Semi automatic system for round containers, full wrap and partial wrap

- The new solution for labelling cylindrical containers in a semi automatic process, is designed to handle containers in different dimensions and operate with labels in many design
- The flexible design of the rollers to hold the container, allow to adjust the distance between the idle rollers, by a spindle. This makes it possible to work with a wide range of container diameters
- The modern label dispenser, model Atwell 2-120, has maintenance

TECHNICAL SPECIFICATION

Minimum container diameter:20mm, maximum: 100mm
 Container height:.....<200mm
 Label width:minimum 20mm,
 maximum 100mm
 The system requires 220v and compressed air

OPTIONS

- Sensor for transparent labels
- 200mm wide dispenser
- Orientation function
- Print system
- Floor stand to hold system
