

Sustainable Paper Based Flexible Packaging

Decades of experience within the paper faced sector enables a ground-breaking range of genuinely sustainable products

Tungate's long standing and hard-earned position within the paper based flexible packaging sector has enabled us to now offer an unrivalled range of genuinely sustainable printed materials for retailers and brand holders.

Several ground breaking specifications are now in stock ready for trials and implementation. All products are genuinely recyclable via kerbside schemes and in many cases are also compostable.

Material Options

- High and medium barrier Paper/PE laminates which conform to OPRL criteria for widely recycled status
- High and medium barrier water based coated papers which are 100% recyclable and also compostable to EN 13432

Products Include

- HFFS sachets on reels
- HFFS flow wrap on reels
- VFFS wraps/bags
- Pouches (on reels and cut singles)

Processing

- HD, UV and solvent flexo printing
- Gloss, matt and combination varnishes
- Up to 9 colour litho and HD UV technology
- In-house reprographics and plate making
- Fully representative trials always provided to underpin project integrity
