIS SOWDEN, TECHNICAL LEAD, EMERGENCY RESPONSE - RICARDO MEMBER OF WSP

THUR 21 MAY / STAGE 1 / 14.15 - 14.30

BECOME A MEMBER TO ENHANCE YOUR CAREER

Royal Society of Chemistry, Stand F112

Become a member of the Royal Society of Chemistry to keep innovating and collaborating:

- Join interest groups
- Network across the chemical sciences
- Get discounts on RSC events and exhibitions
- Access RSC journals and knowledge
- Gain a professional award or charterhip
- And more

Speak to us on stand to learn more or head to rsc.li/join

LEADING THE INDUSTRY IN DELIVERING TANK CONTAINERS

H&P Freightways LTD, Stand L154

H&P Freightways are the largest independent ISO Tank Haulier and Tankwash operator in the UK. With over 50 years in the industry, H&P Freightways are a one-stop shop for Transport, Cleaning, Tank Storage, Tank M&R and Customs, Import and Export services

UK GOVERNMENT BRIEFING

GB CHEMICALS REGULATION: LATEST REGULATORY DEVELOPMENTS

WED 20 MAY, 12.00 TO 13.00, STAGE 1

FEATURING: DEFRA - DEPARTMENT FOR ENVIRONMENT FOOD AND RURAL AFFAIRS & HEALTH AND SAFETY EXECUTIVE (HSE)

About this session

- Defra will outline the future direction for chemicals management and regulation, aiming for a system that is effective, proportionate, and responsive to emerging evidence. This presentation will outline the work underway and the opportunities for industry, NGOs, and other partners to engage as this work progresses.
- HSE will provide an update on the latest developments to GB Classification, Labelling and Packaging, GB Biocidal Products Regulation, and GB Prior Informed Consent.

NEW, IMPROVED FLOORING SOLUTIONS FOR THE CHEMICAL INDUSTRY

Kemtile, A division of Stonhard, Stand E47

Kemtile, a division of Stonhard, is a leading UK supplier of industrial flooring for the process and chemical engineering sector. At ChemUK, Kemtile will present advanced flooring technologies offering enhanced protection and durability in chemical environments, including new improved formulations around conductive, highly chemical-resistant flooring. A small change is set to make a massive difference. For details, contact Sean McIntyre at sean.mcintyre@stonhard.com.

NEW EXHIBITOR

OEB 7 ISOLATOR FOR MILLING AND MICRONIZATION

FPS Pharma, Stand G56

The FPS Pharma OEB 7 isolator for milling and micronization ensures precise particle size distribution using multiple milling technologies, with easy cleaning for

minimal downtime. Key features include OEB 7 containment (CPT 1 ng/m³), a compact design with inlet and outlet chambers, Spiral Jet Mills and other milling technologies, cryogenic milling for sensitive products, and advanced safe sampling. Ideal for rapid changes between milling processes. Request the brochures at sales@fps-pharma.com

PROCESS SAFETY

THE VOICE OF THE BRITISH VALVE INDUSTRY

British Valve and Actuator Association Ltd, Stand H62

For over 85 years, the BVAA has supported the British Valve industry and its supply chain. It creates value for its members by providing excellent business networks, new business opportunities, industry recognised training, technical expertise and influence.

MARKET LEADING TECHNICAL PIPEWORK SOLUTIONS

B & D Plastics Group Ltd, Stand K24

B&D Plastics have been successfully supplying pipework systems to various

market sectors for over 30 years; over this time we have developed a significant understanding of market sectors and the specific applications. With this experience & knowledge and in partnering with market leading manufacturers we believe we can add value to your projects with pipework material and system selection advice.

IFC INFLOW TO SHOWCASE VERTILEV & HOSE SUPPORT ARM AT CHEMUK 2026

IFC Inflow Ltd, Stand H50

Visit the IFC Inflow team at Stand H50, where we will be showcasing the Vertical Level Safety Cage and Hose Support Arm.

VertiLev provides full fall prevention during tanker top access, lowering over the vehicle and adapting to inclined tanker designs without the need for harnesses. The Hose Support Arm improves safety and efficiency by supporting hoses off the ground, removing manual handling and trip hazards. We will also be introducing our new Modular Platform solution, launching soon

PROCESS SAFETY

HAZARDOUS AREA COMPLIANCE MADE SIMPLE

F.E.S. (EX) Limited, Stand H12

A leading provider of E, I & M services offering solutions to Hazardous Area compliance through Process Safety > ATEX Inspections/ Rectifications > Installation > Maintenance > Asset Management.

THE RIGHT CHOICE FOR FLUID HANDLING SOLUTIONS

CDR Pumps (UK) Ltd, Stand J44

With proven expertise in tackling complex chemical-handling challenges, our specialist team will partner with you to

find the right pumping solution for your application, ensuring safer, more efficient and more reliable operations. Our extensive range of engineered solutions includes the game-changing solids handling mag drive pump and the QUANTM electric diaphragm pump – a cleaner, smarter alternative to air-operated pumps that delivers significant energy savings and reduces maintenance costs.

NEW EXHIBITOR

SECONDARY CONTROL & CONTAINMENT SYSTEMS FOR MAG-DRIVE PUMPS

CHEMQUIP LIMITED, Stand G18

CHEMQUIP's secondary containment and control systems are designed to enhance the safety and integrity of magnetic drive chemical process pumps. These systems are particularly beneficial for handling hazardous and volatile

liquids. The containment shell is hydro-tested to 50% over the maximum operating pressure, ensuring its integrity. In the event of a primary containment failure, the secondary containment system can activate a sensor to halt operations and contain any leakage.

EPC DESIGN AND BUILD

JBA Engineering, Stand N50

JBA Engineering specialise in the engineering, design and construction of bespoke process plants that incorporate new or innovative technologies. Our solutions are tailored to de-risking technology and materials specification and to reducing the project delivery schedule.

NEW EXHIBITOR FAST TRACK VALVES

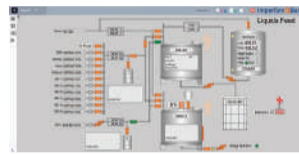

Online Valves, Stand G2

Online Valves Ltd is a stockist and distributor of valves and associated pipeline equipment. We specialise in fast-track solutions that meet your specifications and delivery requirements.

GLOBAL LEADER IN PROCESS CONTROL FOR PAINT, CHEMICAL AND FEED, GRAIN INDUSTRIES

Optio Systems, Stand K16

Optio Systems delivers cutting-edge process control solutions that transform

manufacturing across paint, chemical specialists and animal feed & grain. Our powerful Imperium⁴ platform gives real-time visibility, boosts efficiency, increases quality and cuts waste. All with intuitive, web-based control. With global installations and expert support in the UK and North America, we make smarter production a reality. Visit us to see live demos and explore future-ready automation!

FLUID CONNECTION SOLUTIONS FOR THE CHEMICAL INDUSTRY

STAUBLI UK Ltd, Stand L22

Stäubli offers a comprehensive range of connection solutions, including dry

disconnect couplings, safety breakaways, and loading arms, ensuring the highest level of product integrity and installation security in a wide range of applications, such as filling and draining, sampling, gas distribution, and inerting.

CRP'S PTFE LINED PIPES AND PFA FITTING

Corrosion Resistant Products Ltd, Stand G34

CRP's high performance lined pipework delivers exceptional corrosion resistance and long service life. Engineered for demanding chemical processes, our PTFE and PFA lined systems reduce maintenance and minimise

waste, ultimately providing the lowest cost of ownership. All products are manufactured in North Manchester, UK, with lead times that keep your projects on schedule.

NEW EXHIBITOR

ATEX-CERTIFIED VACUUM CONVEYING & BULK MATERIAL HANDLING SOLUTIONS

Volkman UK, Stand N10

We engineer fully pneumatic, safe & hygienic vacuum conveyors that protect product integrity, while boosting production efficiency. Trusted for reliability, innovation & engineering expertise, our dedicated team provide expert support, practical advice & free on-site trials, delivering the best solution for your process.

KEEPING YOUR PROCESS FLOWING WITH FILTRATION & WATER TREATMENT YOU CAN RELY ON

Filerder Filter Systems, Stand N30

Process performance depends on consistent fluid quality and a credible supply chain. Filerder provides reliable filtration and water treatment solutions, including filter housings, bag and cartridge filters, RO, UV and softening systems, helping protect uptime, product quality, and operational continuity. Visit us on stand N30 and discover filtration solutions for your business!

PULSAR REFLECT R36 THE NEXT LEVEL MEASUREMENT

Pulsar Measurement, Stand M20

With a measurement range up to 36m, the PULSAR REFLECT[™] R36 model has been developed for long range applications such as

tall silos and deep tanks, giving confidence in challenging level applications

CUSTOM TURBINE FLOW METERS

Nixon Flowmeters Ltd, Stand F14

Being a UK manufacturer of Flow Meters, we pride ourselves on being able to make custom and bespoke products. We recently provided a special design unit to TASA, for use on their rocket program.

RELIABLE AND SAVE TANK CALCULATION

Röchling Industrial SE & Co. KG, Stand J34

The tank calculation software RITA[®] has been used for more than 20 years to perform calculations as part of the structural analysis

of tanks made of thermoplastics. RITA[®] 6 is based on the latest technology and provides a user-friendly interface to calculate cylindrical and rectangular tanks in accordance and based on the DVS guideline 2205.

ENGINEERED PUMP SOLUTIONS

Marshall Pump Systems Ltd, Stand F52

We are a pump and system specialist, engineering pump solutions into industry since 1965. We pride ourselves on selecting the right

pump for the job and are experienced in improving the efficiency of your process.

CROFFLES FOR INDUSTRIAL USE THAT SAVE MONEY

Euro-Matic UK Ltd, Stand B2

Croffles are hollow plastic balls that float on the surface of plating, chemical and process tanks to form a flexible cover. They cut heat loss, fumes and evaporation, so you save energy, reduce chemical loss. Plus they are simple to install with no maintenance.

ICHEME 2 DAY MINI-CONFERENCES

PATHWAYS TO SAFER, SMARTER, CLEANER INDUSTRY

WED 20 MAY
STAGE 4 / 11.00 -13.00

DEVELOPING THE MODERN PROCESS ENGINEER

THUR 21 MAY
STAGE 4 / 11.00 -13.00

Hosted by the IChemE

VALVES, AUTOMATION, MODIFICATION

AVA-AlmsAgency Ltd., Stand G52

AVA is more than a distributor: We provide high-quality industrial valves, fast availability through our large inventory, and complete automation and modification services from a single source. With strong brands, technical expertise, and true solution competence, we deliver tailored quality – reliably, flexibly, and in partnership.

NEW EXHIBITOR

THE UKS LEADING AUTOMATION & PROCESS INSTRUMENTATION DISTRIBUTOR

Parmley Graham LTD, Stand J16

Parmley Graham offers automation and process advice on market-leading products from top brands like Siemens. Trust us for

tailored solutions, reliable support, and industry insight that empower your business to achieve innovation, efficiency, and growth.

DELIVERING CONTINUOUS CHEMICAL MANUFACTURING

AM Technology, Stand H100

AM Technology are the global leader in transferring batch chemical processes into efficient, low-cost continuous manufacturing. With expertise in multiphase processes

such as hydrogenation, we thrive on delivering commercially viable manufacturing processes to reduce your manufacturing cost.

YOUR NEW TRUSTED UK PARTNER FOR CORIOLIS

UK Flowtechnik, Stand H14

Coriolis for less. The quality you expect for up to 20% less, with high accuracy rating using technology developed in the UK, Canada and Beijing.

EXCELLENCE IN DOSING TECHNOLOGY

sera Technology UK Ltd, Stand F37

The sera Group is synonymous with innovation, reliability, and flexibility in dosing technology. As a global leader, sera provides

tailored solutions for the precise dosing and conveying of liquids, delivering customer-focused excellence across diverse industries.

PROCESS SAFETY

SCULLY FOR IBC & DRUM OVERFILL & GROUND PREVENTION

SCULLY UK LTD, Stand D32

Engineered for Safety. Built for Quality. Tested for Performance. Scully for your IBC and Drum Overfill and Ground Prevention, with 90 years supplying Overfill and Ground monitoring systems Controlling Fills and Monitoring spills. Engineered for Safety.

