“Uneven, slightly asymmetrical and artisanal language”

Natural & Organic shapes

UNIQUE SLIGHTLY ASYMMETRICAL SILHOUETTES

An object of which geometry is not regular, projects a different elevation each time is observed with a different angle or point of view. Therefore, the object (the bottle) if it is not symmetrical, is different each time.

Non perfect, patented asymmetric bottles reproducing the shapes of the first industrialised bottles. A quality that grants movement and individuality to each of our bottles.

Aesthetic imperfections are welcome!

The image shows two wine bottles lying on a rustic wooden surface. The bottle in the foreground is a dark green, slightly irregular shape, while the one in the background is a more standard, lighter green bottle. The wood grain is prominent, and the lighting creates soft shadows and highlights on the glass and wood.

Uneven & irregular olive shapes

WHY NOT HAVE A WINE THAT BREATHES NATURE?

Nobody questions the quality of a grape for its slightly difference in shape next to another one from the same plant. Let's accept small irregularities that can connect us to a more craft and natural world without losing any perceived quality and without compromising functional aspects.

SUSTAINABLE FROM CONCEPTION

Embrace Imperfections reducing wasted production.

Aesthetic imperfections and slight colour variations between them do not pose a problem, on the contrary, they are more than welcome. We love them and they help us reducing wasted production up to 25%.

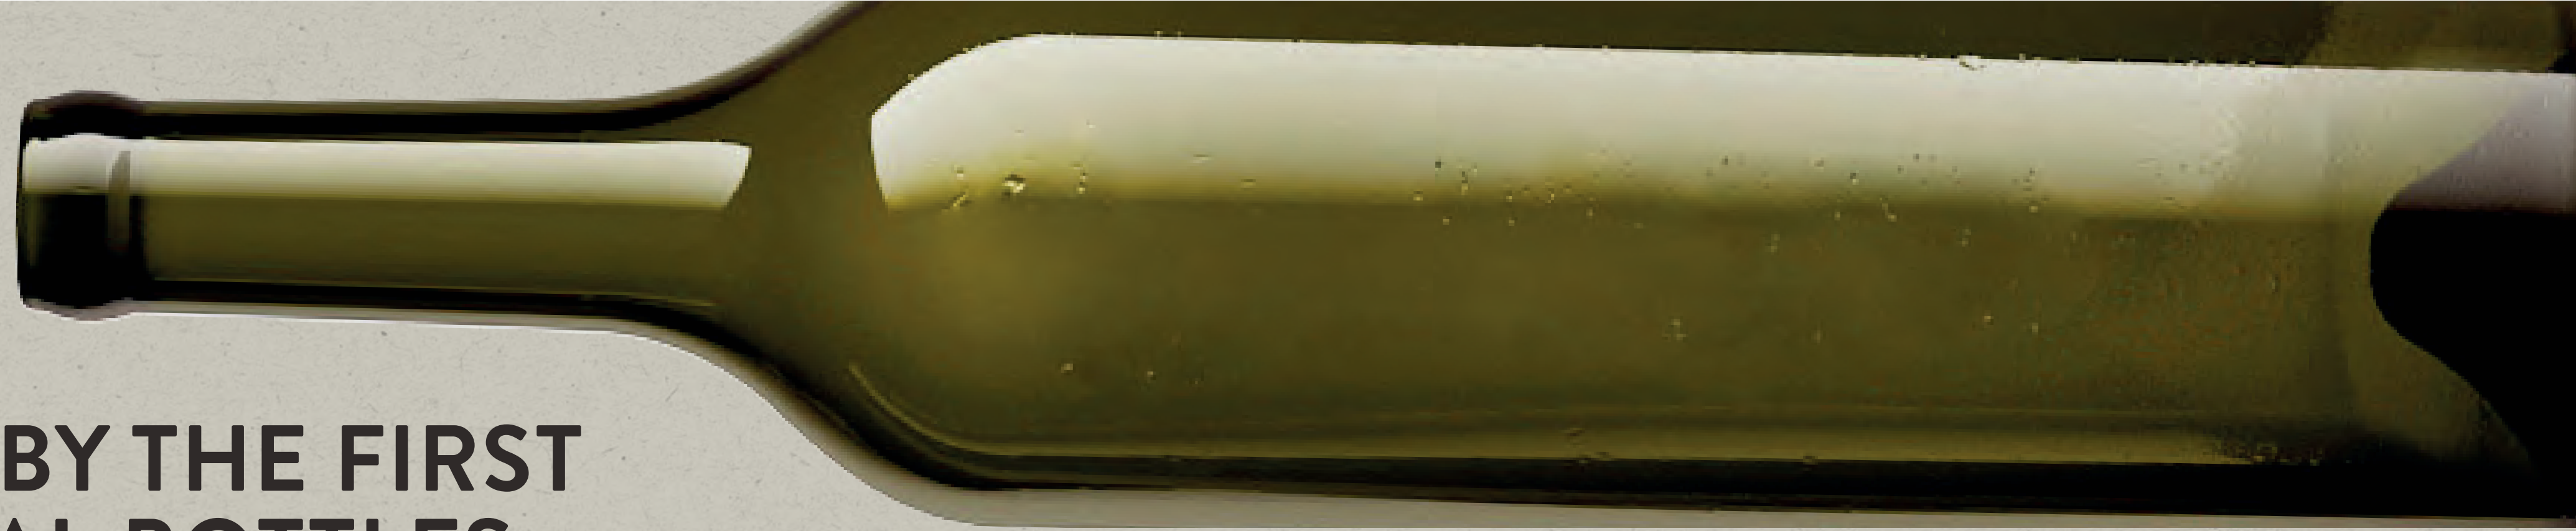

Sustainability, based on own innovation.

We have rewritten the paradigms of industrial milling, created new methods and patented new procedures that allow us a degree of flexibility and efficiency unthinkable until today.

WILD GLASS

Up to 100% Post Consumer Recycled glass content.

We work only with the industrial furnaces with the highest percentage of PCR (Post Consumer Recycled) glass on the market. Wild Glass bottles are not exquisite and accept all types of recovered glass.

INSPIRED BY THE FIRST INDUSTRIAL BOTTLES

The formal and aesthetics consistency in the handcrafted bottles, or even in the first bottles, was not regular. This characteristic has been lost as we have improved the industrial processes. However, we can recover them without compromising the indispensable functional aspects of a bottles of our time.

Glass colour offer.

Our patented WILD GLASS is the only one in the world that uses up to 100% Post Consumer Recycled glass content (PCR) and accepts all types of recovered glass, creating a really interesting and truly organic colour range.

You can choose between two different glass colours: Wild Flint Glass and Wild Dark Glass.

Bottle finish offer.

The Wild Glass Wines PRIMA Collection is available in different finishes under request.
