IF YOU ARE A SPACE ONLY STAND, REMEMBER!

Remember that as a **space only stand** you have a few tasks to keep your stand going.

Stand design and technical plan

You must send us before **September 28th** the ***design*** you would like to make for your stand for the event. This must include floor plan and elevation dimensions to ensure that it complies with the participation regulations.

In addition, you must indicate us with a ***technical plan*** in which part of your stand you want the elements you have contracted with us to be located (air intakes, electrical panel, sockets...).

Electrical box

Besides, remember that in case you haven't ***hired the electrical box*** yet, you must do it so you can have electricity in your booth as it is not included with the participation. You have included 0,13kW/m2 for the consume but not the box to use it. The web-shop closes on **October 6th**.

Stand's number and name

Finally, this year it is mandatory for each stand to display a sign showing its number and name so that it can be easily identified. You can provide this yourselves or order from us a vinyl based on a template to place on the floor of the aisle next to your stand (1 unit for €35, 2 units for €65). For further information contact empack.operaciones@easyfairs.com.