Built for Quality. Tested for Performance.

ENGINEERED DELIVERY NOZZLES FOR DRUM AND IBC FILLING

EWFM, Stand J10

Available in manual and automatic shut-off configurations, Engineered Delivery Nozzles provide a safe and controlled fluid

filling process. Designed for drums, IBCs, casks, and other containers, they can be tailored to specific applications, offering a range of operational benefits including vapour recovery, anti-splash, and reduced foaming.

SOLUTIONS FOR A SAFE, EFFICIENT, GREEN, & DIGITAL CHEMICAL PRODUCTION

ABB, Stand M50

The chemical industry is undergoing the most profound transformation in its history. It is a process that will allow the sector to

achieve climate neutrality by 2050, as well as reduce the use of nonrenewable and hazardous materials and deploy digital advanced technologies.

A WORLD LEADING MANUFACTURER OF INDUSTRIAL CENTRIFUGAL AND AXIAL FANS SINCE 1965

Halifax Fan Group, Stand D72

We specialise in custom, high performance solutions for demanding applications in chemical, power, nuclear, oil & gas, pharmaceutical and marine sectors. Offering fans in any material, with gas tight, high temperature, ATEX/IECEX/API,

CCC Chinese explosive standards compliant designs and global certifications. Manufacturing in UK, China (Shenzhen, Nantong) and USA for local delivery and support. ISO 9001:2015 certified.

3RD GENERATION REGENERATIVE THERMAL OXIDISER (RTO)

ERG (Air Pollution Control), Stand G26

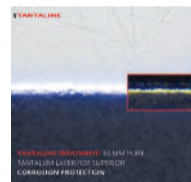

ERG's 3rd Gen RTOs sets a new benchmark in VOC abatement efficiency, reliability and lifecycle performance. Designed for demanding chemical and

pharmaceutical processes, the system combines advanced heat-recovery media, intelligent flow control and optimised combustion management to achieve ultra-low emissions with reduced fuel demand. The result is a compact, future-ready RTO delivering high destruction efficiencies, lower operating costs and long-term compliance confidence from ERG.

EXTREME CORROSION PROTECTION

Tantaline CVD ApS, Stand D40

Tantaline CVD ApS specializes in providing superior corrosion resistance solutions through its special Tantaline® surface treatment technology.

This innovative process creates an ultra-thin, highly durable tantalum layer on metal parts, enabling them to function reliably in extremely aggressive environments, including hot acids, sour gas, and seawater, for extended periods. The technology has been on the market for more than 20 years and has proven its reliability across various industries.

DESIGNERS OF BESPOKE HEAT TRANSFER SYSTEMS

Thermal Fluid Systems Ltd, Stand C42

Thermal Fluid Systems Ltd. is the industries leading supplier of single fluid heat transfer systems with over 35 years history in the design,

manufacture, installation and commissioning of bespoke heat transfer fluid systems and some +500 custom system applications supplied.

CHEMICAL STORAGE & TRANSFER SOLUTIONS

Chem Resist Group, Stand F2

Stand F2 sees Chem Resist showcasing our experience and expertise in providing chemical storage and transfer

solutions. Specialising in the design and manufacture of storage tanks for chemicals, effluent and water we pioneered the spiral wound manufacturing method using thermoplastics. Almatec and Munsch chemical transfer pumps will be on display along with ChemiGuard Tanker Offload and Dosing Cabinets designed to improve site safety by protecting against Loss of Containment incidents.

PROCESS SAFETY

INNOVATION TO IMPROVE PROCESS SAFETY AND PERFORMANCE

OsecoElfab, Stand G50

The LoKr DUO is a simple, cost-effective innovation to upgrade your pressure relief performance while minimising waste and

emissions. Compared to traditional, three-piece rupture disc designs, this unique safety cartridge offers improved leak-tightness and easier installation in a two-piece, modular design.

NEW EXHIBITOR

FRENCH DESIGNER & MANUFACTURER OF BALL VALVES SINCE 1955

MECA-INOX, Stand J62

With over 70 years of industrial expertise, MECA-INOX is trusted by leading players in the most demanding markets, including

Pharmaceuticals, Chemicals, Food & Beverage, and Industrial Gases. From its manufacturing site in France, MECA-INOX ensures worldwide availability of its valves with the same high level of service and standards, including full product traceability, precise marking, and strict compliance with the most rigorous international regulations.

HIGH-INTEGRITY PROCESS VALVES FROM TAIWAN

Transworld Steel Enterprise Co., Ltd. (TAWD), Stand J72

Transworld Steel Enterprise Co., Ltd. specialises in the design and manufacture of high-performance industrial valves, all

produced in Taiwan and supported by 33 years of manufacturing experience. The company places strong emphasis on material quality, full-process traceability (DTP), and stable supply. Its products have been widely used in 34 countries and have been widely used in the UK market for over 26 years, serving demanding semiconductor, food, and chemical engineering applications.

COMPREHENSIVE PUMPING SOLUTIONS TAILORED TO YOUR APPLICATION

Verder Ltd, Stand M40

Verder Ltd
and Verder

Scientific will showcase their range of cutting-edge products designed to address the complex challenges faced by chemical manufacturers at CHEMUK 2026. Products on show will include the brands: Verderflex, Verderair PURE, ITC Dosmart, ITC Dostec, Microtrac Turbiscan Trilab.

MARKET LEADER OF INNOVATIVE PTFE LINED HOSES

AFLEX HOSE LTD, Stand L20

World leading patented PTFE lined flexible hoses for

Biotech Pharma API F&B Chemical Industrial applications providing solutions other materials are unable to handle.

MANUFACTURER OF BUTTERFLY VALVES, ACTUATORS & CONTROLS

Tomoe Valve Ltd, Stand F56

We manufacture industrial dampers, rubber lined, double offset and triple offset butterfly valves

in a wide range of materials for a wide range of applications. We also stock in the UK for quick deliveries.

WORLD'S MOST SECURE AND MOST EFFICIENT CHEMICAL PUMPS

CP Pump Systems, Stand G60

CP Pump Systems is an independent Swiss pump manufacturer. Since 1948, the family-owned company has been

developing and producing high-quality, safe and energy-efficient stainless steel and PFA lined magnetic drive and double mechanical sealed centrifugal process pumps for the chemical, pharmaceutical, biotech and food and beverage industries - with a global presence and a strong focus on sustainability.

NEW EXHIBITOR

PROFOX X - COMPACT, CAPABLE VALVE CONTROL FOR ATEX APPLICATIONS

AUMA Actuators Ltd, Stand F54

Profox X is a compact, robust variable speed valve actuator suitable for accurate, reliable operations up to ATEX Zone 1. Easily configurable either remotely or locally and available in part, multi

and linear formats. Featuring AUMA's unique 'Fox-eye' visual indicator so you can see your valve status at a glance. Simple, single phase electrical operation with operating torques up to 600Nm.

MAKING INDUSTRY SMARTER WITH PROVEN IIOT INNOVATION

PowTechnology Ltd, Stand K70

PowTechnology makes it easy to connect sensor and machine data to the cloud. Using AI, edge processing and anomaly detection, we blend IT

and OT to boost productivity, safety, sustainability, planning, collaboration, compliance, maintenance and overall operational performance.

NATIONAL PROCESS TRAINING PROVIDER

HETA Ltd, Stand E43

HETA is a national engineering training provider offering apprenticeships and qualifications from Level 2 through Level 6, specialising in process

engineering and related disciplines to develop skilled technicians and professionals for industry.

SUPPLIERS OF MILLING & MIXING CHEMICAL PROCESSING EQUIPMENT

Ytron-Quadro (UK) Ltd, Stand E22

For Over 40 Years, Ytron-Quadro (UK) Ltd have been supplying high quality milling & mixing process equipment to the chemical industry for a variety of processes and applications.

CLEAN ROOM AND VAC SERVICES TAILORED TO YOUR REQUIREMENTS

Bray Controls (UK) Ltd, Stand L44

At Bray our business is helping our customers with their flow control requirements. Our modular product line of butterfly valves,

ball valves, actuators and accessories offer the best compatibility, economy and quality performance in the flow control industry.

SWAN - WE MAKE WATER SAFE

Swan Analytical UK Ltd, Stand E64

Swan's comprehensive online analysers are engineered for precise, reliable monitoring of Pharma water. Our CFR Part 11-

compliant software secures every measurement with validated data handling, electronic records, and full traceability. With precise, stable measurements for PW, WFI, and process water, SWAN supports globally consistent compliance.

UK HIGH PRECISION GEAR METERING PUMP MANUFACTURER

Slack and Parr, Stand L24

At Slack and Parr we design and manufacture the most advanced precision gear metering pumps, industrial dosing pumps and hydraulics flow divider solutions.

Our unique approach ensures you get the best 'whole of life product' return on investment, because every product is designed to your specific environment, application and specifications - then manufactured to order.

DESIGN, MANUFACTURE AND SUPPLY OF MEASURING PROCESS INSTRUMENTATION SINCE 1982

Elizabeth Abolins, Stand D24

We are a British company with over forty years of experience and excellent

track record in the design and manufacture of temperature, humidity and pressure process measuring instrumentation. We pride ourselves of being a status and a benchmark for both, high quality products and building decades long relationships with clients and partners.

PROCESS SAFETY

VARIPELL® - THE UNIQUE CONTROL VALVE

EPC - Varibell, Stand C72

Varibell® is an innovative quarter turn rotary control valve with an excellent turndown ratio of 1:10 000. In combination with our servo actuator the Varibell® control valve can unleash its full potential (up to 5 400 steps / 90° rotation). It can be used

for liquid and gaseous media such as technical gases, steam or condensate, and due to its special design also for highly contaminated or viscous media.

CUSTOMISABLE DIAPHRAGM PUMPS FOR DEMANDING ENVIRONMENTS

KNF Neuberger UK Ltd, Stand D66

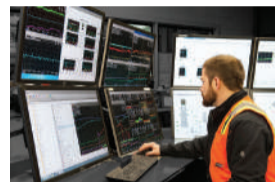

KNF leads in diaphragm pump technology, delivering OEM, process, and laboratory solutions for gas, liquid, and vacuum applications. Founded

in 1946, KNF combines engineering precision with global reach to provide highly customisable, high-performance pumps for critical industries and demanding environments worldwide.

INDUSTRIAL DATA INTELLIGENCE SOFTWARE

dataPARC, Stand N54

Founded in 1997, dataPARC is a leading provider of industrial analytics software for process manufacturers

worldwide. dataPARC's PARCview platform connects and contextualizes data from disparate systems to deliver actionable insights that improve efficiency, reliability, and profitability. dataPARC serves customers in industries such as biomass & bioenergy, pulp & paper, chemicals, oil & gas, power & utilities, and mining & minerals across more than 1,000 sites globally.

NICKEL, TITANIUM & SPECIALTY ALLOYS. GLOBAL STOCK & FAST DELIVERY

HARALD PIHL, Stand M12

Experts in specialty metals since 1912. HARALD PIHL holds Europe's largest stock of nickel, specialty alloys and Western-

sourced titanium, available in multiple grades. We serve the chemical and process industries, as well as energy, aerospace and medical sectors. With in-house services including waterjet cutting, laser cutting and CNC machining, we reduce lead times and deliver critical materials fast.

NEW EXHIBITOR

EXPERTS IN REDUCING CAPITAL COSTS

Shamrock Group LTD, Stand K4

Shamrock Group Ltd delivers

engineering and construction solutions focused on reducing capital costs without compromising quality. Through disciplined planning, value engineering, and rigorous project controls, we provide robust project management, predictable outcomes, and commercially efficient delivery across complex, safety-critical industrial projects worldwide for clients globally.

ACTIVATED CARBON TECHNOLOGY FOR CHEMICAL & WASTE PURIFICATION

Chemviron, Stand J26

Chemviron provides a comprehensive purification service to remove colour and byproducts in industrial processes using our specialised activated carbon technology, recycling spent activated carbons by reactivation, and our mobile carbon filter service.

