SOME IDEAS

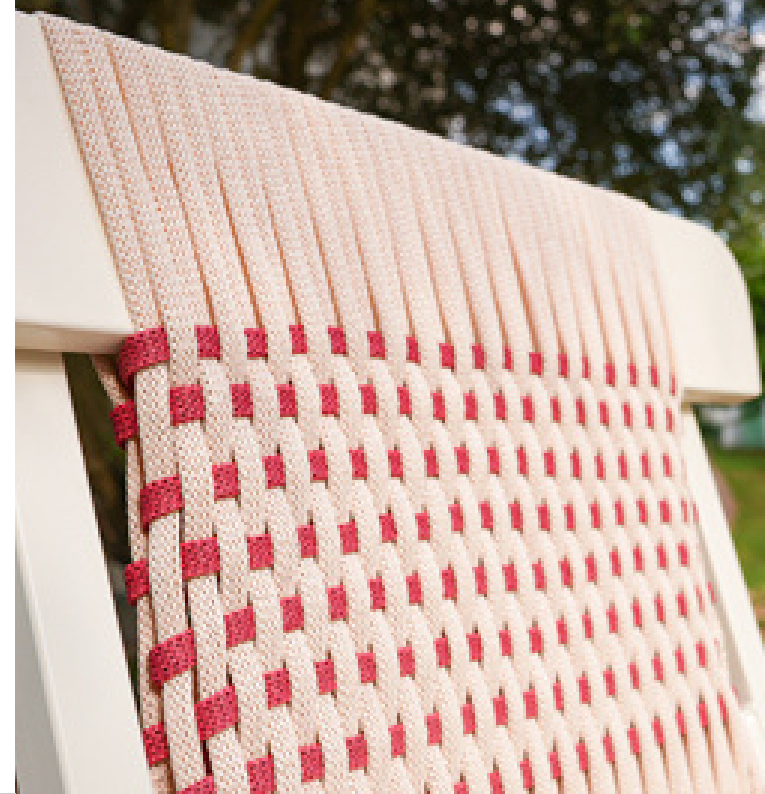

INTERIOR DESIGN

More and more environmentally conscious brands are looking for green and eco-sustainable materials to create objects of design and furnishings suitable for everyday locations.

The colorful and flexible tubular paper ribbons by multiple uses set free the creativity of craftsmen and designers to create homewear and living collections for natural and ecofriendly interior furnishings.

LIGHTING

Colorful, resistant and versatile, it can be used as a decorative element to give life to original lighting. Creativity ranges from interweaving of color and natural fiber for environmentally conscious lighting.

PAPER RIBBON MADE IN ITALY

Made of 100% cellulose coming from certified forests these special ribbons are ecofriendly and at the end of their life cycle can be disposed in the appropriate selective collection containers to be recycled and give life to new products.

Colorful, resistant, versatile and equipped with a unique tubular structure are available in a wide palette of colors and can be braided or used separately to create environmentally friendly accessories.

These made in Italy paper ribbons, like other laces in cloth, such cotton, resist to water and traction and are perfect for customization such as writings and new colors to give life to new ecofriendly collections.

FOOTWEAR

The colorful and resistant paper tubular ribbons can be used to make strings in 100% pure cellulose for environmentally friendly shoes.

They are both hand or machine washable so that they can be interchanged with each other to renew footwear with always new color combinations in line with different styles and trends

FASHION & BIJOUX

Games of color and intertwining let space to multiple ideas to create handmade and natural bijoux or fashion accessories for new trendy and natural collections.

PACKAGING & PROMOTIONAL ITEMS

The tubular paper ribbon is ideal for eco-sustainable packaging. Brightly or pale colored it surprises for its texture giving a natural effect to the packages made with it. Customizable on request in different colors and with freely chosen words, it is capable of conveying the brand in an original way with zero impact on the environment.
