Product Tailoring Service

Made to order minimum quantities apply.

Our unique service just for you, tailor made to suit your requirements.

As well as our wide variety of stock ranges and products, we are also able to tailor our products to suit your specific needs without breaking the bank. As well as a full custom moulding and bespoke design service we are also happy to look at small alterations to our stock ranges to help you achieve your desired look (subject to product parameters).

The best way to achieve a new look item is by making a tailor made custom mould, which we can design and make in-house (see Page 43 for details). But if you can't stretch to the price of a brand new mould we may be able to reduce the costs by making minor modifications to our current tooling.

Like the idea of our products in the colour to suit your products? Talk to our sales team about having a colour matched item or one of our standard colours that may be the economic answer to your tailoring needs.

Can't get your chosen cap to fit the bottle? Bottle necks can easily be changed to achieve this by altering the mould. Fancy it in a different colour or material? We can make to order all our products in any colour and suitable material (subject to testing).

Do you like the idea of having your company logo on a scoop or measure? Printing on the product image and details rather than labelling is something we can offer with an in-house screen-printing facility and our own design team to help you with your artwork. We can accept most file formats and will email a pre-production sign off form to make sure you are happy before we begin printing. See Page 42 for details.

So don't just dream about launching that new product, let us help you turn it into reality.

We can reassure you that we have been doing this for over 80 years; we are a family business so you can be sure of that attention to detail so often lacking with large companies.