PROCESS SAFETY

SAFE ROAD & RAIL TANKER ACCESS, LOADING ARMS AND METERING SYSTEMS

Carbis Loadtec Group Ltd, Stand L30

Carbis Loadtec delivers engineered solutions for safe road and rail tanker access and

for the transfer of liquids, gases, and powders across terminals, depots, and processing sites. The company designs and supplies loading arms, safe access platforms and metering systems, supported by a consultative approach that listens to client challenges and delivers practical, compliant solutions - demonstrating what engineering and customer service should look like.

BPMA IS A UK TRADE ASSOCIATION OF LIQUID PUMPS & PUMPING EQUIPMENT

British Pump Manufacturers Association, Stand C40

BPMA members account for approximately 85% of the £1 billion plus UK market for pumps and

in addition the UK pump industry is a net exporter. Membership of the BPMA is open to any company large, medium or small, involved in liquid pumping equipment, including key suppliers.

SUPPLIERS OF INSTRUMENTATION TO THE CHEMICAL/PETROCHEMICAL/ PHARMACEUTICAL INDUSTRIES

Ashford Instrumentation Ltd, Stand A60

Ashford Instrumentation are leading and experienced suppliers of process measuring instruments to the chemical industry. Mechanical and Electronic pressure and temperature instrumentation and associated process instrument valves. In addition we offer full inhouse calibration services traceable to national

standards. Working with all of the major worldwide manufacturers of instrumentation we can offer a comprehensive package to meet your needs.

NEW EXHIBITOR

ANALYSIS INSTRUMENTS AND DOSING SYSTEMS FOR WATER TREATMENT

STEIEL Elettronica Srl, Stand B16

Since 1973, STEIEL has been designing and manufacturing complete systems for the analysis and adjustment of key physical-chemical parameters for water treatment. Our range

includes measuring instruments, chemical dosing pumps, sensors, probe holders, and ready-to-use solutions. Products suitable for a wide range of industrial sectors, as process water, cooling towers, potabilization, Legionella prevention in DHW, galvanic baths and RO plants, and much more.

NEW EXHIBITOR

HYGIENIC TURNKEY PROCESS SOLUTIONS, DESIGNED AROUND YOUR PROCESS NEEDS

S4 Engineering, Stand F44

At S4 Engineering, we provide liquid & powder process solutions across the UK & overseas. We work with a wide range of industries, including food, beverage, dairy, cosmetics, and pharma. With years of hands-on experience and trusted partnerships, we provide complete process solutions from the design stage through to installation and long-term support. We are a single point of contact for all your process needs, supplying reliable mechanical, electrical, instrumentation, and control equipment.

SWITCH BOXES, SOLENOID VALVES & ACTUATOR ACCESSORIES

EUROTEC Antriebszubehör GmbH, Stand C14

EUROTEC Antriebszubehör GmbH is a leading German manufacturer of high-quality limit switch box solutions. Our product range also includes solenoid valves,

mounting kits, and other actuator accessories. Furthermore we offer customized solutions for industrial applications, focusing on innovation and customer satisfaction. We look forward to welcoming you at CHEMUK 2026!

VALVE & INSTRUMENTATION DISTRIBUTOR

Johnson Valves, Stand E24

With over 70 years' experience Johnson Valves are your valve and actuation specialist within the industry. With our trusted, knowledgeable staff, experience, along with extensive range of UK stock and our strong partnerships

with many other well-known brands, our strength is guiding our customers to find them the best solution. Supplying manual and actuated valves, alongside complementary ancillary equipment for many applications and varied environments.

PRESENTATION

PRODUCTION WASTE ENERGY CAPTURE AND UTILISATION

**THUR 21 MAY
STAGE 4 / 13.30 -13.45**

Speaker:

Andrew Wills, Managing Director - Thermal Fluid Systems Ltd

HEAT EXCHANGER SOLUTIONS FOR THE CHEMICAL INDUSTRY

Moody Heat Exchangers, Stand K10

Leading heat exchanger service and design specialists, delivering high-performance heat transfer solutions for demanding chemical processes. They provide a range of

expertly engineered heat exchangers for all chemical processes. Comprehensive after-sales support, including spare parts, regular maintenance, and emergency breakdown service, is also provided.

SUPPLIERS OF INSTRUMENTATION TO THE CHEMICAL/PETROCHEMICAL/ PHARMACEUTICAL INDUSTRIES

Ashford Instrumentation Ltd, Stand A60

Ashford Instrumentation are leading and experienced suppliers of process measuring instruments to the chemical industry. Mechanical and Electronic pressure and temperature instrumentation and associated process instrument valves. In addition we offer full inhouse calibration services

traceable to national standards. Working with all of the major worldwide manufacturers of instrumentation we can offer a comprehensive package to meet your needs.

ENGINEERING DESIGN CONSULTANTS

OLG, Stand H60

OLG is a comprehensive engineering design consultancy and engineering solutions

provider. We work with clients from feasibility and conceptual design through to detailed engineering, procurement, and construction management. Our engineers bring a wealth of knowledge and experience to tackle the most complex challenges, ensuring innovative solutions are met. With over 40 years of experience and offices in five locations, OLG has the track record to ensure project success.

BESPOKE MECHANICAL SEAL DESIGN AND MANUFACTURE

RB Mechanical Seals, Stand L52

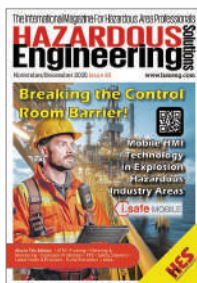

RB Mechanical Seals is a UK based specialist in the design, manufacture, repair and refurbishment

of mechanical seals, pumps and equipment for the chemical industry. With over 45 years' experience, we focus on reliability, safety and long term performance, supporting critical process equipment with practical, engineering led solutions.

HAZARDOUS ENGINEERING SOLUTIONS AT CHEMUK

Hazardous Engineering Solutions, Stand A20

Hazardous Engineering Solutions will be exhibiting at ChemUK, showcasing how the magazine supports suppliers and solution providers operating in hazardous and high-risk environments. Visit us to discuss advertising, editorial opportunities, and

year-round exposure to the process and safety engineering sector.

PROCESS SAFETY

GLOBAL TECHNOLOGY LEADERS IN STORAGE TANK SAFETY SOLUTIONS

Protego UK Ltd, Stand L34

Protego manufacture of Flame Arresters, Breather

Valves and Emergency Relief Valves for process and storage tank protection. We also design and manufacture Floating Suction Units, Skimmers and In-Tank Valves for more specialist applications. Protego Engineering Services offers technical expertise in calculating requirements for complicated systems and large projects. We have the largest flow test facility in the world for accurate testing of low pressure devices.

IMECHE PROCESS INDUSTRIES DIVISION KEYNOTE

COMPLIANCE IN BULK MATERIALS HANDLING

**THUR 21 MAY
STAGE 4 / 13.00 -13.30**

Speaker:

Prof Michael Bradley, CEng FMHEA BSc PhD Professor of Particle and Bulk Technology and Director of The Wolfson Centre for Bulk Solids Handling Technology at the University of Greenwich.

MASS FLOW, PRESSURE, PUMPS AND VALVES

Premier Control Technologies Ltd, Stand H70

Visit Stand H70 for many years of experience and a collaborative approach to instrumentation. Jordan and Steriflow Control Valves, Regulators and Instrumentation Valves.

(Ultra) Low Flow Pumps including peristaltic, piston, syringe and double diaphragm. Mass Flow Meters and Controllers including Coriolis., Equibar Back Pressure Regulators. Electronic pressure control.

NEW EXHIBITOR

LEADING SUPPLIERS OF PUMPS, PROCESS EQUIPMENT, SPARE PARTS & PROJECTS

Alliance Fluid Handling, Stand H46

We provide a unique offering with in-house technical expertise, knowledge and support to assist you in choosing the right products & solutions for your process. With our huge stock of hygienic pumps, process equipment and spare parts, we can provide you with an unrivalled customer service that has made us the number one supplier of choice for thousands of customers around the world.

UK & IRELAND PARTNER FOR THE MARKET LEADING DOSATRON RANGE OF WATER POWERED DOSING SOLUTIONS

Hingerose Ltd, Stand K-82

The Dosatron offers efficient, precise & reliable proportional dosing of liquid additives & stock solutions into water without the need for electric

power. Working volumetrically with water flow, proportionality is maintained irrespective of fluctuations in flow rate & pressure. With 46+ years' experience in a diverse range of applications including but not limited to food & hygiene, water & wastewater treatment, metal processing and ATEX installations we're please to discuss your dosing needs.

A WORLD CLASS DESIGNER AND MANUFACTURER OF HIGH-PRESSURE CONTAINMENT EQUIPMENT

LANGFIELDS LIMITED, Stand D46

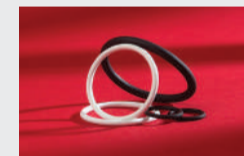

A UK-based manufacturer specialising in the design and manufacturer of high-pressure containment

equipment serving the Nuclear, Defence, Petrochemical, Chemical, Materials Processing, Pharmaceutical, Water Treatment, Hydrogen and Green Energy market sectors

PERLAST® SUPER-SIX FFKM SEALING MATERIALS

Precision Polymer Engineering, Stand D42

Perlast® Super-Six is PPE's range of top-performing FFKM sealing material grades,

proven to enhance sealing performance and reliability in the most challenging applications and environments. Perlast® Super-Six FFKM materials offer exceptional chemical resistance, extreme Hot/Cold temperature resistance, and are certified/compliant to FDA, USP Class VI, and 3A 18-03.

SIGA FILTRATION SHOWCASES ADVANCED FILTER BAG SOLUTIONS AT CHEMUK 2026

Siga Filtration, Stand D36

Siga Filtration returns to CHEMUK 2026 with a comprehensive range of industrial filter bags designed to meet the demanding requirements of the chemical processing, and manufacturing sectors. Available in Polypropylene felt, Polyester felt, PTFE felt, Nylon felt, NOMEX and Nylon monofilament mesh configurations, these filter bags deliver exceptional particle retention whilst maintaining high flow rates and extended service life.

COMPRESSED AIR, GAS AND VACUUM SOLUTIONS

Aerzen Machines, Stand H30

Thanks to an innovative screw compressor stage and a highly efficient class IE5 permanent magnet motor, the single-stage, oil-injected compressed air packages in the

SI series achieve a very high energy efficiency level - even in partial load operation. This enables significant energy savings in compressed air generation and contributes significantly to economical, resource-saving and sustainable processes.

THE NEW PLATFORM GENERATION FROM GEMÜ

GEMÜ Valves, Stand E20

After years of intensive research and development, GEMÜ is pioneering the valves of the future by considerably expanding its product range.

The new platform generation has been designed to include the most advanced technology for use in challenging and demanding processes. Lean. Effective. Agile. Platformized.

NEW EXHIBITOR

MANUFACTURER OF SOLENOID VALVE, PNEUMATIC VALVE & INDUSTRIAL VALVE

UFLOW AUTOMATION, Stand L10

Uflow Automation is an India-based manufacturer

and global exporter of industrial automation and pneumatic solutions. We supply high-quality, reliable, and cost-effective products to customers worldwide, serving OEMs and industries across multiple countries. Our focus is on innovation, performance, and long-term partnership.

PRESENTATION

FROM PILOT TO PRODUCTION: SCALING MODULAR, CUSTOMISED MANUFACTURING

WED 20 MAY
STAGE 5 / 12.30 - 12.45

Speaker:

Dr Jens Klabunde, Business Development Manager - Connect Chemicals

GLATT PARTICLE DESIGN - DEFINED PARTICLE PROPERTIES

Glatt Ingenieurtechnik GmbH, Stand F72

Glatt offers services and equipment for particle design development and production, driven by fluid bed technology and its processes like spray granulation, agglomeration, coating, encapsulation, incl. high temperature processes.

LEADING SUPPLIERS OF FLOW METER SOLUTIONS FOR HIRE OR SALE

Flowquip Ltd/Flowhire Ltd, Stand H32

With a collective 60 years providing flow metering solutions to the chemical industry, Flowquip and Flowhire will be back at CHEMUK

this year on stand H32 to assist you with any flow metering and monitoring dilemmas you have.

FROM PKL TO EPKL - THE NEW ELECTRIC IMPACTOR

NetterVibration UK Ltd, Stand H10

The proven PKL range now has an electric option!

The interval impactors from the PKL series are particularly well-suited for dislodging stubborn deposits on hopper walls, pipes,

and containers. They eliminate rat-holes and bridging formation and assist with the complete emptying of containers. The ePKL operates electrically, making it incredibly versatile and easy to use almost anywhere - even mobile with a battery.

NEW EXHIBITOR

WORLD CLASS FILTRATION AND SEPARATION SOLUTIONS

Carbis Filtration Ltd., Stand F62

CFL is a leading engineering and manufacturing company specialising in the design and manufacture of innovative high integrity filtration and separation equipment, process internals, screens, and specialist filter components. We aim to challenge the status quo, offering forward thinking solutions, and pioneering products, equipment and parts.

PROCESS AND CONTROL MAGAZINE

Datateam Business Media Ltd, Stand Q32

Process & Control is the leading information source for engineers who have a direct influence on the specification and procurement of process and control products, equipment, systems and services. The editorial content includes a mix of technology features, case studies, new product information and general industry news.

PROCESS SAFETY

TANK GAUGING & OVERFILL PREVENTION EXPERTS

ISS Projects UK Ltd, Stand M30

ISS Projects UK delivers tank gauging and overfill prevention solutions across the UK, with over 20 years' specialist experience. Based in North Yorkshire, the team provides rapid, flexible support for single tanks and multi-tank sites in the chemical sector.

YOUR MULTI-AWARD-WINNING EPCM PARTNER

Projex Solutions, Stand E44

Founded in 2006, Projex Solutions has grown into a multi-disciplined EPCM partner with teams based in West Yorkshire

and the North East. You work with experienced engineers who support complex projects across highly regulated process manufacturing sectors. Your project team gains practical expertise in engineering consultancy, engineering design, and project management, focused on safety, compliance, and reliable delivery from concept through to execution.

RELIABLE PROCESS MEASUREMENT FOR DEMANDING CHEMICAL APPLICATIONS

KROHNE Limited, Stand G72

KROHNE is a global leader in process instrumentation, delivering precise and reliable solutions for flow, level, pressure, temperature and process analytics. With over 100 years of expertise, we support the chemical

industry and other sectors with measurement solutions designed for demanding applications and backed by strong engineering and service support.

WIKA'S NEW CLAMP-ON ULTRASONIC FLOW METER

WIKA Instruments Limited, Stand B60

Clamp-on ultrasonic flow meter, for dual-stream non-invasive process liquid measurement

WE BUY & SELL USED CHEMICAL PROCESS EQUIPMENT

Perry Process Equipment Ltd, Stand L50

Perry Process Equipment Ltd specialises in providing cost-effective, high-quality used and refurbished

machinery tailored specifically for the chemical industry. Our extensive stock of process equipment allows you to meet exact specifications without the delays of new manufacturing. Contact our team today to discuss your equipment requirements or to receive a competitive offer for your surplus machinery.

UK MANUFACTURER OF CHEMICAL PUMPS, FILTRATION SYSTEMS & HEAT EXCHANGERS

Empire Pumps Ltd, Stand C30

Empire Pumps Ltd is a UK manufacturer, designer and supplier of solution handling equipment for use in many industries. The Empire brand is diverse, offering solutions to numerous

applications within various industries. Products within our portfolio include Air Operated Diaphragm Pumps, Sealless Magnetic Coupled Pumps, Sealless Drum Pumps, Self-priming Pumps, Filtration Systems, Heat Exchangers and many more.

THE WORLD'S FIRST INTELLIGENT BATTERY PUMP MOTOR

FLUX PUMPS INTERNATIONAL (UK) LIMITED, Stand H54

The new FLUX FBM 4i00 battery pump motor integrates our high efficiency brushless motor with dry run detection,

batch dispense control and IP24 or IP44 ingress protection. With high-power batteries supplied by our partner Einhell, Flux moves drum pump power, convenience and functionality to a new level!

PRESENTATION

PARTICLE DESIGN AND PLANT ENGINEERING FOR FUNCTIONAL POWDERS, GRANULES AND PELLETS

WED 20 MAY
STAGE 4 / 15.30 - 15.45

Speaker:

Swen Schumann, Head of Sales Team - Process Technology Food, Feed & Fine Chemicals - Glatt Ingenieurtechnik GmbH

PROCESS SAFETY

FLANGE PROTECTION SYSTEMS FOR LONG LIFE PROTECTION OF PIPELINE ASSETS

FT Gas Control Systems Ltd, Stand F36

FT Gas Control Kleerband® flange protectors and Kleergel are designed to protect the complete flange joint from atmospheric corrosion encountered by most flanges in most industries.

Developed for offshore marine industry this is a tough low cost solution to a very costly pipelines problem. Kleerband® allows for visual inspection of the flange without removing the flange protector. FT Gas Control also designs and builds Gas pressure control systems.

IP LEGAL ADVICE THAT PROTECTS YOUR WORLD

Barker Brettell, Stand H94

Barker Brettell offers pragmatic Intellectual Property services for businesses

of all sizes, ensuring your innovations are well-protected through patents and trademarks. Our team specialises in protecting technology in chemistry and chemical engineering, and we take pride in understanding your business to provide tailored support.

UPGRADE YOUR WATER ANALYSIS

ESSLAB, Stand H90

Looking to upgrade your Water Analysis? The Macherey-Nagel Spectrophotometer NANOCOLOR

Advanced MACHEREY-NAGEL Spectrophotometer NANOCOLOR UV/VIS II deliver reliable photometric analysis for process water quality, effluent compliance, and raw material/intermediate checks. They enable COD (Chemical Oxygen Demand), Total Nitrogen/Nitrate/Nitrite, Phosphate, and Ammonium testing with high precision and ease of use.

EXPERIENCE THE FUTURE OF CHEMICAL PROCESS MEASUREMENT

Endress+Hauser Ltd, Stand E74

Discover Endress+Hauser's lab-to-process portfolio, enabling real-time inline chemical measurements and removing manual sample risks. Gain faster

insights, enhanced safety, and process reliability. See how Ethernet-APL digital communication advances connectivity, monitoring, and efficiency. Visit us to experience greater accuracy and digitalisation at every stage of your process.

SPEAKER SESSION

INTELLIGENT LABORATORIES: TRANSFORMING CHEMICALS AND MATERIALS INNOVATION THROUGH AUTOMATION

THURSDAY 21ST MAY
STAGE 5 / 13.45 - 14.00

Speaker:
Sanchari Chatterjee,
Research Manager - Everest Group

ACCELERATE FORMULATION DEVELOPMENT WITH SIGNALS ONE

Revvity Signals, Stand J74

Signals One is an advanced R&D data platform designed to streamline formulation

development. It enables structured data capture, collaborative workflow management, integrated chemistry intelligence, and AI-powered insights helping teams innovate faster and smarter.

ANTON PAAR'S NEW THERMAL ANALYSER: REDEFINING SPEED IN DSC

Anton Paar Ltd, Stand G94

Meet Julia, Anton Paar's powerful new Differential Scanning Calorimeter for measuring and understanding thermal transitions

within your samples. With unmatched cooling rates down to subzero temperatures due to the built-in air-cooling module, and intuitive workflows, the Julia DSC is perfect for beginners and DSC experts, from dedicated QC labs, to cutting edge R&D.

NEW EXHIBITOR DEVELOPS & PRODUCES HIGH-PRECISION & FLEXIBLE REACTOR STATIONS, INCLUDING CUSTOMIZED SOLUTIONS

Thermo Analytic Development, Stand D101

TAD is a small company with a lot of energy and ideas. Our international team possesses extensive expertise in production, development, software

development and electrical engineering. We offer a high level of customer optimization, sustainability, safety, and service, providing our clients with unparalleled opportunities. Every component of our products can be repaired or replaced. This leads to cost savings for businesses and reflects our commitment to environmentally conscious practices.

CHEMICAL COLOUR & WATER QUALITY MEASUREMENT

Lovibond, Stand D84

Explore Lovibond instruments for accurate chemical colour and water quality measurement. Trusted globally, our

solutions provide fast, reliable results for labs and industrial applications, helping you maintain precision, compliance, and confidence in every test.

ZEMATRA - YOUR RELIABLE PARTNER IN TESTING

Zematra UK, Stand F90

Zematra UK offers an extensive range of analytical test instrumentation to be used in a wide range of industries, including chemical, environmental&water, food&beverage,

pharmaceutical and more. Among our top partners is KEM Kyoto Electronics, one of the best-known manufacturers of automatic titrators densitometers and refractometers.

EXCELLENCE IN CHEMISTRY LABWARE & PACKAGING WITH DWK

DWK Life Sciences GmbH, Stand C82

DWK Life Sciences is a global manufacturer of precision labware and packaging solutions. We offer over 30,000 glass and plastic products under acclaimed brands DURAN®, WHEATON®, KIMBLE®, PYREX®, QUICKFIT®, and AZLON®, delivering superior products and services to meet the high expectations of our customers.

X-PULSE 90 - A NEW BROADBAND NMR BENCHTOP SPECTROMETER FOR FASTER & PRECISE CHEMICAL ANALYSIS

Oxford Instruments, Stand D86

X-Pulse 90 is a revolutionary new benchtop nuclear magnetic resonance (NMR) spectrometer that brings broadband NMR to the benchtop at 90 MHz for

the first time. X-Pulse 90 is the ideal instrument for flexible chemical analysis, across a wide variety of applications, as it enables investigation of the largest number of nuclei without compromising performance.

KEYNOTE PRESENTATION

KEYNOTE PRESENTATION BY THE HENRY ROYCE INSTITUTE (HRI)

THURSDAY 21ST MAY
STAGE 5 / 11.00 - 11.20

Speaker:
Professor Ian Kinloch, Chief Scientific Officer - Henry Royce Institute

KATANA XP12, ATR UV/VIS SPECTROSCOPIC PROBE

Hellma UK, Stand G90

The Hellma Katana XP12 is the process ready 3-bounce ATR probe for applications measuring high optical density liquids, pastes, and highly concentrated suspensions for spectroscopic analysis in the UV/Vis range. Visit Hellma at G90 to discuss your PAT spectroscopy applications.

CHROMATOGRAPHY DIRECT - UK SUPPLIER OF UCT PRODUCTS

Chromatography Direct, Stand D74

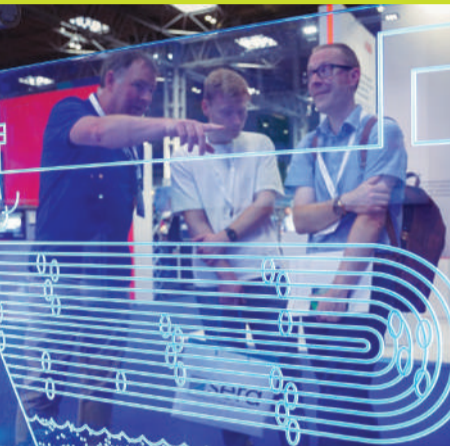

UCT Specialties manufactures Petrarch® silanes, silicones, and platinum catalysts. Our product line supports the needs of laboratories worldwide, including that of R&D, manufacturing, and more. We pride ourselves on delivering high-quality products, which are sustained by a strong technical service support team. Supplied in the UK only by Chromatography Direct.

SHOW FEATURE

INNOVATION SUPPORT

We are delighted to confirm that CHEMUK 2026 is supported by a number of the UK's leading innovation support organisations. Attendees will be able to meet with technical teams from the Henry Royce Institute, Centre for Process Innovation, Biorenewables Development Centre, Imperial College University and others to discuss how the innovation network can support their development journey.

COMPREHENSIVE SOLUTIONS FOR LABORATORY ANALYSIS

Metrohm, Stand G76

Metrohm is one of the world's most trusted manufacturers of high-precision

instruments for chemical analysis. We have made it our mission to deliver pioneering and sustainable solutions to our customers. As a globally active enterprise, we are aware of our economic, social, and environmental responsibilities - and we act accordingly.

MULTIMODAL IMAGING MADE SIMPLE WITH SOLUTIONS FROM LAMBDA PHOTOMETRICS & JASCO

Lambda Photometrics Ltd/ Jasco UK Ltd, Stand B94

Lambda Photometrics & Jasco are leading suppliers of characterisation, measurement & analysis

equipment. Our consultative approach ensures you receive the best advice and get the best solution. We provide instruments, components and turn-key solutions for a variety of industries, fundamental research at universities and institutes throughout the UK & Ireland.

EXPLORE IKA EASYSYN REACTOR AT CHEM UK

IKA England Ltd., Stand D92

Ideal for organic and aqueous syntheses, EasySyn offers complete, perfectly matched components from a single source. With flexible upscaling, ergonomic design, and precise control, it ensures safe, reproducible reactions for research and industrial applications.

KEYNOTE

AQUEOUS EMULSION POLYMERISATION AS A PLATFORM FOR SUSTAINABLE, HIGH PERFORMANCE PROCESS & FORMULATION DESIGN

WED 20 MAY (STAGE 2)

11.40 – 12.00

Speaker:

Dr Shannon North, Technical & Applications Manager – PALEUS

SDS AUTHORIZING SOFTWARE

SIAM S.L., Stand E80

Siam Chemeter generate your SDS automatically in accordance with CLP and GHS regulations quickly and efficiently. Avoid penalties by complying with legislation easily and ensure that your products can be marketed correctly in their destination country.

NEW EXHIBITOR

AUTOMATED DENSITY METERS FOR DENSITY, SG, RI AND ROTATION

QCL, Stand D94

AutoFlex systems are available in drawer and carousel configurations and feature automated sample loading and cleaning. Highly suitable

for toxicology, pharmaceutical cosmetic and flavour and fragrance labs, where samples may be scarce or very valuable requiring minimum sample use, or highly viscous requiring several solvents to fully clean the instrument.

FORRESTERS - PATENT & TRADE MARK ATTORNEYS

Forresters - Patent & Trade Mark Attorneys, Stand D96

Patent and Trade Mark Attorneys

As a leading intellectual property firm, we can help you secure patent protection in the UK, Europe, and worldwide. Our broad range of technical expertise means that we will be able to give you sensible and practical advice in a language you'll understand.

FEATURE WORKSHOP

"TO GREEN OR NOT TO GREEN, THAT IS NO LONGER THE QUESTION! MAKING IT HAPPEN!"

WED 20 MAY (STAGE 2)

12.00 – 13.30

Hosted by CPI

NEW EXHIBITOR

LABORATORY REACTORS & PILOT PLANTS

JUCHHEIM Laborgeräte GmbH, Stand D76

The fully enclosed shieldRack with BoroClave pressure glass reactor offers maximum safety and user convenience. Perfect for laboratory and R&D, it combines a compact, robust design with smart details – a practical lifting device and quick-release fastener for easy reactor handling, tilting, and removal. The

housing includes ports for hoses and cables, while flanges and covers can be made of stainless steel, Hastelloy®, or PTFE for a metal-free setup.

LEADING MANUFACTURER OF LABORATORY AND MEDICAL WASHER SYSTEMS

Prestige Medical, Stand D102

Tuttnauer laboratory washers deliver reliable, validated cleaning and disinfection for glassware and instruments. Designed for demanding research environments, they combine robust construction, flexible racks,

precise process control, traceable cycles, and efficient water and energy use to support consistent, compliant laboratory workflows, worldwide service support available.

SAFE, SUSTAINABLE & EFFECTIVE CHEMISTRY AT EVERY SCALE - FROM ACADEMIA TO INDUSTRY

Asynt Ltd, Stand H102

Asynt designs and manufactures innovative laboratory equipment supporting chemists from discovery through to scale-up. We specialise in precise temperature control, high pressure, Flow Chemistry and Photochemistry, helping

users develop safer, more sustainable and more scalable processes. Our solutions bridge bench scale research and real world application across academia and industry.

CLEANCUBE PRE-FAB CONTAINER FACILITIES

Guardtech Cleanrooms, Stand D100

Cleancube – award-winning portable container cleanroom solutions for a global audience. From 20ft Mini container cleanrooms to large-scale, multi-storey

facilities, Cleancube is a pre-fabricated, off-site manufactured solution utilised by the likes of Cytiva, AstraZeneca, the NHS and many other leading enterprises in Life Sciences and beyond.

YOUR PARTNER OF CHOICE FOR LABORATORY CHEMICALS

Atom Scientific Limited, Stand H74

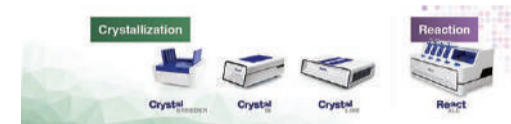

Atom Scientific, the UK's leading independent chemical manufacturer and distributor, offers personalised service, rapid delivery, and expert

technical support. Our range includes chemicals, solvents, IVDR reagents, pH buffers, volumetric solutions, consumables, and lab equipment, all managed efficiently from our Manchester facility.

CRYSTALLIZATION AND REACTION SCREENING TECHNOLOGY

Technobis, Stand E86

Technobis is a world-leading laboratory technology provider for chemical synthesis, solid-state research, process development and formulation. Since 2005, our crystallization platforms have been widely adopted in pharma, agrochemical, fine chemical, fuel, food & personal care labs worldwide. In 2024, we launched the ReactALL™ instrument, empowering process chemists to screen and optimize their reaction experiments for production, with unprecedented efficiency.

www.crystallizationsystems.com

NEW FOR 2026: CHEMUK MATCHMAKING & NETWORKING APP

The new CHEMUK app brings opportunities to establish new connections before even setting foot on the show floor. This is easily done through the matchmaking tool, which determines your top connections to give you best visibility in expanding your network.

WEDNESDAY 20th MAY

Sponsored by

TIME	TITLE	SPEAKER/ORGANISATION
10:00 – 11:00		
10:00 – 10:20	Chemical Industries Association (CIA) opening Stage 1 keynote <i>Check website for latest details</i>	CIA KEYNOTE
10:20 – 10:40	Beyond Compliance – Building a High-Performance EHS Culture	PRESENTATION: David Turberfield, Principal - EHS Culture Services, Ramboll
10:40 – 11:00	CBA Annual keynote – Annual CBA ‘State of the Nation’ chemical industries keynote <i>Check website for latest details</i>	KEYNOTE: Tim Doggett, Chief Executive Officer – Chemical Business Association (CBA)
11:00 – 12:00		
11:00 – 12:00	Theme: “Don’t mention the ‘C’ word” Hosted by CBA’s Tim Doggett, the stage is set for a ‘no punches pulled’ discussion around the challenges of achieving special ‘sector recognition’ – to address very real pains/challenges being felt across the chemical supply chain, against the ever-present ‘societal’ perceptions, misconceptions and ‘optics’ about the ‘chemical industry’. <i>Check website for full details/featured panellists</i>	PANEL SESSION: Hosted by Chemical Business Association (CBA) Panel Host: Tim Doggett, Chief Executive – Chemical Business Association (CBA)
12:00 – 13:00		
12:00 – 13:00	UKGOV BRIEFING: GB Chemicals Regulation: Latest Regulatory Developments Featuring: Defra - Department for Environment Food and Rural Affairs & Health and Safety Executive (HSE) • Defra will outline the future direction for chemicals management and regulation, aiming for a system that is effective, proportionate, and responsive to emerging evidence. This presentation will outline the work underway and the opportunities for industry, NGOs, and other partners to engage as this work progresses. • HSE will provide an update on the latest developments to GB Classification, Labelling and Packaging, GB Biocidal Products Regulation, and GB Prior Informed Consent. <i>Check website for full details/featured speakers</i>	
13:00 – 14:00		
13:00 – 14:00	Alliance of Chemical Associations (ACA) Panel Session Beyond Invest 2035: What the UK Industrial Strategy Must Deliver for Chemicals The UK chemical industry underpins almost every priority growth sector identified in the Modern Industrial Strategy, yet faces unique challenges around energy, regulation, skills and decarbonisation. This Alliance of Chemical Associations panel brings together industry voices to discuss how chemicals are engaging with government to secure the policy framework needed for long-term competitiveness. With a question-time style format and, independent moderation, the session will examine what’s working, what’s missing, and what must change as the Industrial Strategy moves towards implementation, with seven of the ACA leaders and representatives. Represented ACA members include: BASA, BCF, CBA, SIA, UKLA, CIA & BAMA. <i>Check website for full details/featured panellists</i>	ACA PANEL SESSION:
14:00 – 15:00		
14:00 – 15:00	UK REACH PANEL: What’s in the Mix for ‘26’? An expert panel of representatives have been brought together from industry, trade association, NGO, legal sector and government in this session for a lively debate on the UK REACH issues affecting the chemical and downstream-user sectors. This panel will provide an opportunity to hear varying perspectives on this everchanging and continuously developing topic, along with the chance for questions from the audience to our expert panellists. Joint hosts: • Elaine McGavin, Operations Director – Chemical Business Association (CBA) • Neil Hollis – Regulatory Affairs Manager – BASF plc	PANEL SESSION: Featured Panellists: • Rebecca Leete – Head of UK REACH service and policy – Department for Environment, Food and Rural Affairs (Defra) • Silvia Segna – Senior Chemicals Policy Executive – Chemical Industries Association (CIA) • Chloe Topping – UK Campaigner – CHEM Trust • Darren Abrahams – Partner – Steptoe • Ciara Dempsey – Regulatory Affairs Manager – British Coatings Federation (BCF) • Dr. Diane Kelly – Regulatory Operations Manager – REACH at Reckitt
15:00 – 16:00		
15:00 – 16:00	Reducing Your Regulatory Burden’ – Feature Regulatory Affairs panel Navigating the ever-shifting regulatory landscape is one of the chemical industry’s biggest challenges, and this panel brings together some of its sharpest minds to help you do it better. Chaired by Caroline Raine of Caroline Raine Chemical Consultancy Limited, this session will explore the ongoing debate around divergence, convergence, and closer alignment with the EU on CLP and chemical classifications. With post-Brexit regulatory frameworks continuing to evolve, understanding where the UK is headed and how to stay ahead has never been more important.	PANEL SESSION: Featured panel members: • Chair – Caroline Raine, Caroline Raine Chemical Consultancy • Craig Thomason (DEKRA) • Bill Atkinson (Solvents Industry Association) • Eleanor Grimes (Lisam) • Elaine McGavin (Chemical Business Association)
16:00 – 17:00		
16:00 – 17:00	Regulatory Affairs Round Up – Feature Day 1 Finale Session 2026 discussion topics set to include: UK REACH, EU REACH 2.0, CLP for EU and GB & Regulatory Divergence.	PANEL SESSION: The panel will comprise long-standing Chemical Regulations Self Help Group members from various industries.

THURSDAY 21ST MAY

TIME	TITLE	SPEAKER/ORGANISATION
10:00 – 11:00		
10:00 – 10:20	Great British Chemicals: Towards a Resilient Chemicals Industry	KEYNOTE: Dr Thomas W. Franklin MRSC, Programme Manager - Great British Chemicals
10:40 – 11:00	Detergents and Digital Passports In March 2026, the European Commission introduced a significant update to the EU Detergents Regulation, marking a shift toward greater harmonisation, transparency, and digital integration. This presentation will explore the key changes, including the introduction of digital product passports, enhanced digital labelling requirements, and new provisions addressing emerging market trends such as detergents containing micro-organisms, refill systems, and the growth of online sales.	KEYNOTE: Dr Eleanor Grimes, Regulatory Specialist - Lisam
11:00 – 12:00		
11:00 – 12:00	A New World Order: What it means for the chemical supply chain Session moderator: Tim Doggett, Chief Executive, Chemical Business Association The Chemical Business Association represents the chemical supply chain – from distributors and traders to manufacturers and blenders as well as logistics and service providers. <i>Check website for full details/featured panellists</i>	PANEL SESSION: Feature Panel Session – Hosted by Chemical Business Association (CBA)
12:00 – 13:00		
12:00 – 13:00	UK GOVERNMENT FEATURE SESSION Supporting circularity and green chemical agendas in the UK Chemical Industries – through its ‘real world levers’* Focusing on where DBT is supporting circularity and green chemical agendas in the UK Chemical Industries – through its ‘real world levers’ <i>Check website for full session outline and featured speakers</i>	PANEL SESSION: Hosted by The Department for Business and Trade (DBT)
13:00 – 14:00		
13:00 – 13:15	Compliance Planning for UK REACH: The ATRm Explained	PRESENTATION: Rachna Nayyar, Regulatory Manager – REACHLaw UK
13:15 – 13:30	Overcoming Challenges with Substance Identity for REACH Registration	PRESENTATION: Ben Bruford, Consultant, Chemistry – H2 Compliance
13:30 – 13:45	Beyond Conventional Testing: Grouping Strategies Driving the New REACH Polymer Requirements	PRESENTATION: George Leathley, REACH Project Manager – Staphyt
13:45 – 14:00	Challenges for the supply chain in regulating groups of chemicals	PRESENTATION: Dr. Martina Schneider, Regulatory affairs manager – UL Solutions
14:00 – 15:00		
14:00 – 14:15	Navigating Post-Transition Poison Centre Requirements: EU and Global Perspectives	PRESENTATION: Gill Pagliuca, Principal Consultant – Ricardo, Member of WSP
14:15 – 14:30	Eight Reasons to Invest in High Quality Chemical Emergency Response	PRESENTATION: Chris Sowden, Technical Lead, Emergency Response – Ricardo Member of WSP
14:30 – 14:45	Navigating the Changing Tide of Chemical Labelling: Best Practices and a Clarification of the Latest CLP Label Updates*	PRESENTATION: James Killerby, Managing Director – Hibiscus Plc

16 STAGE 2 – CHEMICALS MGMT/ SUSTAINABILITY, BIO-BASED , INNOVATION/SCALE-UP...

WEDNESDAY 20th MAY

Sponsored by

TIME	TITLE	SPEAKER/ORGANISATION
10:00 – 11:00		
10:00 – 11:00	PANEL SESSION - Dangerous Goods Safety Advisors (DGSA) workshop/briefing Rethinking the DGSA: Adding Value Beyond the Regulatory Tick Box Hibiscus PLC are delighted to be bringing together an expert panel to discuss the importance of DGSA to the chemical supply chain. With contributors from the world of enforcement, government (DfT), accreditation bodies, global distributors, training specialists and trade bodies, this expert panel of stakeholders will explore how to solve common challenges in regulatory compliance. Providing proven best practice insight into the handling, transport, and management of dangerous goods.	PANEL SESSION: Hosted by Hibiscus PLC Featured panellists drawn from: Brenntag, Essex Police, Department for Transport (DfT), Driver & Vehicle Standards Agency (DVSA), British Association of Dangerous Goods Professionals (BADGP), and Hibiscus PLC
11:00 – 12:00		
11:00 – 11:40	CLP: Where are we now?* Feature session - Hosted by CHCS (Chemical Hazards Communication Society) The pace of regulatory change has never seemed greater with proposals currently in progress to amend both the GB and the EU CLP regulations. Join the CHCS expert panel to discuss the importance of accurate classification and effective hazard communication, the key changes proposed to both of these regulations, when can we expect these proposals to be finalised, and what will be the likely impacts of these changes on chemical suppliers.	PANEL SESSION: Panel line-up: • Gill Pagliuca, Ricardo plc and CHCS Secretary • Louise Witter, CLP Ltd and CHCS Chair • Kathryn Tearle, BCF and CHCS Vice-Chair • Caroline Raine, Caroline Raine Consultancy and CHCS Member Service Committee Chair • Alison Potts, WSP and CHCS Council Member • Elaine Campling, CHCS Technical Officer
11:40 – 12:00	PALEUS keynote Aqueous Emulsion Polymerisation as a Platform for Sustainable, High Performance Process & Formulation Design	KEYNOTE: Dr Shannon North, Technical & Applications Manager – PALEUS
12:00 – 14:00		
12:00 – 13:30	To green or not to green, that is no longer the question! Making it happen! The UK is a world-leader in developing new R&D but lags behind the rest of the world when it comes to translating that R&D into commercial reality. At previous CHEM UK's where bio-based innovation has been showcased, emphasis has been on companies developing early-stage innovations. In recent years, many of these companies have progressed their TRL level, in spite of well documented issues facing the UK Chemicals sector. This workshop focuses on UK capability and infrastructure to progress early-stage innovations towards commercialisation and showcases companies who are successfully navigating the translation of their early-stage innovations to demo scale.	FEATURE WORKSHOP: Hosted by CPI Featured speakers/panellists: • Daniel Tate, Head of R&D, Robinson Brothers • John Twichen, CEO, Stuff4Life • Martin Atkins, CEO, Green Lizard • Jen Vanderhoven, CEO, BBIA • Jude Huggan, CPI • Jenny Readman, CPI
13:30 – 14:00	Pesticides & Fertilisers Focus Session Featuring short presentations on key regulatory considerations concerning the manufacture & supply of pesticides & fertilisers. Hosted by Murray Smedley, this session brings together experts to discuss the definition, benefits and hurdles of regulatory compliance for those involved in this wide range of chemicals.	PANEL SESSION: Hosted by Barkwith Associates Session speakers : • Hugh Frost Managing Director of Planting Ideas • Martin Usher Owner of Grotech Productions • John Hislop, Regulatory Affairs Director - Barkwith Chemical Limited • Murray Smedley, Owner-Barkwith Associates - Regulatory Affairs specialist
14:00 – 15:00		
14:00 – 15:00	Financing the Net Zero Capital Agenda - Financing of Capital Projects for the Energy Transition and Carbon Neutral Agenda The primary objective of this session is to provide ChemUK attendees with a comprehensive, end-to-end roadmap for funding the next generation of industrial decarbonisation and energy transition projects. The panel will address the critical multi-billion-pound investment gap by tracing the flow of capital, identifying key de-risking mechanisms, and detailing the commercial certainties required to take projects from concept to final investment decision. The session is structured to follow the life cycle of a major capital project, from early-stage public support to commercial execution – includes: 1. Scaling Capital for Growth and Clean Energy: Dr Emily Sidhu (National Wealth Fund) 2. Private Investment Criteria: Ricardo Martinez (KRBN - Private Equity) 3. Commercial Execution & Certainty: Matthew Willson (Navigator Terminals) 4. The Cluster Model: Daren Smith (Tees Valley Industrial Net Zero Leadership Group)	PANEL SESSION: Hosted by NEPIC (The North East of England Process Industry Cluster) Session Host: Joanne Smith, CEO - NEPIC
15:00 – 16:30		
15:00 – 16:30	Positioning for Growth: Unlocking the UK's Chemicals Ecosystem The UK chemicals sector is operating in an increasingly complex and fast-changing environment. This session aims to guide CHEMUK attendees through understanding and navigating the UK chemicals innovation landscape effectively and quickly, enabling companies to scale and grow into the high growth businesses of the future. The session will cover: • How the UK's innovation, funding and industrial strategy landscape is evolving and what it means for chemicals companies • Innovate UK Business Connect (IUKBC) activities around sustainable chemicals • Examples of how businesses are using the ecosystem to accelerate innovation • How IUKBC and its networks help companies find the right routes to funding, partners and scale-up support • Clear next steps for attendees on how to continue the conversations at the Innovate UK stand and following CHEMUK	PANEL SESSION: Feature Panel - Hosted by Innovate UK Business Connect (IUKBC)

THURSDAY 21st MAY

TIME	TITLE	SPEAKER/ORGANISATION
10:00 – 11:00		
10:00 – 10:15	Strategic Compliance – Streamlining Sustainability and Chemical Regulation	PRESENTATION: Amy Fearon, Associate – WSP
10:15 – 10:30	The hidden Risk across the supply chain: When It's Not Your Incident, But It Is Your Responsibility	PRESENTATION: Chris Scott, Head of Crisis and Emergency Management – CHEMTREC
10:30 – 11:00	From concept to capability – how to make the market-driven insetting breakthrough a reality Delegates will hear how coordinated capability building can turn insetting from a promising idea into a functional market mechanism bringing credible, auditable and distributable value to chemical sector emissions reduction.	FEATURE SESSION: Leonardo Centre on Business for Society, Imperial College London <i>Session Speakers – check website for latest updates</i>
11:00 – 12:00		
11:00 – 12:00	Is Extended Producer Responsibility for packaging (pEPR) helping or hindering the domestic chemical market? • Are plastics being unfairly treated as a material (relatively high pEPR fees, eco-modulation inconsistencies in the RAM, additional fees in the PPT). • What provision is there in pEPR for innovation? (how can “new” materials and developments get to a point where they are not punished by high initial fees, and scale). • How can consumer chemical manufacturers cope with the tidal wave of legislation at the moment? (Not only pEPR but Simpler Recycling, the PPWR, REACH etc. and the legislative divergence from the EU). • Many consumer chemicals are labelled as “dangerous goods”. Under the Recycling Assessment Methodology (RAM) and pack containing SHVC will automatically be classed as RED (High Eco modulation that will only increase in the future). What can the industry do to mitigate these additional costs? • Will pEPR cause format or material switching?	PANEL SESSION: Hosted by British Plastics Federation (BPF) Panel Host: Martin Kirsh (Packaging Federation – Representing the packaging industry) <i>Panellist lineup: check website for latest updates</i>
12:00 – 13:00		
12:00 – 13:00	Value creation through decarbonisation – How do we turn carbon into a performance criteria?	PANEL DISCUSSION: Hosted by Steven Hughes, Azelis <i>Check website for session details and featured panellists</i>
13:00 – 14:00		
13:00 – 13:15	ISO/FDIS 14001:2026 - Preparing the Chemicals Sector for the Upcoming Revision (Part 1 of a 2-part Ramboll feature regulatory session)	PRESENTATION: David Turberfield, Principal – EHS Culture Services, Ramboll
13:15 – 13:30	LCA for Chemicals - Preparing to comply: SRS, ESPR and more (Part 2 of a 2-part Ramboll feature regulatory session)	PRESENTATION: Sam Hinton, Director of Life Cycle Assessment (LCA) – Ramboll
13:30 – 13:45	China's Hazardous Chemicals Safety Law and What It Means for Compliance in 2026	PRESENTATION: Adam Hembrecht, Regulatory Consultant – CIRS Group
13:45 – 14:00	Same Chemistry, Different Rules: Surviving Global Regulatory Divergence PFAS Regulation as a Model for the Evolution of REACH-like Frameworks	PRESENTATION: Speakers: • Inessa Kiristaeva, Customer Happiness Manager and Chemical Regulatory Expert – REGARTIS • Yana Trubitsyna, Regulatory Queen – REGARTIS
14:00 – 15:00		
14:00 – 14:15	From Planet to People friendly, introducing the chemicals of tomorrow	PRESENTATION: Freddie Porter, Sales Manager – Holiferm
14:15 – 14:30	Lignin Emerging as a Next-Generation Chemical Feedstock	PRESENTATION: Thomas Bithell, Technology Analys – IDTechEx
14:30 – 14:45	Practical Guidance on Product Carbon Footprints – The Together for Sustainability Guideline and Why it Matters	PRESENTATION: Steven Hughes, EMEA Sustainability Manager – Together for Sustainability (through Azelis)

WEDNESDAY 20th MAY

TIME	TITLE	SPEAKER/ORGANISATION
10:00 – 11:00		
10:00 – 11:00	Sticky Business: Exploring Future Opportunities in Adhesives & Sealants BASAs Lorna Williams, Jim Palmer and Caroline Raine will be joined by a number of member company representatives including Bostik, HB Fuller, F Ball and Co Ltd and Mapei to join the panel discussion.	PANEL SESSION: Feature panel session: Hosted by British Adhesives & Sealants Association (BASA) <i>Check website for full session details/featured panellists</i>
11:00 – 12:00		
11:00 – 12:00	Theme: Cosmetics and Ingredients - Are you legal? Cosmetic products contain both chemicals and cosmetic ingredients, so what regulations do you need to comply with to keep you legal? And how does this differ between the UK and EU? We'll guide you through the different laws looking at REACH, Cosmetic Regulation, Classification and Labelling, Packaging, Claims and product safety assessments. We will then open up the floor for your questions to finish the session off.	BCA PANEL SESSION: Feature panel – Hosted by British Chemicals Association (BCA) <i>Check website for session further details/featured speakers</i>
12:00 – 13:00		
12:00 – 12:20	Oxone™ Monopersulfate Compound: The Next-Generation Oxidant for Low-Temperature Laundry Detergents LANXESS Keynote Presentation	KEYNOTE: Speaker: Dr Kelly Board, Technical Applications & UK Sales Manager – LANXESS
12:20 – 12:40	Triameen® Y12D: A Versatile Active for Modern Biocidal Products Nouryon keynote presentation	KEYNOTE: Speaker: Renate Borgmann-Strahsen, Technical Development Manager Biocides, Nouryon
12:40 – 13:00	When Cleaning Becomes Challenging Univar keynote presentation	KEYNOTE: Speaker: Ravi Rathod, Technical Manager – Univar Solutions
13:00 – 14:00		
13:00 – 14:00	What do Beauty Brands Really Want from the Bioeconomy? In the second of our What Do Beauty Brands Really Want? series, this year, we turn our focus to the bioeconomy. Policymakers are showing increasing interest in the bioeconomy and its potential to drive sustainable economic growth. At the same time, the beauty industry is actively exploring biobased raw materials, technologies, and packaging solutions that can meet evolving manufacturing and product development requirements. CCUK has partnered with the BBA to establish the Beauty & the Bioeconomy Task Force, an initiative that is already delivering tangible impact. As with previous sessions, CCUK will convene a panel of four senior representatives from across the beauty industry to share their insights, priorities, and expectations. This promises to be a must-attend session for anyone interested in the future of beauty and the bioeconomy.	PANEL SESSION: Hosted by Cosmetics Cluster UK <i>Check website for session details/featured panellists</i>
14:00 – 15:00		
14:00 – 14:15	"Industry cooperation groups, THE solution to speeding up substitution"	PRESENTATION: Elke Van Asbroeck (CEO Apeiron-Team)
14:15 – 14:30	Reclassification Risks - Is relabelling pushing your site into COMAH?	PRESENTATION: Mick Goodwin, Technical Director – WSP
14:30 – 15:00	Dangerous Goods issues in the modern chemical supply chain British Association of Dangerous Goods Professionals (BADGP) keynote presentation	KEYNOTE: Speaker: Les Richings, Chair, British Association of Dangerous Goods Professionals (BADGP)
15:00 – 16:00		
15:00 – 15:20	Food-Based Attractants and Biocidal Regulation: Understanding the Boundaries	PRESENTATION: Victoria Tilley, Senior Regulatory Affairs Consultant – Enviresearch Ltd
15:20 – 15:40	Future-Proof Through Compliance: Transform Rules Into Real Opportunity	PRESENTATION: Dr Tine Vandebrouck, Director – Apeiron
15:40 – 16:00	The coating that nearly slipped away: The value of Intellectual property (IP) strategy	PRESENTATION: Dr Melvyn Ansell, Patent Attorney – Secerna LLP

THURSDAY 21st MAY

TIME	TITLE	SPEAKER/ORGANISATION
10:00 – 11:00		
10:00 – 11:00	Safe and Solvent: Risks, Regulation, and Resilience in the European Solvents Industry The solvents sector is operating in one of the most challenging environments it has faced in decades. Global instability, rising energy costs, supply chain disruption, and an increasingly complex regulatory landscape all place pressure on companies striving to remain competitive, compliant, and sustainable. Yet despite these headwinds, the industry continues to adapt, innovate, and uphold its commitment to safety and responsible chemical management. This panel brings together expertise from across the industry to explore how the UK and European solvents industries are responding to these pressures while maintaining operational resilience. Through real world examples and practical insights, the panel will highlight how companies are balancing regulatory demands, market volatility, and sustainability expectations – and what it truly takes to stay both safe and solvent. <i>Check website for full session details/featured panellists</i>	PANEL SESSION: Hosted by the Solvents Industry Association Featured panellists are drawn from the SIA Technical Committee
11:00 – 12:00		
11:00 – 11:20	"Ethanol a Game of Two Halves" – British Chemicals Association (BCA) keynote	BCA KEYNOTE: Speaker: Jim Thomas – representing BCA
11:20 – 11:40	Developing a strategy for growth for the downstream chemicals sector	FEATURE PRESENTATION: Joint speakers: • Nigel Steward, Director and Professor of Practice at the Centre for Sectoral Economic Performance (CSEP) - Imperial College London • Tony Heslop - independent consultant
11:40 – 12:00	Redefining Solvent Innovation for Tomorrow's Chemistry: Driving Circularity Through Bio-Based Solutions In this keynote, Jeffrey Whitford, Vice President of Sustainability and Social Business Innovation at Merck, will explore how greener products are reshaping scientific workflows and driving business transformation.	KEYNOTE: Merck Life Science Keynote Presentation Speaker: Jeffrey Whitford, Vice President of Sustainability and Social Business Innovation, Merck Life Science
12:00 – 13:00		
12:00 – 13:00	The risks on biocidal Active Substances and consequences of their loss Feature panel – Hosted by British Chemicals Association (BCA) This session will explore the impact of regulation on active substance survival and the potential consequences of their loss to industry.	BCA PANEL SESSION <i>Check website for full session details/featured panellists</i>
13:00 – 14:00		
13:00 – 13:30	How Outsourcing in the UK Empowers Brand Owners and Retailers to Focus Core Operations and Achieve Better Outcomes This panel will explore the many ways outsourcing supports brand owners and retailers by enabling them to concentrate on their core business activities, while trusted partners manage day-to-day operations. The discussion will highlight how this approach drives efficiency, resilience, and strategic focus – particularly in times of global uncertainty and increasingly vulnerable supply chains.	BCMPA PANEL: Hosted by BCMPA – The Association for Contract manufacturing, Packing, Fulfilment & Logistics Session Host: Murray Smedley, Managing Director – Barkwith Associates Limited Featured panellists – drawn from Cod Beck Blenders Limited, Brenntag, Rakem Group & BCMPA <i>Check website for full session details/featured panellists</i>
13:30 – 13:45	Soil to Surface: How Cleaning Mechanisms Shape Formulation Design	PRESENTATION: Ashley Quigley, Technical Development Manager – HI&I – Surfachem
13:45 – 14:00	The Importance of Size and Zeta Potential Characterisation in the Development of Coatings	PRESENTATION: Dr Nellie Chourmouziadi Laleni, Applications Specialist – Malvern Analytical
14:00 – 15:00		
14:00 – 14:20	Turning Data into Advantage: AI, Efficiency, and Growth in Chemicals R&D	PRESENTATION: Tea Pavlek, MSc Biotechnology/Pharma, Event Manager, Uncountable Inc
14:20 – 14:40	Improving Critical Quality Attribute Control in Reactive Distillation via Hybrid Mechanistic - ML Digital Twins	PRESENTATION: Joint speakers: • Emma McGlade, Global Accounts Executive – Basetwo AI • Thouheed Abdul Gaffoor, CEO & Co-Founder – Basetwo AI
14:40 – 15:00	CO2 Utilisation, Developing Unique Catalyst Technology to Create Surfactants from Waste CO2	PRESENTATION: Simon Bennett, Commercial Director – Surfactants – Econic Technologies Ltd

Check website for latest updates

18 STAGE 4 – PROCESS ENG & SAFETY, EHS/RISK MGMT, DECARB /ENERGY, ASSEST MGMT...

WEDNESDAY 20th MAY

TIME	TITLE	SPEAKER/ORGANISATION
10:00 – 11:00		
10:00 – 10:15	Integration of Appropriate Testing Methods for a Complete Chemical Process Evaluation	PRESENTATION: Luke Bucktrout, CPE Laboratory Technician – Sigma HSE (UK) Ltd
10:15 – 10:30	Cyber-Physical Risk in Chemical Manufacturing: When Cyber Attacks Become Safety Hazards	PRESENTATION: Jon Wiggins, Technical Manager – Functional Safety and Cyber Security – DEKRA UK
10:30 – 10:45	Responding to a PFAS Environmental Incident: Risk and Recovery	PRESENTATION: Speakers: George Hockridge (Regional Manager – Consultancy West) – Adler & Allan Tom Richards PhD MSc(Hons) DGSA, (Senior Chemical & Pollutants Advisor) – Adler & Allan
10:45 – 11:00	Savings with Low Emission Solutions	PRESENTATION: Lex Pelsma, Technical Sales Manager, TEADIT
11:00 – 13:00		
11:00 – 13:00	Pathways to Safer, Smarter, Cleaner Industry Part of the 2-day IChemE-hosted programme at CHEMUK 2026 IChemE's Day One programme showcases how chemical and process engineers are enabling safer, more sustainable and more efficient industry. Across Hydrogen, Digitalisation, Sustainable Energy Systems and Bio-tech/Bio-engineering, speakers share practical routes to real-world deployment, with process safety woven throughout. Provisional themes: • Hydrogen and safe deployment • Digitalisation and data enabled performance • Sustainable energy systems and decarbonisation pathways • Bio tech / bio engineering and emerging manufacturing routes	ICHEME MINI CONFERENCE: IChemE Daily Mini-Conferences at CHEMUK 2026 (Day 1) <i>Check website for latest session details/features speakers & subtopics</i>
13:00 – 14:00		
13:00 – 13:30	Annual 'IChemE Keynote' at CHEMUK 2026 Part of the 2-day IChemE-hosted programme at CHEMUK 2026	ICHEME KEYNOTE: Professor Raffaella Ocone OBE FRSE FREng FICHEM, President – Institution of Chemical Engineers (IChemE) <i>Check website for any latest programme change</i>
13:30 – 13:45	Industrial IoT: Practical Pathways To Power Past Pilot Purgatory	PRESENTATION: Will Brown, IIoT Solutions Manager – PowTechnology
13:45 – 14:00	Automating (sub) surface material quality inspection	PRESENTATION: Dr Aleksander Preglej – VP, Industrial Automation – INEA
14:00 – 15:00		
14:00 – 15:00	"Decarbonisation in Food and Drinks Industry" Part of the 2-day IMechE Process Industries Division programme at CHEMUK 2026 This panel session will hear from speakers discussing the need for decarbonisation of food and drinks industry to be recognised and driven by business leaders, whether they are technically experienced or not. We will share guidance on what organisations, and the professionals within them, should focus on and where they can go to find help and good practices. This will be followed by a question-and-answer session where the audience can tap into the experiences and expertise of the panel. This session will be hosted by the Food and Drinks Engineering Committee, and supported by the Decarbonisation, Heating and Cooling working group of the IMechE Process Industries Division.	IMECHE PANEL SESSION: <i>Check website for full session breakdown and featured speakers</i>
15:00 – 16:00		
15:00 – 15:15	Thermal Destruction of PFAS During Full-Scale Reactivation of PFAS-Laden Granular Activated Carbon	PRESENTATION: Dr. Alberto Barral, Applications Engineer – Chemviron
15:15 – 15:30	PFAS Emissions Management using Surface-Modified GAC (Granular Activated Carbons) – "Search, Capture & Destroy"	PRESENTATION: David Reay, Head of Strategic Partnerships – Puragen
15:30 – 15:45	Particle Design and Plant Engineering for Functional Powders, Granules and Pellets	PRESENTATION: Swen Schumann, Head of Sales Team – Process Technology Food, Feed & Fine Chemicals – Glatt Ingenieurtechnik GmbH
15:45 – 16:00	Cost-Efficient O/W Emulsion Stability Without High-Pressure Homogenisation: A Practical Approach Using Multi-Stage In-Line Mixing	PRESENTATION: Carmen M. Lerga, Founder and Technical Lead of Olalla Consulting, in collaboration with Vak Kimsa
16:00 – 17:00		
16:00 – 17:00	PANEL SESSION "Joint Industry Project on Asset Integrity Transformation" This JIP brings together IMechE, EEMUA, CIA member companies (Syngenta and DSM are core members), and the UK regulator to address one of the most significant performance challenges facing chemical and process operators today: transforming asset integrity management through risk-based methods, digital technologies, non-invasive inspection techniques, improved mechanical integrity competence, and more efficient turnaround strategies. Early engagement from operators, service providers and technology developers has been exceptionally strong, demonstrating the high relevance and urgency of the programme. Session aims: Present the industry-wide value and performance gap identified across UK chemical operators in relation to mechanical integrity, inspection practices and turnaround optimisation. Introduce the objectives, scope and deliverables of the JIP, including development of a standardised Asset Integrity Transformation Framework. Highlight clear opportunities for operators, technology vendors and service partners to contribute to and benefit directly from the programme. Share early insights on how enhanced integrity strategies can reduce intrusive inspections, optimise turnaround duration and cost, and significantly improve safety and uptime.	FEATURE PANEL SESSION: <i>Check website for full session breakdown and featured speakers</i>

THURSDAY 21st MAY

TIME	TITLE	SPEAKER/ORGANISATION
10:00 – 11:00		
10:00 – 11:00	The PINZ CDT – Net Zero Research with Industrial Impact The PINZ CDT is redefining how industry and academia collaborate on PhD research. Our researchers work directly on real sustainability challenges from day one – driving measurable progress in energy optimisation, process efficiency, waste reduction, green solvent development and circularity. In this session, we'll highlight the tangible impact the PINZ CDT is delivering across industry. Through a series of standout projects and results, we'll demonstrate how this new model of partnership is accelerating innovation, outline what's next for the programme, and explain how we can support your business with your Net Zero goals.	FEATURE PANEL SESSION: Hosted by: Process Industries Net Zero CDT (The "Process Industries: Net Zero" (PINZ) Centre for Doctoral Training). <i>Check website for latest session details/features speakers & subtopics</i>
11:00 – 13:00		
11:00 – 13:00	Developing the Modern Process Engineer Part of the 2-day IChemE-hosted programme at CHEMUK 2026 Day Two focuses on the skills and development pathways needed for a rapidly evolving sector. Sessions explore future skills, digital and data literacy, process safety competence, and early-career development, with clear takeaways for individuals, employers and educators strengthening the talent pipeline. Planned sessions: • Grounding learners in chemical engineering – evolving technical education pathways and how employers can support the pipeline • Skills That Stick: Real Early Career Development in Action – mentor and mentee paired session • AI in education and practice – practical skills that improve performance and decision making • From Graduate to Practitioner – how employers are modernising early career development and training • Skills panel – bringing the above sessions together, focused on practical actions for individuals, employers and educators	MINI-CONFERENCE IChemE Daily Mini-Conferences at CHEMUK 2025 (Day 2) Full programme outline, featured speakers, and subtopics – coming soon
13:00 – 14:00		
13:00 – 13:30	"Compliance in Bulk Materials Handling" IMechE Process Industries Division Keynote	IMECHE PROCESS INDUSTRIES DIVISION KEYNOTE: Speaker: Prof Michael Bradley, CEng FMHEA BSc PhD Professor of Particle and Bulk Technology and Director of The Wolfson Centre for Bulk Solids Handling Technology at the University of Greenwich
13:30 – 13:45	Production waste energy capture and utilisation	PRESENTATION: Andrew Wills, Managing Director – Thermal Fluid Systems Ltd
13:45 – 14:00	From Predictive Alerts to Prescriptive Action: Improving Reliability and Reducing Downtime in Chemical Plants	PRESENTATION: Sean Maley, Regional Manager (Europe) – Infinite Uptime
14:00 – 16:00		
14:15 – 14:30	Beyond the Water Barrier: Capturing the 15% CAGR Opportunity in Renewable Carbon Feedstocks	PRESENTATION: Dr Michael Fothergill, Director – Climostat Ltd
14:30 – 16:00	MINI CONFERENCE: A Paradigm Shift in Spill Response The energy transition, shifting political priorities, and reduced regulatory funding are creating new challenges for pollution responders. As alternative fuels, chemicals, battery storage, and ageing infrastructure become more prevalent, prevention and preparedness remain vital: • Understand your obligations • Understand your inventory and your site • Have a plan, communicate, test, review. Richard Baker, Executive Director of the International Spill Accreditation Scheme, will chair a session of leading members of the UK & Ireland Spill Association covering: • Regulation and best practice guidance – updates for new pollution incidents • Prevention measures – minimise the migration and impact of spills • Case Studies – recent incidents highlighting current challenges. • Resources – how the pollution response and remediation community is there to help.	MINI CONFERENCE: Hosted by: UK & Ireland Spill Association

Check website for latest updates

WEDNESDAY 20th MAY

Sponsored by

TIME	TITLE	SPEAKER/ORGANISATION
10:00 - 11:00		
10:00 - 10:20	RSC Change Makers programme insight Supporting ventures tackling climate, health and industrial challenges. RSC Change Makers supports deep tech chemistry driving real-world impact. Full presentation outline coming soon.	PRESENTATION: Andrew Waterworth, Manager – Impact Investment Initiatives – Royal Society of Chemistry
10:20 - 10:40	The 'Forever Journey': PFAS Regulations in the UK Blue Frog Scientific Keynote Presentation	KEYNOTE: Dr Martyn Shenton, Principal Consultant – Blue Frog Scientific
10:40 - 11:00	Reuse, Recycling and REACH - Regulation in the Circular Economy	PRESENTATION: Alison Potts, Associate Director – WSP
11:00 - 13:00		
11:00 - 12:30	Resurrecting the UK Chemicals Industry: Growth, Resilience, Sustainability and Competitive Advantage This workshop is a reality check -and a reset -for the UK chemicals sector. As capacity has declined, import dependence has grown, and investment has flowed elsewhere, this session brings together senior industry leaders, policymakers, economists, and investors to confront a hard question: is the UK still investable for chemicals growth – and on what terms? Implicit in that challenge is how the UK rebuilds resilient, financially and environmentally sustainable chemical supply chains at home, reducing exposure to fragile global dependencies while strengthening domestic manufacturing capability. <i>Check website for details of featured sub-themes and speakers</i>	FEATURE WORKSHOP: Hosted by UK-ASCM: UK Alliance for Sustainable Chemicals and Materials
12:30 - 12:45	From pilot to production: Scaling modular, customised manufacturing	PRESENTATION: Dr Jens Klabunde, Business Development Manager – Connect Chemicals
12:45 - 13:00	X3D Catalyst - A step change catalyst technology for Step Change Catalysis!	PRESENTATION: Joshua Henshaw, Commercial Manager – Chemical Catalysts and Adsorbents – BASF plc
13:00 - 14:00		
13:00 - 14:00	UK Chemicals – Reaction, Reinvention and Resilience We are all aware of the challenges faced by the chemicals sector and recent UK site closures. This session explores the challenges and how some are facing these with resilience whilst others are working on future reinvention of our sector.	PANEL SESSION: Hosted by The Henry Royce Institute <i>Check website for further session outline & featured speakers</i>
14:00 - 16:00		
14:00 - 14:30	Chemistry: a catalyst for change – RSC Keynote Join the Royal Society of Chemistry's Chief Executive, Dr Helen Pain as she outlines the RSC's recent activities and achievements and the society's vision for the future of the chemical sciences.	RSC KEYNOTE: Speaker: Dr Helen Pain MBE CSci CChem FRSC, Chief Executive, Royal Society of Chemistry
14:30 - 16:00	RSC Mini Conference – Skills and Pathways for a Sustainable Chemical Sciences Workforce As the chemical sciences evolve, so do the skills and career pathways that shape its workforce. This mini conference explores how professional development, technical and vocational routes, and the application of transferable skills are enabling chemical scientists to build resilient, future focused careers. Hear from the RSC and industry contributors on how we are broadening pathways into the profession and supporting the skills needed for a sustainable future. 14:30-14:45 – RSC Perspective. Technical and vocational pathways for professional development: Catherine Perry RSciTech MRSC, Professional Registration Specialist, Royal Society of Chemistry 14:45-15:00 – Industry Case Study. Degree apprenticeships in the pharmaceutical industry: Christina Dumitriu Jackson, Peptide Discovery Scientist, AstraZeneca 15:00-15:15 – Industry Case Study. Transferable skills to succeed in industry: perspectives from a battery tech SME: Dr Gary Baker CChem MRSC, Anaphite Ltd 15:15-16:00 – Panel Discussion & Q&A. Skills development, future skills, and emerging workforce needs: Catherine Perry (Host); Christina Dumitriu Jackson; Dr Gary Baker; Dr Alex Reip, Advisor, Oxford nanoSystems & RSC Trustee	RSC MINI CONFERENCE
16:00 - 16:45		
16:00 - 16:45	Practical mechanisms for driving adoption of green chemistry This session examines the practical policy levers that can accelerate the uptake of green and sustainable chemistry in the UK. Panellists will explore regulatory tools, market shaping mechanisms, and voluntary initiatives, drawing on lessons from successful approaches used internationally. <i>Check website for further session outline & featured speakers</i>	PANEL SESSION: Hosted by: Green Rose Chemistry Session Host: Anna Zhenova, Ph.D – Founder & CEO, Green Rose Chemistry

THURSDAY 21st MAY

TIME	TITLE	SPEAKER/ORGANISATION
10:00 - 11:00		
10:00 - 10:15	Understanding EU and GB Biocidal Product Registration Routes: Strategic Considerations and Common Pitfalls	PRESENTATION: Dr Helen Pye, Senior Regulatory Affairs Consultant – Enviresearch Ltd
10:15 - 10:30	REACH information requirements for Endocrine Disruption	PRESENTATION: Dr David Andrew, Technical Director – RSA
10:30 - 10:45	Practical Advice on the New CLP Hazard Classes	PRESENTATION: John Adams, Senior Product Safety Manager – Dr. Knoell Consult Ltd
10:45 - 11:00	Navigating Harmonised Classifications under CLP: Learnings for the UK Illustrated by a case study on Rosins	PRESENTATION: Jan Teuben-Marten, Head of Product Stewardship and Strategic Initiatives – Penman Consulting
11:00 - 12:00		
11:00 - 11:20	Keynote presentation from The Henry Royce Institute (HRI) <i>Check website for latest keynote details</i>	KEYNOTE: Professor Ian Kinloch, Chief Scientific Officer – Henry Royce Institute
11:20 - 11:40	Illuminating flow - Unlocking photochemical pathways for controllable selective synthesis	PRESENTATION: Andrew Mansfield, Technology Manager – Asynt Ltd
11:40 - 12:00	5 Little Observations: Regulatory Changes with Big Implications for the Chemical Industry	PRESENTATION: John Miller, Senior Consultant and Head of Representative Services – Blue Frog Scientific
12:00 - 13:00		
12:00 - 13:00	The Big Education Debate The Big Education Debate 2026 – addresses the critical shortage of science skills, focusing on the UK's seriousness in underpinning its chemical sciences industries long term. Building on last year's hugely well received debate, discussion will continue on 'where is the UK now?' – on supporting its science skills and science base requirements, to meet future 'growth' and 'Net Zero Industrial transformation' ambitions... A cross-section expert panel will again debate this 'big' question (12 months on!) – drawn from Academia, Education & Skills bodies, the Chemical Industry, plus the sector's leading Professional Bodies.	PANEL DISCUSSION: Hosted by Dr Suze Kundu, Freelance Science Communicator, and Journalist
13:00 - 14:00		
13:00 - 13:15	Raman spectroscopy to improve process understanding and control of multi-phase slurry polymerization	PRESENTATION: Dr. Carsten Uerpmann, Business Industry Manager – Chemical Industries – Endress + Hauser
13:15 - 13:30	Optimising shelf-life and stability in dispersions	PRESENTATION: Michael Gould, Turbiscan Product Expert – Microtrac
13:30 - 13:45	Optimisation of binder ratio for wet granulation using an MTR	PRESENTATION: Charlotte Cartwright, Senior Compaction Scientist – Merlin Powder Characterisation
13:45 - 14:00	Intelligent Laboratories: Transforming Chemicals and Materials Innovation Through Automation	PRESENTATION: Sanchari Chatterjee, Research Manager – Everest Group
14:00 - 15:00		
14:00 - 14:30	The Materials Innovation Factory - Feature Insight Session Materials Innovation Factory (MIF) at the University of Liverpool is a key partner and facility of the Henry Royce Institute. The Materials Innovation Factory draws together world-leading, multi-disciplinary research expertise, unparalleled technical facilities, and a dynamic support infrastructure to revolutionise your R&D. This feature insight focuses on how MIF not just harnessing AI /Robotics & Automation-powered innovation streams – but also regarded perhaps as a 'working prototype' of how future materials R&D ecosystems will function!	FEATURE SESSION: <i>Check website for further session details</i>
14:30 - 14:50	Beyond the Lab: Alternative Paths for a Career in Chemistry	PRESENTATION: Aoife McDaid, Junior Consultant, Chemical Compliance – WSP UK Ltd
